Written examination

Thursday 10 November 2005

Reading time: 3.00 pm to 3.15 pm (15 minutes) Writing time: 3.15 pm to 5.15 pm (2 hours)

QUESTION AND ANSWER BOOK

Structure of book

Number of questions	Number of questions to be answered	Number of marks
5	5	60

- Students are permitted to bring into the examination room: pens, pencils (including coloured pencils), highlighters, erasers, sharpeners and rulers.
- Students are NOT permitted to bring into the examination room: blank sheets of paper and/or white out liquid/tape.
- No calculator is allowed in this examination.

Materials supplied

- Question and answer book of 10 pages.
- A data book.

Instructions

- Write your **student number** in the space provided above on this page.
- All written responses must be in English.

At the end of the examination

• You may keep the data book.

Students are NOT permitted to bring mobile phones and/or any other unauthorised electronic devices into the examination room.

Instructions

Answer all questions in the spaces provided in this book. Refer to the data book as indicated.

\sim	4 •	
Ou	estion	

i.	2 I Identify one similarity in the type of resources shown in Map Square B and Map Square C.
1.	- Tuentry one similarity in the type of resources shown in Map Square C.
ii.	Identify one difference in the type of resources shown in Map Square B and Map Square C.
iii.	Suggest two reasons why the future development of resources in Map Square C is likely to be g than in Map Square B.

	2 marks
	ntify one piece of photographic evidence and one piece of map evidence to explain why the land urces have not been developed for annual crop growing.
i.	Photographic evidence
ii.	Map evidence

2 + 2 = 4 marks

DATA BOOK

Directions to students

- A question and answer book is provided with this data book.
- Refer to the data in this book for each question as indicated in the question and answer book.
- The data contained in this book is drawn from current real world case studies.

Students are NOT permitted to bring mobile phones and/or any other unauthorised electronic devices into the examination room.

Figure 1 (e): Small scale farming in the Scottish Highlands

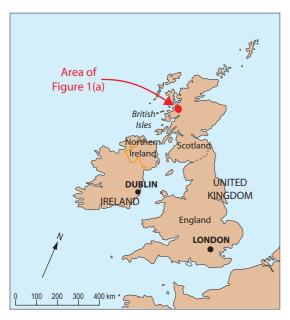

Figure 1 (c): Location map

Figure 1 (d):

Background information

The area shown on the map extract of Figure 1(a) is part of the Scottish Highlands. Located at latitude 56.45° north, the climate is cool in summer and the area is snow-covered in winter. These characteristics, together with the area's isolation, limit the range of activities undertaken by people.

Figure 1 (f): Cattle grazing in the Scottish Highlands

TURN OVER

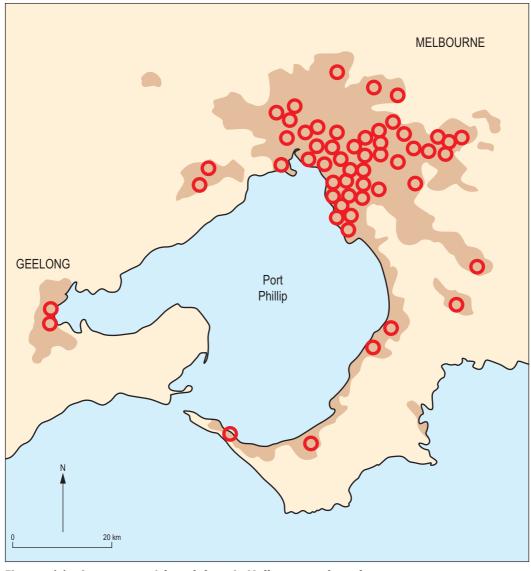

Figure 2 (a): One company's bread shops in Melbourne and nearby regions

Figure 2 (b):

Background information

Bread shops are a familiar landmark in many shopping centres. There are several large companies operating a number of bread shops. Figures 2(a) and 2(c) show the distribution of one company's bread shops.

Figure 2 (c): One company's Victorian bread shops

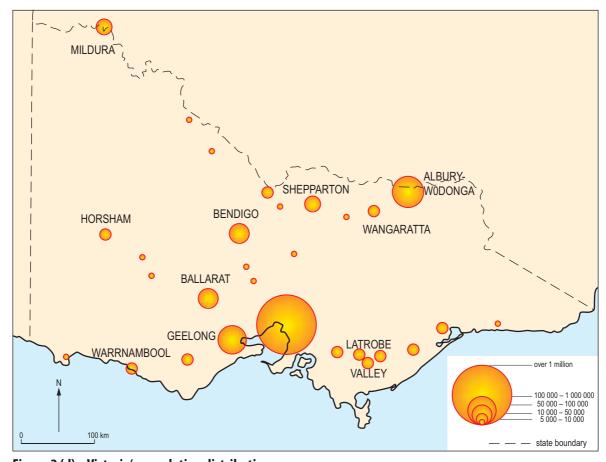

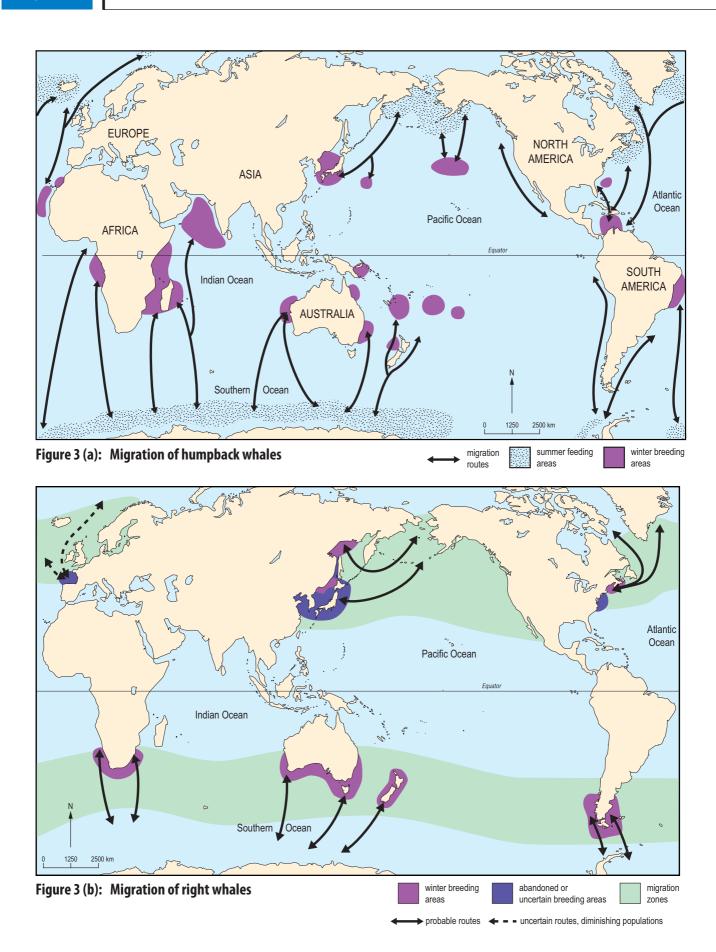

Figure 2 (d): Victoria's population distribution

Global Phenomena

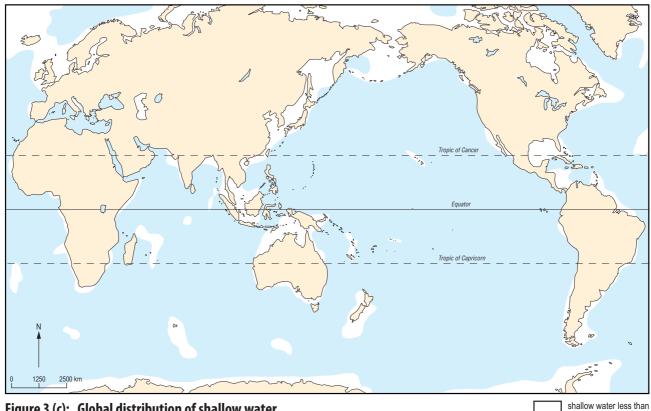

Figure 3 (c): Global distribution of shallow water

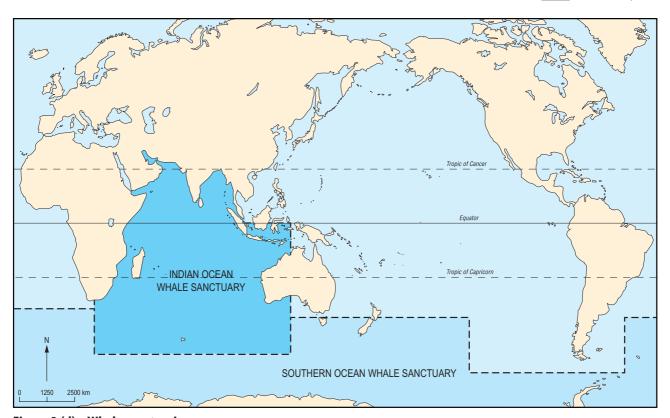

Figure 3 (d): Whale sanctuaries

Figure 3 (e): Background information

During the nineteenth and early twentieth centuries many species of whale were hunted, almost to extinction. Most whales are now protected from hunting by international agreement and by the establishment of whale sanctuaries in the Indian and Southern oceans.

However, some countries continue to hunt whales for 'scientific' or 'cultural' purposes. The number of whales throughout the world is increasing and some species have recovered from near extinction. Australia has banned hunting of whales in Australian waters.
