

# General Certificate of Education (A-level) June 2013 

Use of Mathematics (Pilot)
USE1
(Specification 9361)
Algebra

## Final

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all examiners participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for standardisation each examiner analyses a number of students' scripts: alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, examiners encounter unusual answers which have not been raised they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from: aqa.org.uk

## Copyright

AQA retains the copyright on all its publications. However, registered schools/colleges for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to schools/colleges to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

## Key to mark scheme abbreviations

| M | mark is for method |
| :--- | :--- |
| m or dM | mark is dependent on one or more M marks and is for method |
| A | mark is dependent on M or m marks and is for accuracy |
| B | mark is independent of M or m marks and is for method and accuracy |
| E | mark is for explanation |
| Лor ft or F | follow through from previous incorrect result |
| CAO | correct answer only |
| CSO | correct solution only |
| AWFW | anything which falls within |
| AWRT | anything which rounds to |
| ACF | any correct form |
| AG | answer given |
| SC | special case |
| OE | or equivalent |
| A2,1 | 2 or 1 (or 0$)$ accuracy marks |
| $-x$ EE | deduct $x$ marks for each error |
| NMS | no method shown |
| PI | possibly implied |
| SCA | substantially correct approach |
| c | candidate |
| sf | significant figure(s) |
| dp | decimal place(s) |

## No Method Shown

Where the question specifically requires a particular method to be used, we must usually see evidence of use of this method for any marks to be awarded.

Where the answer can be reasonably obtained without showing working and it is very unlikely that the correct answer can be obtained by using an incorrect method, we must award full marks. However, the obvious penalty to candidates showing no working is that incorrect answers, however close, earn no marks.

Where a question asks the candidate to state or write down a result, no method need be shown for full marks.
Where the permitted calculator has functions which reasonably allow the solution of the question directly, the correct answer without working earns full marks, unless it is given to less than the degree of accuracy accepted in the mark scheme, when it gains no marks.

Otherwise we require evidence of a correct method for any marks to be awarded.

| Question | Solution | Marks | Total | Comments |
| :---: | :---: | :---: | :---: | :---: |
| 1(a) | 64, 144, 256, 400 | B1 | 1 |  |
| (b)(i) | 3 points correct and line all correct $\pm 2 \mathrm{~mm}$ | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \end{aligned}$ | 2 | 1 ruled line up to 1 mm thick At least from $\mathrm{T}^{\wedge} 2=0$ to 400 |
| (b)(ii) | $\begin{gathered} b=1.2 \text { to } 1.5(=\text { graph intercept }) \\ \text { evidence of measurements of " } \Delta \mathrm{x} \\ \text { and } \Delta \mathrm{y} \text { " } \\ a=0.018 \text { to } 0.025 \end{gathered}$ | $\begin{aligned} & \text { B1 } \\ & \text { M1 } \\ & \text { A1 } \end{aligned}$ | 3 | Allow substitution to find $a$ if a point on the line is used. <br> If $a$ and $b$ are transposed or not assigned B0M1A0 max. <br> NMS: If $b$ matches the graph and $a$ is in the range B1M1A1but if $b$ does not match graph B0M0A0 |
| (c) | $\begin{gathered} M=0.021\left(32^{2}\right)+1.3 \\ 22.8 \end{gathered}$ | M1 A1 ft | 2 | Allow use of 'their' $a$ and $b$ if working is seen or if their $a$ and $b$ are both in the acceptable range Only FT if $M$ is less than or equal to 100 |
| (d) | Percentage share cannot exceed 100 | B1 | 1 | "It would probably stop increasing after a while" B0 General comment on extrapolation B0 |
|  | Total |  | 9 |  |
| 2(a) | Increasing, curved the right way. | B1 |  | Ignore anything drawn for $x<0$. Condone a flattish bit near the $y$-axis but must be strictly non-decreasing, must be a function. |
|  | $y$-intercept $=4000$ | B1 | 2 |  |
| (b)(i) | $\begin{aligned} & 4000 \times e^{(0.034 \times 6)} \\ & 4910 \end{aligned}$ | $\begin{aligned} & \text { M1 } \\ & \text { A1 } \end{aligned}$ | 2 | 0.204 seen and a power of $e$ seen: M1 Accept any integer in the range [4900,4910] for M1A1 but any decimal in same range M1A0 |
| (b)(ii) | $\left(8000=4000 \times \mathrm{e}^{0.034 t}\right)$ |  |  |  |
|  | $2=e^{0.034 t}$ | M1 |  | For taking logs correctly |
|  | $0.034 t=\ln 2$ | M1 |  |  |
|  | 20.4 (hours) AWRT | A1 | 3 | Accept 20, 20.3 or 21 with working. <br> Trial and improvement methods give 3 marks for 20.4, or 2 marks for 20 or 21. <br> NMS AWRT 20.4, 20hours 24 mins, 20 <br> hours, 23 mins score M1M1A1 but anything else scores zero. |
|  | Total |  | 7 |  |

\begin{tabular}{|c|c|c|c|c|}
\hline Question \& Solution \& Marks \& Total \& Comments \\
\hline 3(a)(i) \& \(1.89,1.92,1.65,1.08,0.21,-0.96\) \& \[
\begin{aligned}
\& \hline \text { B1 } \\
\& \text { B1 }
\end{aligned}
\] \& 2 \& 4 or 5 values all values correct \\
\hline (a)(ii) \& Inverted quadratic shape Completely correct, including scale and curve. \& \[
