Questions 1 to 5 are based on the following document.

Snoring

What is snoring?

Snoring happens when a person's throat muscles relax during sleep. The person then tries to breathe through too small an opening in the back of the throat. This causes the soft mouth tissues to quiver and make a snoring noise.

Who snores?

One survey showed that fewer women snore than men. Only 28% of the women questioned were regular snorers compared with 44% of the men. 20% of children snored occasionally, whilst 10% snored every night.

Causes

The level of snoring can be made worse by excess weight, alcohol intake and smoking. The use of sleeping pills or sleeping on your back can also lead to snoring.

Solutions

Lifestyle changes such as losing weight, taking more exercise, stopping smoking and avoiding alcohol can help stop snoring. Raising your head with pillows may also help. If all else fails, try becoming an astronaut. Astronauts rarely snore while they are in space. This is because at zero gravity the throat muscles are less likely to collapse!

- 1 According to the document, what percentage of the children surveyed sometimes snored?
 - A 44%
 - B 28%
 - C 20%
 - D 10%

- 2 The document suggests that a person can help to stop snoring by
 - A losing surplus weight
 - B sleeping without a pillow
 - C taking sleeping tablets
 - D sleeping on one's back

- 3 The word 'rarely' used in the last paragraph could **best** be replaced by
 - A never
 - B always
 - C often
 - D seldom

- 4 According to the document, which of the following statements is true?
 - A Snoring is caused by the quivering of tissues in the nose
 - B Snoring happens when throat muscles tighten in sleep
 - C Men are more likely to snore than women
 - D Zero gravity causes the throat muscles to collapse

- 5 The information 'Older people snore more than young people' could be added to the paragraph headed
 - A What is snoring?
 - B Who snores?
 - C Causes
 - D Solutions

Questions 11 to 15 are based on the following document.

BUZZ OFF!

Bees and wasps usually sting only if they are upset, so you are more likely to be stung if you scream and try to swat them. They are attracted by perfume or body lotion, hairsprays, dark colours and vivid patterns.

Only female bees can sting. They sting only once because they leave their sting behind in the skin. Wasps do not do this and so all wasps can sting a number of times.

Ice can be used to relieve the pain of wasp and bee stings. If you are stung by a bee, flick away the sting but be careful not to squeeze as this will cause the poison to spread under the skin. Instead, gently scrape it out with your fingernail or a credit card. A paste of baking soda can be used to relieve the itching from a bee sting.

If you are stung in the mouth or nose you need to seek medical help because any swelling may block the airways and cause breathing problems. It is also advisable to seek help if you feel faint or vomit as these symptoms could indicate an allergic reaction to the sting and avoid any kind of heat, such as a hot bath, as this could make the reaction worse.

- 11 What advice could be given to avoid attracting the attention of wasps?
- A Wear white clothing
 - B Dress in vivid patterns
 - C Apply a body lotion
 - D Use a scented soap
- 12 To ease the pain of any wasp sting a person should
- A squeeze the sting to eject the poison
 - B cover the affected area with ice
 - C relax in a hot bath
 - D seek medical attention straight away
- 13 According to the document, the **best** course of action to prevent being stung by a wasp is to
- A spray it with hair spray
 - B attempt to wave it away
 - C keep still and try to ignore it
 - D frighten it away by screaming
- 14 The information 'Wasp stings can be relieved using vinegar' could **best** be added after
- A 'vivid patterns' (paragraph 1)
 - B 'of times' (paragraph 2)
 - C 'bee sting' (paragraph 3)
 - D 'reaction worse' (paragraph 4)
- 15 According to the document, which of the following statements about wasps is true?
- A Male wasps cannot sting
 - B Wasps leave their sting behind in the skin
 - C A paste of baking powder relieves wasp stings
 - D Wasps can sting more than once

Questions 26 to 30 are based on the following document.

ARE YOU BEING BUGGED?

Computer viruses are programmes *deliberately* designed to interfere with the operation of a computer.

Some viruses damage computers by deleting information or preventing programmes from running. Others are not as harmful. All the Ping Pong virus did was to cause a ball to appear and start bouncing all over the screen.

So-called 'trigger' viruses can remain inactive on your computer until a specified time. For example, the Friday the 13th virus would operate only on that date.

Certain viruses actually persuade users to download them by appearing as a game or something free. These viruses are known as Trojans (after the Trojan horse used in the famous war between the Trojans and the Greeks). These can destroy files or capture private information from your hard disc.

Other viruses, called worms, can make copies of themselves. They then search the hard disc for e-mail addresses and send themselves to all of these.

A survey suggests that more than half of all computers in Britain have been infected with a virus. The survey said that one in twenty people did not know if they had any anti-virus protection on their computers.

- 26 A feature of a Trojan virus is that it
- A can send itself automatically to other computers
 - B was first used in a war against the Greeks
 - C can steal information from computers
 - D is less harmful than other types of virus
- 27 According to the document, which type of virus works through e-mail?
- A Trigger viruses
 - B Worms
 - C Trojan horses
 - D The Ping Pong virus
- 28 The word '*deliberately*' in the first line of the document could be replaced with
- A effectively
 - B intentionally
 - C expertly
 - D annoyingly
- 29 According to the document, which of the following statements is true?
- A Viruses can be unknowingly downloaded from the internet
 - B Any computer virus will result in files being lost or stolen
 - C Only one in twenty people in Britain uses anti-virus protection
 - D Computers are most at risk on Friday the thirteenth
- 30 The document could **best** be described as
- A a memo about computer bugs being detected
 - B notes on how to recognise different types of computer virus
 - C a magazine article about computer viruses
 - D a report on how to stop your computer being affected by viruses

Questions 31 to 35 are based on the following draft document.

BIN IT!	line 1
NOTICE TO ALL USERS	line 2
Once again there have been complaints about the mess left in the hall. After	line 3
the drama practices on Friday evenings. Despite the provision of extra litter	line 4
bins, the problem seems to have got worse.	line 5
It was particularly awkward last Saturday when unfortunately the cleaner was	line 6
late. A group of visitors arrived to see the new lighting equipment. The	line 7
floor is littered with apple cores, crisp packets, chocolate wrappers and	line 8
empty drink cans. This created a very bad impression.	line 9
Unless there is a definite improvement, there is a real possibility that we may	line 10
lose the use of the hall. Please use the litter bins provided or take your	line 11
rubbish home with you.	line 12
