PRINCIPLES OF ACCOUNTING

SUGGESTED SOLUTIONS

Answer 1

Debtors Account

Bank: Specific doubtful debts recovered:	
EFG Ltd	18,000
MNO Ltd	56,000
Bad debt expense account:	
RST Ltd	15,000

General Provision for Bad Debts Account

Balance c/d (working)	62,000	Balance b/d	54,000
		Bad debt expense account	8,000
	<u>62,000</u>		<u>62,000</u>
		Balance b/d	62,000

Specific Provision for Bad Debts

Balance c/d	200,000	Balance b/d	164,000
		Bad debt expense account	36,000
	<u>200,000</u>		<u>200,000</u>
		Balance b/d	200,000

Bank Account

Bad debt expense account:	
XYZ Ltd	3,000
Debtors account:	
EFG Ltd	18,000
MNO Ltd	56,000

Bad Debt Expense Account

General provision for bad debts	8,000	Bank: XYZ Ltd	3,000
Specific provision for bad debts	36,000	Profit & loss account	56,000
Debtors account: RST Ltd	15,000		
	<u>59,000</u>		<u>59,000</u>

- b) A bad debt is when a debtor becomes unable to pay the amount he owes. The amount is therefore written out of the business's accounting records because it is no longer an asset. The loss of the debtor is an expense of the business and the expense must be charged to the profit and loss account. Sales, in the trading account, are not reduced as the sale itself was good. It is the collection of the debt which is the problem.

A doubtful debt is when there is uncertainty as to whether a debt will be recoverable. An example of this is when a debt has remained unpaid for a period of time exceeding the normal settlement time.

A provision is set up against doubtful debts but the debts still remain in the business's records as assets.

- c) A specific provision is a provision against specifically identified debtors.

A general provision is against debtors as a whole excluding those which have been specifically provided for. A general provision will be based on a percentage of remaining debtors taking into consideration the following factors:

- i) the nature and type of business; and
- ii) the previous experience of the business.

A specific provision is allowed to reduce profits in the tax computation since it relates to a specific debt which can be identified and evaluated whereas a general provision is not allowable because it is subjective.

Workings

General doubtful debt provision at 30 November 2005 is:-

Trade debtors	1,750,000
Less: specific provision	<u>(200,000)</u>
	1,550,000
4% of £1,550,000 = <u>£62,000</u>	

Answer 2

- a)
1. The grant received is in respect of the purchase of machinery which is capital expenditure. The grant should not, therefore, be recognised in the profit and loss account for the year to 31 December 2005 since the related expense, the depreciation charge, will be spread over 10 years under the terms of the company's depreciation policy. The grant should, therefore, be amortised over 10 years at the rate of £3,000 p.a. commencing in the year to 31 December 2005.
 2. The grant received for taking on an unemployed person is a revenue grant because it relates to employment costs which are revenue costs as opposed to capital costs. Consequently, the grant should be recognised in the profit and loss account in the year to 31 December 2005, the year in which it was received.
 3. Research expenditure is required by SSAP 13 to be written off as incurred unless the expenditure is on fixed assets acquired to provide research facilities, in which case they can be capitalised. The expense of Bloggs Limited is in respect of employment costs and should therefore be written off as incurred.
 4. My preferred accounting treatment would be to write off the whole of the development expenditure in the year to 31 December 2005 on the grounds that this is the most prudent way of accounting for this expenditure. SSAP 13 would, however, permit Bloggs Limited to amortise the cost over the expected useful life of the product (5 years) provided that there was evidence available regarding the technical and commercial viability of the product.
 5. The goodwill is purchased goodwill and guidance on how to account for purchased goodwill is given in FRS 10. FRS 10 suggests that goodwill should be capitalised as an asset in the balance sheet of the acquiring business. However, FRS 10 does require goodwill to be amortised if it has a limited useful economic life. The goodwill should, therefore, be written off to the profit and loss account on a straight line basis over 10 years starting in the year to 31 December 2005.
 6. Although the legal form of the transaction is that Bloggs Limited is simply renting the van, the effect of the transaction is that it is borrowing money and 'purchasing' the asset. Bloggs Limited should, therefore, bring the price of the van into fixed assets and depreciate in the normal way. It should also recognise the liability for the future payments.

The interest/finance charge incurred under the agreement should be charged to the profit and loss account over the period of the agreement. There are several methods of allocating the interest to the profit and loss account.
 7. The company is simply renting the use of the vehicle and these payments should be shown in the P&L as they are incurred.
- b) Research expenditure is expenditure incurred on an original investigation undertaken to gain new scientific or technical knowledge. Development expenditure, on the other hand, is the use of scientific or technical knowledge to produce new or substantially improved materials, devices, products etc, prior to the commencement of commercial production.

c) Capital expenditure is incurred in:

- i) the acquisition of assets for use in the business as opposed to being acquired for resale eg cars, buildings, machinery etc
- ii) the alteration or improvement of assets for the purpose of increasing their revenue earning capacity.

Revenue expenditure is expenditure which is expensed or charged to the profit and loss account when such expenditure is incurred eg repairs, wages etc

A finance lease is a long-term lease where the term of the lease is likely to cover all or most of the asset's life.

An operating lease is short-term leasing. The lease involves the hirer paying rental on an asset for a period which is normally substantially less than its useful life.

The main distinguishing feature of a finance lease as compared to an operating lease is that substantially all the risks and rewards of the asset belong to the hirer.

Answer 3

1. Cashflow statement

Alpha Limited**Cashflow Statement for the year ended 31 December 2005**

		£
Profit for year before taxation and interest	W1	71,000
Adjustments for items not involving movement of funds:		
Depreciation	W2	31,000
Loss on sale of fixed assets		<u>6,000</u>
		108,000
Increase in stock	W3	(8,000)
Decrease in trade debtors	W3	5,000
Decrease in trade creditors	W3	<u>(23,000)</u>
Net cash inflow from operating activities		82,000
Interest paid		(17,000)
Proceeds from issue of shares	W4	10,000
Redemption of debentures		(80,000)
Proceeds from sale of fixed assets	W5	30,000
Payments made to purchase fixed assets		(45,000)
Dividends paid	W6	(30,000)
Corporation Tax paid	W7	(8,000)
Increase in cash		<u>(58,000)</u>
Represented by:		
		—
Decrease in bank balance	W8	<u>(58,000)</u>

2.Important of cashflows

Cash is of great importance to the survival of businesses.

The profit and loss account due to accruals, depreciation etc does not provide information regarding the cash movements of a business so on its own could be misleading.

Due to depreciation, stock valuation policies etc it is possible to manipulate the results in the P&L account. A cashflow statement is not as easily manipulated.

Many users of accounts find a cashflow statement easier to understand.

FRS 1 was introduced as it was felt an additional statement detailing the difference between cash and profit provided added value to the users of accounts.
