## Rivershire Council Guidance for Zoo/Animal Collection Owners

This guidance applies to any zoo to which members of the public have access, with or without charge for admission, on seven days or more in any period of 12 consecutive months.

An application to the local authority for a licence for a zoo shall not be entertained by the local authority unless, at least two months before making it, the applicant has given notice in writing to the local authority of their intention to make the application, has published notice of that intention in one local newspaper circulating in the locality and one newspaper with a national circulation and has exhibited a copy of that notice at the site and the said notice shall state that the notice to the local authority may be inspected.

### Rivershire Council Guidance for Zoos

The following measures are to be implemented in zoos in order for a zoo licence to be considered.

- 1 All zoos must carry out research for conservation benefits and training in relevant conservation skills.
- 2 All zoos must exchange information with other zoos.
- 3 All animals, where appropriate, must be involved in captive breeding programmes with a view to reintroduction/trade with other zoos.
- 4 All zoos must be actively promoting education and awareness in conservation, biodiversity and information about the animals kept in the zoo and their natural habitats.
- 5 All animals must have suitable accommodation and be maintained in conditions which satisfy the biological and conservation requirements of the species.
- 6 All animals should be housed in an environment that is well adapted to meet their physical, psychological and social needs.
- 7 All animals should have a high standard of animal husbandry with a suitable programme of preventative care, veterinary care and nutrition.
- 8 All zoos must take precautions to prevent the escape of animals and put in place measures to be taken in the event of escape or unauthorised release of animals.
- 9 All zoos must take appropriate measures to prevent the intrusion of pests and vermin into the zoo premises.
- 10 All zoos must keep records of the collection's numbers of animals, acquisitions, births, deaths, disposals, health of animals, including preventative care and escapes of animals.
