## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications website at <http://qualifications.pearson.com/en/home.html> for our BTEC qualifications.

Alternatively, you can get in touch with us using the details on our contact us page at <http://qualifications.pearson.com/en/contact-us.html>

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson. Their contact details can be found on this link:

## Unit 4: Enquiries into Current Research in Health and Social Care

### General marking guidance

- All learners must receive the same treatment. Examiners must mark the first learner in exactly the same way as they mark the last.
- Mark grids should be applied positively. Learners must be rewarded for what they have shown they can do rather than be penalised for omissions.
- Examiners should mark according to the marking grid, not according to their perception of where the grade boundaries may lie.
- All marks on the mark grid should be used appropriately.
- All the marks on the mark grid are designed to be awarded. Examiners should always award full marks if deserved. Examiners should also be prepared to award zero marks if the learner's response is not rewardable according to the mark grid.
- Where judgement is required, a mark grid will provide the principles by which marks will be awarded.
- When examiners are in doubt regarding the application of the mark grid to a learner's response, a senior examiner should be consulted.

### Specific marking guidance

The mark grids have been designed to assess learners' work holistically.

Rows in the grids identify the assessment focus/outcome being targeted. When using a mark grid, the 'best fit' approach should be used.

- Examiners should first make a holistic judgement on which band most closely matches the learner's response and place it within that band. Learners will be placed in the band that best describes their answer.
- The mark awarded within the band will be decided based on the quality of the answer in response to the assessment focus/outcome and will be modified according to how securely all bullet points are displayed at that band.
- Marks will be awarded towards the top or bottom of that band depending on how they have evidenced each of the descriptor bullet points.

Assessment focus 1	Band 0	Band 1	Band 2	Band 3	Band 4
Understanding research methods, validity, and reliability of results of research	0	1-4	5-8	9-12	13-15
	Level of response not worthy of credit.	<ul style="list-style-type: none"> <li>Basic description of research methods referred to in the article, with some reference to data usage/extraction.</li> <li>Conclusions may be offered but are not supported.</li> </ul>	<ul style="list-style-type: none"> <li>Research methods referred to in the article are described, demonstrating a basic understanding of data usage; response may include unsupported evaluative judgements on suitability.</li> <li>Conclusions on suitability of research methods are offered but not always supported and demonstrate a grasp of the concept in the context of the methods used.</li> </ul>	<ul style="list-style-type: none"> <li>Research methods referred to in the article are explained, demonstrating an understanding of data usage; response likely to include some supported evaluative judgements on suitability.</li> <li>Conclusions on suitability of research methods are offered and supported, demonstrating understanding of the concept in the context of the methods used.</li> </ul>	<ul style="list-style-type: none"> <li>Research methods referred to in the article are explained, demonstrating a thorough understanding of data usage; response includes fully supported evaluative judgements on suitability.</li> <li>Conclusions on suitability of research methods are offered and fully supported, demonstrating a thorough understanding of the concept in the context of the methods used.</li> </ul>
