Question No	Solution
1	D
2	A
3	D
4	C
5	A
6	C
7	C
8	B
9	D
10	C
11	B
12	A
13	A
14	D
15	C
16	A
17	A
18	C
19	C
20	D

3	Year ended:	Depreciation	NBV c/f
	31 October 2004	£15,500 x 20% = £3,100	£15,500 – £3,100 = £12,400
	31 October 2005	£12,400 x 20% = £2,480	£12,400 – £2,480 = £9,920
	31 October 2006	£9,920 x 20% = £1,984	

7 Rent of £7,800 paid in advance, thus prepayment at year end. At 30 November, two months of the period for which rent has been paid is unexpired.  
 Rent for one month = £7,800 ÷ 4 = £1,950  
 Two months paid in advance = £1,950 x 2 = £3,900.

8	Debtors balances	£37,890	
	less: write off	£1,570	
	Revised debtors	£36,320	Allowance at 2.5% = £908
	less: allowance	£908	
	Net debtors	£35,412	

10	Provision required	£7,634	
	Provision brought forward	£6,548	
	Increase in provision	£1,086	increase in provision = charge

13		£	
	Balance at 1 November 2005	24,800	credit
	Salary	6,500	credit
	Interest on drawings	1,800	debit
	Share of profit	12,750	credit
	Drawings	18,000	debit
	Balance at 31 October 2006	24,250	credit

**15**

**Electricity account**

	<b>£</b>		<b>£</b>
Paid in year	1,765	Opening balance	264
Closing balance	<u>312</u>	Charge for year	<u>1,813 (bal fig)</u>
	<u><u>2,077</u></u>		<u><u>2,077</u></u>

**16** Current assets:

	<b>£</b>
Stock	5,754
Trade debtors	11,745
Cash at bank	<u>150</u>
	<u><u>17,649</u></u>

**Section B**

**Marks**

**1 (a)** Users of final accounts, and their needs, include:

USER	REASON
Owners	to assess the performance of managers
Managers	to understand the current position of the business, and to plan future actions
Customers	to assess the ability of the business to continue to supply goods or services
Suppliers	to assess the creditworthiness of the business
Lenders	to assess the ability of the business to make the required repayments
Employees	to assess career prospects and job security

Mark allocation	1 mark for each user to a maximum of	2	
	1 mark for each reason to a maximum of	<u>2</u>	4

**(b)** Control accounts are used for the following reasons:

- to check the accuracy of entries in the personal ledgers
  - errors will lead to a difference between the balance on the control account and the total of the balances from the personal ledger.
- to assist in the location of errors
  - a regular comparison of the balance on the control account with the total of the list of balances will mean that errors will be highlighted more quickly. This will mean that the volume of transactions to be checked will be lower, and this will make it easier to locate errors.
- to provide total values for inclusion in the final accounts
  - this can assist in speeding up the preparation of final accounts. If there is reasonable certainty that there are no material errors (usually as a result of the regular checking considered above), the balances from the control accounts can be used in the preparation of final accounts.
- to calculate missing figures
  - if the accounting records are incomplete, control accounts can be used to calculate missing figures. For example, if we know the opening and closing values for creditors, and the amount paid to suppliers in the accounting period, we can calculate the value of purchases.

Mark allocation	1 mark for each valid reason, to a maximum of	2	
	1 mark for each explanation to a maximum of	<u>2</u>	4

**(c)** A bank reconciliation is carried out to uncover and correct any errors in the recording of payments made from the bank account and amounts lodged to the bank account. It will also highlight any transactions initiated by the bank which have not yet been recorded in the entity's accounting records. The reconciliation statement will include the balance on the bank statement, the balance on the ledger, the value of cheques issued but not yet presented at the bank and the value of lodgements which have not yet been processed by the bank.

Mark allocation	1 mark for each valid comment on the reasons for preparing a bank reconciliation to a maximum of	2	
	1 mark for each item on the reconciliation statement, to a maximum of	<u>2</u>	4

**(d)** Transactions are recorded by both a debit entry and a credit entry (also referred to as 'double entry') as this reflects the effects of the transaction on the entity. Every transaction affects the entity in two ways. This is usually referred to as the 'dual aspect'. The two effects mean that the accounting equation (assets – liabilities = capital) will apply consistently to the entity. For example if expenses are paid in cash, the entity is affected by an increase in the expense and a reduction in cash. The increase in the expense will cause a reduction in profit, and therefore capital. Thus both assets and capital have reduced, and the accounting equation will continue to apply.

Mark allocation	1 mark for each valid point to a maximum of	3	
-----------------	---	---	--

<b>2 (a)</b>	Creditors control account		
	£		£
(ii) Credit note	532	Balance as given	45,505
(iii) Offset	864	(i) Invoice omitted	739
(v) Discount	85	(vi) Payment overstated	90
Corrected balance	<u>44,853</u>		
	<u>46,334</u>		<u>46,334</u>
Mark allocation:	Correcting entries 1 each		5
	Balance as given/corrected balance 1/2 each		1
<b>(b)</b>	£		
Total as given	46,886		
(i) Invoice omitted	739		1
(ii) Credit note	(532)		1
(iii) Offset	(864)		1
(iv) Payment omitted	(1,800)		1
(vi) Payment overstated	90		1
(vii) Balance incorrectly listed	334		1
Corrected total	<u>44,853</u>		1
<b>(c)</b>	The corrected ledger balance of £44,853 should be reported on the balance sheet as a current liability.		
1 mark each for any two of:	corrected ledger balance		
	reported on balance sheet		2
	current liability		

**15**

<b>3 (a)</b>	Triumph	Cost		
		Purchase price	£4,800	
		Completed repairs	£750	
		Cost at 30 November 2006	<u>£5,550</u>	1
		Net Realisable value		
		Expected selling price	£7,500	
		Costs of selling	£400	
		Net realisable value	<u>£7,100</u>	1
		Stock value (lower)	£5,550	1
	Ducati	Cost		
		Purchase price	£6,800	
		Actual cost of repairs	£1,800	
		Cost at 30 November 2006	<u>£8,600</u>	1
		Net realisable value	£8,000	1
		Stock value (lower)	£8,000	1
	Norton	Cost (purchase price)	<u>£8,500</u>	1
		Net realisable value		
		Expected selling price	£11,500	
		Repairs required	£1,200	
		Net realisable value	<u>£10,300</u>	1
		Stock value (lower)	<u>£8,500</u>	1

9

<b>(b)</b>	Purchases:				
	500 units at £21.55 each	=	£10,775		
	420 units at £22.90 each	=	£9,618		
	640 units at £23.05 each	=	<u>£14,752</u>		
	Total cost of purchases		£35,145	1	
	Cost per unit	£35,145 ÷ (500 + 420 + 640)			
	=	£22.53 per unit (rounded)		1	
	Thus stock value 320 units at £22.53 =	£7,210		<u>1</u>	3
<b>(c)</b>	<b>(i)</b>	The under-valuation of the stock at 30 November 2005 will have reduced the profit for the year ended on that date.			1
	<b>(ii)</b>	This will mean that the opening stock for the year to 30 November 2006 will be under-valued leading to an overstatement of the profit for the year ended on that date.			1
	<b>(iii)</b>	The balance on Tony's capital account at 30 November 2006 is unaffected by the error as it has been corrected by that date. (Effectively the reduction of the profit for the 2005 year and the overstatement of the profit for the 2006 year cancel one another out.)			1
					<u>15</u>

<b>4</b>	<b>(a)</b>	<b>(i)</b>	<b>£</b>		
		Opening bank balance	(1,240)	$\frac{1}{2}$	
		Lodged	76,846	1	
		Payments made	(75,040) balancing figure		
		Closing bank balance	<u>566</u>	$\frac{1}{2}$	2
		<b>(ii)</b>	<b>£</b>		
		Total lodged	76,846	$\frac{1}{2}$	
		add: Expenses	5,700	$\frac{1}{2}$	
		Drawings	<u>7,800</u>	$\frac{1}{2}$	
			90,346		
		less: Gift	<u>6,000</u>	$\frac{1}{2}$	2
		Received from customers	<u>84,346</u>		
		<b>(iii)</b>	<b>£</b>		
		Opening balance	1,676	$\frac{1}{2}$	
		add: Sales	<u>84,030</u> balancing figure		
			85,706		
		less: Cash received	<u>84,346</u>	1	
		Closing balance	<u>1,360</u>	$\frac{1}{2}$	2
		<b>(iv)</b>	<b>£</b>		
		Payments made (i)	75,040	1	
		less: Expenses	£3,400		
		Drawings	<u>£2,000</u>	<u>1</u>	2
		Paid to suppliers	<u>69,640</u> = purchases as no credit		
		<b>(v)</b>	<b>£</b>		
		Sales		84,030	$\frac{1}{2}$
		Opening stock	5,250	$\frac{1}{2}$	
		Purchases	<u>69,640</u>	$\frac{1}{2}$	
			74,890		
		Closing stock	<u>4,190</u>	$\frac{1}{2}$	2
		Cost of sales		<u>70,700</u>	
		Gross Profit		<u>13,330</u>	

	£	£		Marks
<b>(vi)</b> Gross profit		13,330		
Expenses (cash)	5,700		1	
(bank)	<u>3,400</u>	9,100	<u>1</u>	2
Net profit		<u><u>4,230</u></u>		

**(b)** Cost of sales + 20% = Value of sales at 'normal' price

Cost of sales	£70,700			
Mark up (20%)	£14,140			
Sales at 'Normal' price	£84,840		1	
Actual Sales	£84,030		1	
Thus reduction	£810		<u>1</u>	<u>3</u>
				<b>15</b>
