## BUSINESS MATHEMATICS

(Three hours)
Answer Question 1 from Part I and six questions from Part II, choosing either (i) or (ii) from each question.
All working ,including rough work, should be done on the same sheet as, and adjacent to, the rest of the answer.
The intended marks for questions or parts of questioOns are given in brackets []

## Mathematical tables and square paper are provided. Slide rule, may be used.

## PART I

Answer all questions

## Answer all questions

## Question : 1

i) Evaluate $\tan ^{-1} \frac{1}{2}+\tan ^{-1} \frac{1}{3}$
ii) If $\mathrm{y}=\gamma=\chi^{\chi}$, find $\frac{d y}{d x}$
iii) Evaluate $\int\left(\frac{x^{5}+x^{2}}{x^{4}}\right) d x$
iv) Miss Dechen buys a dozen eggs of which 2 turn out to be bad. She chooses 4 eggs to scramble for breakfast. Find the chance that she chooses 3 good and 1 bad.
v) If the list price of a commodity is Nu .800 , find the net price of the commodity after having discounted successively by $20 \%$ and $10 \%$.
vi) How many different words, each containing 2 vowels and 3 consonants can be formed with 5 vowels and 17 consonants?
vii) Find the term independent of x in the expansion of $\left(\frac{3}{2} \times 2-\frac{1}{3 x}\right)^{9}$
viii) Evaluate by using L-Hospital's rule

$$
x \xrightarrow{\text { lt }} 0 \frac{3 \sin x-3 x-x^{3}}{x^{2}}
$$

ix) If $y=\cos (\log x)$, find $\frac{d^{2} y}{d x^{2}}$
x) Find the equation of the parabola whose focus is $(2,3)$ and directrix is $x-4 y+3=0$
xi) The arithmetic mean of the marks scored by Dorji Tshering, Sangay Tenzin and Dechen Dolkar are in the series 50, 48 and 12 respectively. The standard deviation of their mark are 15,12 and 2 respectively. Who is the most consistent of the three ?
xii) Two dice are thrown. Find the probability of getting an odd number on the first dice and a multiple of 3 on the other.
xiii) Solve using Cramer's rule
$7 x+2 y-25=0 ; 2 x-y-4=0$
xiv) The T.D and B.G on a certain bill of exchange due after a certain time are respectively Rs. 800 and Rs. 25. Find the face value of the bill.
xv ) The average due date of 4 bills was $10^{\text {th }}$ June. Three of the bills were payable as follows :

Nu. 418 on $29^{\text {th }}$ April
Nu. 551 on $3^{\text {rd }}$ June
Nu. 1007 on $8^{\text {th }}$ July
The $4^{\text {th }}$ bill was for Nu .323.
On what date was it due?

## PART - II (60 marks)

## Answer either (i) or (ii) from each question

Question : 2 (i)
a) In how many ways can letters of the word KHALING be arranged, so that the vowels are always together?
b) Find the cube root of 1001 correct to four places of decimals.
c) Compute $\mathrm{A}^{-1}$ for the matrix, $\mathrm{A}=\left[\begin{array}{ccc}1 & 1 & 1 \\ 2 & -1 & 3 \\ 3 & 2 & -1\end{array}\right]$

## OR

Question : 2 (ii)
a) If $A=\left[\begin{array}{rr}1 & -2 \\ 3 & 4\end{array}\right]$, show that $A(\operatorname{adj} A)=|A| x$ I
b) Using properties of determinants, prove that

$$
\left|\begin{array}{lll}
a-b-c & 2 b & 2 c  \tag{4}\\
2 a & b-c-a & 2 c \\
2 a & 2 b & c-a-b
\end{array}\right|=(a+b+c)^{3}
$$

c) Find the number of combinations of four letters taken from the word "EXAMINATION"

Question : 3 (i)
Prove that: $\operatorname{Cot}^{-1} \frac{p q+1}{p-q}+\operatorname{Cot}^{-1} \frac{q r+1}{q-r}+\operatorname{Cot}^{-1} \frac{r p+1}{r-p}=0$

Question : 3 (ii)

$$
\text { Prove that } \operatorname{Sin}^{-1} \sqrt{\frac{3}{2}}+2 \tan ^{-1} \frac{1}{\sqrt{3}}=\frac{2 \pi}{3}
$$

Question : 4 (i)
a) Evaluate the following integral as limit of sums.

$$
\begin{equation*}
\int_{1}^{2} x d x \tag{3}
\end{equation*}
$$

b) Find the dimensions of the rectangle of area $81 \mathrm{sq} . \mathrm{cm}$ whose perimeter is the least. Find also its perimeter.
c) Solve : $\frac{d y}{d x}+y \cdot \cot x=1$
d) Find the area of the region common to the curves $y^{2}=2 x$ and $x^{2}=2 y$. If the common region is rotated through four right angles about the x -axis, calculate the volume of the solid of revolution so formed.[5]

## OR

Question : 4 (ii)
a) Integrate : $\int \frac{x-2}{(x-3)(x-4)} d x$
b) Verify Rolle's theorem for the following function.

$$
\begin{equation*}
f(x)=e^{x} \cos x, x \mathrm{E}\left[{ }^{-} \pi / 2, \quad \pi / 2\right] \tag{4}
\end{equation*}
$$

c) Solve: $(2 x+y) d y=(x-2 y) d x$
d) Find the radius of the closed right circular cylindrical can which encloses a given volume of 100 cm 3 and has the minimum surface area.

Question : 5 (i)
a) Find the equation of the ellipse whose foci are $(4,0)$ and ( ${ }^{-} 4,0$ ) and the eccentricity is $\frac{1}{3}$.
b) Find the foci and the length of latus rectum of the hyperbola $9 x^{2}-16 y^{2}=$ 144.

## OR

Question : 5 (ii)
a) If the parabola $y^{2}=4 a x$ passes through the point (3, -2 ), find the coordinates of the focus and the equation of directrix.
b) Taking the axes of a hyperbola as coordinate axes, find the equation of a hyperbola whose transverse and conjugate axes are respectively 10 and 8.

Question : 6 (i)
a) Equations of two regression lives are $4 x+3 y+7=0$ and $3 x+4 y+8=0$. Find both the regression coefficients.
b) Find Karl Pearson's coefficient of correlation between X and Y from the following data :

| X | $:$ | 17 | 19 | 22 | 21 | 23 | 27 | 28 | 16 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Y | $:$ | 23 | 26 | 24 | 27 | 26 | 31 | 34 | 15 |

c) Taking 1975 as the base year, calculate an index number for 1979, based on weighted average of price relatives derived from the table given below.

| Commodities | A | B | C | D |
| :--- | :---: | :---: | :---: | :---: |
| Weight | 30 | 15 | 25 | 30 |
| Price per unit in 1975 | 20 | 10 | 5 | 40 |
| Price per unit in 1979 | 24 | 20 | 30 | 40 |

## Question : 6 (ii)

a) Calculate five yearly moving averages of number of students studying in a commercial college from the following figures :
[3]

| Year | 1981 | 1982 | 1983 | 1984 | 1985 | 1986 | 1987 | 1988 | 1989 | 1990 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of <br> students | 332 | 317 | 357 | 392 | 402 | 405 | 410 | 427 | 405 | 438 |

b) The marks obtained by the students in Geography \& in Economics are as follows:

| Marks in <br> Geography | 35 | 10 | 47 | 17 | 10 | 10 | 9 | 6 | 28 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Marks in <br> Economics | 30 | 33 | 45 | 8 | 8 | 49 | 12 | 4 | 31 |

Calculate spearman's coefficient of rank correlation.
c) A problem in Accounts is given to 3 students A, B \& C. their chances of solving it are $\frac{1}{2}, \frac{1}{3}, \frac{1}{4}$ respectively. What is the probability that the problem will be solved ?

Question : 7 (i)
a) A ship worth $\mathrm{Nu} .20,00,000$ is wrecked $\frac{1}{5}$ th belonged to A, $\frac{1}{4}$ th belonged to B and the rest to C. Find what loss each of them sustain if the ship is insured to the extent of $\frac{4}{5} t h$ its value
b) A limited company intends to create a depreciation fund to replace at the end of the $20^{\text {th }}$ year assets costing Rs, $2,00,000$. Calculate the amount to be retained out of profits every year if the interest rate is $3 \%$.
c) A bill of exchange drawn on 5-3-2005 at 5 months was discounted on 27-$6-2005$. If the banker's discount at $3 \%$ be Rs. 603.60 , find the face value of the bill and also B.G.

## OR

Question : 7 (ii)
a) A sum of Nu .3524 is borrowed from a money lender at $6 \%$ per annum compounded annually. If this amount is to be paid back in 4 equal annual installments, find the annual installments.
b) A firm produces $x$ units of output at a total cost of Nu. $300 x-10 x^{2}+\frac{1}{3} x^{3}$ Find the out put at which the marginal cost and the average cost attain their respective minima.
c) A building is insurred for $\frac{3}{4}$ th of it's value of $\mathrm{Nu} .1,00,000$ at $6 \%$ premium plus policy tax $\frac{1}{2} \%$. In an accidental fire, $70 \%$ of the building is fully destroyed and the remaining portion is reduced to $20 \%$ of its value. Find the total premium and the claim amount.
