Question No	Solution	Question No	Solution
1	D	11	D
2	B	12	C
3	D	13	B
4	A	14	B
5	A	15	C
6	D	16	A
7	B	17	A
8	C	18	B
9	C	19	B
10	D	20	D

**Workings**

2 The balances provided in the question are correctly classified as follows:

	£	
Machinery at cost	85,800	fixed asset
Accumulated depreciation on machinery	21,750	reduction in fixed asset
Trade debtors	42,650	current asset
Debtors allowance	1,570	reduction in current asset
Bank overdraft	6,470	current liability
Stock at 1 November 2006	21,650	charge in profit and loss account

The stock at 31 October 2007 of £22,300 is also a current asset.

Thus the total value of current assets is: £63,380  
 (£42,650 – £1,570 + £22,300)

4	Opening accrual	£297	Credit
	Payments made	£4,570	Debit
	Balance at 31 October 2007	£4,273	Debit

NB There is no closing accrual or prepayment as the invoices cover the period up to the end of the financial year.

5 The list of balances will be reconciled to the corrected ledger balance as follows:

	£		£
	37,552	Balance	38,842
<i>add</i> Balance omitted	1,200	<i>less</i> Error in daybook	90
	<u>38,752</u>		<u>38,752</u>
<i>less</i> Credit note	750	<i>less</i> Credit note	750
	<u><u>38,002</u></u>		<u><u>38,002</u></u>

8	Profit	£27,800	
<i>less</i>	Salary – Robert	<u>3,800</u>	
	Residual profit	24,000	
	of which Vivienne's share is 3/5 or		£14,400

10 Invoice to 30 September £462 for three months, thus charge is £154 per month.  
 Accounts to 30 November, thus two months accrued = £308.  
 Charge = £1,540 + £308 = £1,848

<b>12</b>		<b>£</b>	
	Debtors balance	78,600	
	/ess Irrecoverable amount	600	
	Revised balance	78,000	
	Allowance at 1.5% =	1,170	
	Existing allowance	1,200	
	Reduction	30	i.e. credit to profit and loss account

<b>14</b>		<b>£</b>	<b>£</b>
	Cost of stock		41,875
	Damaged items:		
	Cost	<u>1,960</u>	
	Expected sale value	1,200	
	/ess cost of repairs	<u>360</u>	
	Net realisable value	<u>840</u>	
	Write down (£1,960 – £840)		<u>1,120</u>
	Stock valuation		<u>40,755</u>

**19** The opening balance is £2,304 more than the closing balance. Thus the purchases are £2,304 less than the payments, i.e. £93,582.

**20** Sales represent 125% of the cost of sales  
 Thus cost of sales =  $£120,600 \times \frac{100}{125} = £96,480$   
 Stock value increased by £2,515  
 Thus purchases were  $£96,480 + £2,515 = £98,995$

**Section B**

**Marks**

**1 (a)** In the ASB's *Statement of principles for financial reporting*, an asset is defined as the right of an entity to access future economic benefits, while a liability is defined as an obligation to transfer future economic benefits to a third party.  
 In both cases, the right or obligation must have arisen as a result of a past event or transaction.  
 An example of an asset is an amount owed by customers for goods which they have purchased on credit.  
 The balance due for repayment on a loan is an example of a liability.

Mark allocation:

reference to:	access to future economic benefits	1
	obligation to transfer economic benefits	1
	past event or transaction	1
For each valid example	1 mark	<u>2</u>
		5

to a maximum of

4

**(b)** A suspense account would be used if:  
 a trial balance has been extracted and the total of the debit balances and the total of the credit balances do not agree. The suspense account would be used to bring the two totals into agreement until the reason for the imbalance can be found and the problem is rectified;  
 the nature of an entry is unknown. If information regarding a transaction is not immediately available, a suspense account will be used to 'hold' the required entry until the information has been obtained. At that point the entry will be transferred from the suspense account to the correct account.

Mark allocation: 1 mark for each valid comment to a maximum of

2

**(c)** The following errors will NOT be revealed by extracting a trial balance:

- failing to make any record of a transaction (this is referred to as an error of complete omission);
- posting one side of an entry to the wrong account (When the entry is posted to another account within the same classification, this is referred to as an error of commission. When the entry is posted to an account within a different classification, this is referred to as an error of principle.);
- posting each of the entries for a transaction to the wrong side of the correct accounts (this is referred to as reversal of entries);
- recording a transaction correctly, but for the wrong amount (this is referred to as an error of original entry);
- making two or more errors so that the errors cancel each other out (this is referred to as compensating errors).

Mark allocation 1 mark for each error to a maximum of

3

**(d)** If capital expenditure is incorrectly classified as revenue expenditure, the effect on profit will be:

the profit for the year in which the error is made will be understated as expenses will be increased;	1
the profit for the following year will be overstated as the exclusion of the item from fixed assets will mean that no depreciation will be charged. This will understate expenses and overstate profit for that year.	<u>1</u>

2

**(e)** The principle of materiality affects the preparation of financial statements in the following ways:

Omission/Misstatement

An item is considered to be material if its omission or misstatement will affect the economic decisions of a user of the financial statements. In making this judgement, it is assumed that users are reasonably knowledgeable.

Presentation

The way in which information is presented is subject to decisions regarding materiality. When preparing financial statements, it will often be necessary to decide whether an item should be written off or carried forward on the balance sheet. This decision will be made on the basis of whether the item is considered to be material.

- (d) The information is recorded in the asset register for the following reasons:
- |                                    |   |
|------------------------------------|---|
| (i) Internal reference number      | to identify the specific asset easily                         |
| (ii) Manufacturer's serial number  | in case of any warranty claim                                 |
| (iii) Depreciation charge for year | to calculate the accumulated depreciation                     |
| (iv) Cost                          | to allow depreciation to be calculated                        |
| (v) Supplier                       | to enable replacement parts to be ordered                     |
| (vi) Description                   | to identify the asset when carrying out a physical inspection |
- Mark allocation 1 mark for each item to a maximum of

3  
**15**

**3 (a) Creditors control account**

	£		£
(iv) Offset	570	Balance as given	128,593
(vi) Discount	23	(i) Invoice omitted	263
Corrected balance	<u>128,577</u>	(ii) Invoice as credit note	134
	<u>129,170</u>	(vii) Payment overstated	<u>180</u>
			<u>129,170</u>

Mark allocation: Correcting entries 1 each 5  
Balances 1/2 each 1 6

(b)

	£		
Total of listing	128,929		1/2
(i) Invoice omitted	263		1
(ii) Invoice treated as credit note	134		1
(iii) Payment omitted	(430)		1
(iv) Offset	(570)		1
(v) Credit balance omitted	71		1
(vii) Payment overstated	180		1
Corrected total	<u>128,577</u>		<u>1/2</u> 7

- (c) The corrected ledger balance of £128,577 should be reported on the balance sheet as a creditor due within one year.

1 mark each for any two of: corrected ledger balance 2  
reported on balance sheet  
creditor due within one year
