## Financial Management Pillar Managerial Level Paper <br> P8 - Financial Analysis

## 20 November 2007 - Tuesday Afternoon Session

## Instructions to candidates

| You are allowed three hours to answer this question paper. |
| :--- |
| You are allowed 20 minutes reading time before the examination begins <br> during which you should read the question paper and, if you wish, highlight <br> and/or make notes on the question paper. However, you will not be allowed, <br> under any circumstances, to open the answer book and start writing or use <br> your calculator during this reading time. |
| You are strongly advised to carefully read ALL the question requirements <br> before attempting the question concerned (that is all parts and/or sub- <br> questions). The question requirements for questions in Sections B and C are <br> highlighted in a dotted box. |

ALL answers must be written in the answer book. Answers written on the question paper will not be submitted for marking.

Answer the ONE compulsory question in Section A. This has eight objective test questions on pages 2 to 4.

Answer ALL THREE questions in Section B on pages 6 to 7 .
Answer TWO of the three questions in Section $C$ on pages 8 to 13 .
Maths Tables are provided on pages 15 to 17. These are detachable for ease of reference.

The list of verbs as published in the syllabus is given for reference on the inside back cover of this question paper.

Write your candidate number, the paper number and examination subject title in the spaces provided on the front of the answer book. Also write your contact ID and name in the space provided in the right hand margin and seal to close.

Tick the appropriate boxes on the front of the answer book to indicate which questions you have answered.

[indicative time for answering this Section is 36 minutes]
ANSWER ALL EIGHT SUB-QUESTIONS

## Instructions for answering Section A:

The answers to the eight sub-questions in Section A should ALL be written in your answer book.

Your answers should be clearly numbered with the sub-question number and then ruled off, so that the markers know which sub-question you are answering. For multiple choice questions, you need only write the sub-question number and the letter of the answer option you have chosen. You do not need to start a new page for each sub-question.

For sub-questions 1.3 and 1.6, you should show your workings as marks are available for method for these sub-questions.

## Question One

1.1 GPT regularly sells goods to its subsidiary in which it owns $60 \%$ of the ordinary share capital. During the group's financial year ended 31 August 2007, GPT sold goods to its subsidiary valued at $\$ 100,000$ (selling price) upon which it makes a margin of $20 \%$. By the group's year end all of the goods had been sold to parties outside the group.

What is the correct consolidation adjustment in respect of these sales for the year ended 31 August 2007?

A No adjustment required.
B DR Revenue $\$ 60,000$; CR Cost of sales $\$ 60,000$.
C DR Revenue $\$ 80,000$; CR Cost of sales $\$ 80,000$.
D DR Revenue $\$ 100,000 ; \quad$ CR Cost of sales $\$ 100,000$.
1.2 Which ONE of the following is a valid reason for excluding a subsidiary from consolidation under current International Financial Reporting Standards?

A The subsidiary has been acquired exclusively with a view to its subsequent disposal.
B The activities of the subsidiary are so dissimilar from those of the rest of the group that it would be misleading to include it in the consolidation.
C A formally documented decision has been made by the directors to wind down the activities of the subsidiary.

D The subsidiary operates in a hyper-inflationary environment.
1.3 On 31 July 2007, AGR acquired $80 \%$ of the ordinary share capital of its subsidiary BLK. The book value of BLK's net assets at the date of acquisition was $\$ 1,300,000$. This value included $\$ 300,000$ in respect of certain specialised items of plant, which were bought on 31 July 2004. The plant is being depreciated on a straight line basis over six years with an assumption of nil residual value. No estimate of market value at the date of acquisition is available, but it would cost $\$ 700,000$ to replace the plant at current prices.

Since 2005, BLK has been developing a specialised industrial process. Following registration of the patent and some coverage in the trade press, BLK received an offer for the patent of $\$ 150,000$ in April 2007. The offer was rejected. BLK does not recognise the patent as an asset. AGR's directors think it probable that other processes developed by BLK have a market value, and they have made a broad estimate of $\$ 75,000$ to cover such items which have not been capitalised by BLK.

Shortly before the acquisition of BLK took place, its directors had started a programme to rationalise production. The estimated cost of the programme was $\$ 250,000$, but no provision for it was recognised in the entity's financial statements at 31 July 2007. The programme has continued and is now (November 2007) substantially complete.

Calculate the fair value of BLK's net assets that would be included in the consolidated balance sheet of AGR at 31 July 2007, assuming that there are no relevant issues other than those given above. If appropriate, explain your reasons for excluding any of the possible adjustments to fair value.
(4 marks)
1.4 LPD buys goods from its 75\% owned subsidiary QPR. QPR earns a mark-up of $25 \%$ on such transactions. At the group's year end, 30 June 2007, LPD had not yet taken delivery of goods, at a sales value of $\$ 100,000$, which were despatched by QPR on 29 June 2007.

At what amount would the goods in transit appear in the consolidated balance sheet of the LPD group at 30 June 2007?

A \$60,000
B $\quad \$ 75,000$
C $\$ 80,000$
D $\$ 100,000$
(2 marks)
1.5 The initial measurement of financial liabilities should be at fair value. Explain the general valuation rule in IAS 39 Financial Instruments: Recognition and Measurement that should be applied to the subsequent measurement of financial liabilities, other than those specifically mentioned as exceptions.
(2 marks)
1.6 On 1 September 2006, BLT held 60\% of the ordinary share capital of its only subsidiary CMU. The consolidated equity of the group at that date was $\$ 576,600$, of which $\$ 127,000$ was attributable to the minority interest.

On 28 February 2007, exactly halfway through the financial year, BLT bought a further $20 \%$ of the ordinary share capital of CMU. In the year ended 31 August 2007 BLT's profits for the period were $\$ 98,970$ and CMU's were $\$ 30,000$. BLT paid a dividend of $\$ 40,000$ on 1 July 2007. There were no other movements in equity. It can be assumed that profits accrue evenly throughout the year.

Prepare a consolidated statement of changes in equity for the BLT group for the year ended 31 August 2007.
1.7 STB is preparing its consolidated cash flow statement for the year ended 31 October 2007. Its consolidated opening balance at net book value for property, plant and equipment was $\$ 207,000$. During the year the STB group disposed of plant for proceeds of $\$ 8,500$ that had cost $\$ 62,000$ several years ago and which was fully written down at 1 November 2006. There were no other disposals. The depreciation charge for the year ended 31 October 2007 was $\$ 32,000$. The consolidated closing book value for property, plant and equipment was $\$ 228,000$.

What was the cash outflow in respect of purchases of property, plant and equipment for inclusion in the consolidated cash flow statement of STB group for the year ended 31 October 2007?

A $\$ 11,000$
B $\$ 44,500$
C $\$ 53,000$
D $\$ 115,000$
1.8 Identify TWO conditions which must exist in order for hedge accounting to be permitted under IAS 39 Financial Instruments: Recognition and Measurement.
(2 marks)
(Total for Question One = 20 marks)

## Reminder

All answers to Section A must be written in your answer book.
Answers to Section A written on the question paper will not be submitted for marking.

End of Section A

Section B starts on Page 6

## SECTION B - 30 MARKS

[indicative time for answering this Section is 54 minutes]

## ANSWER ALL THREE QUESTIONS

## Question Two

Earnings per share (EPS) is generally regarded as a key accounting ratio for use by investors and others. Like all accounting ratios, however, it has its limitations. You have been asked to make a brief presentation to CIMA students on the topic.

## Required:

(a) Explain why EPS is regarded as so important that the IASB has issued an accounting standard on its calculation;
(b) Explain the general limitations of the EPS accounting ratio and its specific limitations for investors who are comparing the performance of different entities.

## Question Three

The following information relates to the defined benefits pension scheme of BGA, a listed entity:
The present value of the scheme obligations at 1 November 2006 was $\$ 18,360,000$, while the fair value of the scheme assets at that date was $\$ 17,770,000$. During the financial year ended 31 October 2007, a total of $\$ 997,000$ was paid into the scheme in contributions. Current service cost for the year was calculated at $\$ 1,655,000$, and actual benefits paid were $\$ 1,860,300$. The applicable interest cost for the year was $6.5 \%$ and the expected return on plan assets was $9.4 \%$.

The present value of the scheme obligations at 31 October 2007 was calculated as $\$ 18,655,500$, and the fair value of scheme assets at that date was $\$ 18,417,180$.

BGA adopts the "10\% corridor" criterion in IAS 19 Employee Benefits for determining the extent of recognition of actuarial gains and losses. The average remaining service life of the employees was 10 years. Net unrecognised actuarial losses on 1 November 2006 were \$802,000.

## Required:

(a) Calculate the actuarial gain or loss on BGA's pension scheme assets and liabilities for the year ended 31 October 2007.
(8 marks)
(b) Calculate the extent to which, if at all, actuarial gains or losses should be recognised in BGA's income statement for the year ended 31 October 2007, using the " $10 \%$ corridor" criterion.
(2 marks)
(Total for Question Three $=10$ marks)

## Question Four

It is becoming increasingly common for listed entities to provide non-financial disclosures intended to inform stakeholders about the business's environmental policies, impacts and practices. Supporters of such voluntary disclosures argue that stakeholders have a right to be informed about environmental issues in this way. However, there are also arguments against this type of disclosure.

## Required:

Identify and explain the principal arguments against voluntary disclosures by businesses of their environmental policies, impacts and practices.
(Total for Question Four = 10 marks)
(Total for Section B = 30 marks)

End of Section B. Section C starts on page 8.

SECTION C - 50 MARKS
[indicative time for answering this Section is 90 minutes]
ANSWER TWO QUESTIONS OUT OF THREE

## Question Five

The directors of DPC, a listed entity, have been approached by three out of the five shareholders of PPS, an unlisted competitor. The PPS shareholders are nearing retirement age, and would like to realise their investment in the business. The two remaining shareholders do not object, but would like to retain between them at least a significant influence over the business.

The directors of DPC are currently concerned about the threat of a takeover bid for DPC itself. Although they would like to acquire an interest in PPS as it would help them to increase DPC's market share, they do not want to take any action that would adversely affect their financial statements and certain key accounting ratios (EPS, gearing [calculated as debt/equity], and noncurrent asset turnover).

There are two possibilities for consideration:

1. DPC could purchase $40 \%$ of the ordinary shares of PPS, giving it significant influence, but not control. The cost of this would be $\$ 3.5$ million, to be settled in cash. DPC would pay $\$ 1$ million out of its cash resources and would increase its existing long-term borrowings for the balance.
2. DPC could purchase $60 \%$ of the ordinary shares of PPS, giving it control. The cost of this would be $\$ 6$ million, to be settled in cash. DPC would pay $\$ 3$ million out of its cash resources, and would increase its existing long-term borrowings for the balance.

The purchase would take place on the first day of the new financial year, 1 January 2008. Projected summary income statements for the 2008 financial year, and projected summary balance sheets at 31 December 2008 are shown below. The DPC figures are consolidated to include its existing 100\% held subsidiaries (it currently holds no interests in associates). The projected financial statements for PPS are for that entity alone.

Summary projected income statements for the year ended 31 December 2008

|  | DPC consolidated Projected: 2008 | PPS entity Projected: 2008 |
| :---: | :---: | :---: |
|  | \$000 | \$000 |
| Revenue | 60,300 | 10,200 |
| All expenses including income tax | $(55,300)$ | $(9,500)$ |
| Profit for the period attributable to equity holders | 5,000 | 700 |

## Summary projected balance sheets at 31 December 2008

|  | DPC consolidated Projected: 2008 $\$ 000$ | PPS entity Projected: 2008 | Notes |
| :---: | :---: | :---: | :---: |
| Non-current assets | 50,400 | 9,800 | 2 |
| Current assets | 82,000 | 16,000 |  |
|  | 132,400 | 25,800 |  |
| Equity | 31,400 | 4,000 | 3 \& 4 |
| Long-term liabilities | 10,000 | 9,300 |  |
| Current liabilities | 91,000 | 12,500 |  |
|  | 132,400 | 25,800 |  |

## Notes:

1. DPC's consolidated projected financial statements at 31 December 2008 do not take into account the proposed acquisition of PPS.
2. DPC's non-current asset figure includes goodwill on acquisition of various subsidiaries.
3. PPS's equity comprises 100,000 ordinary shares of \$1 each, \$3,200,000 of retained earnings brought forward on 1 January 2008 and $\$ 700,000$ profit for the period.
4. DPC will have 10 million ordinary shares of $\$ 1$ each on 1 January 2008. No issues of shares will be made during 2008.

## Required:

(a) Prepare draft projected financial statements for the DPC group for the year ending 31 December 2008 under each of the following assumptions:
(i) DPC acquires 40\% of the ordinary shares of PPS on 1 January 2008;
(ii) DPC acquires 60\% of the ordinary shares of PPS on 1 January 2008.

It can be assumed that no impairment of either investment would have taken place by 31 December 2008.
(14 marks)
(b) Calculate EPS, gearing and non-current asset turnover ratios based on the draft projected 31 December 2008 financial statements for:
(i) DPC and its existing subsidiaries;
(ii) DPC including the acquisition of an associate interest in PPS;
(iii) DPC including the acquisition of a subsidiary interest in PPS.
(c) Discuss the differences in the accounting ratios under the different scenarios, identifying reasons for the most significant differences.
(5 marks)
(Total for Question Five = 25 marks)

## Question Six

AX, a listed entity, is planning to acquire several smaller entities. In order to raise the cash for its programme of acquisitions, it has recently sold part of its stake in a subsidiary, CY, and has raised $\$ 10$ million in a bond issue.

Summarised balance sheets for AX, CY and the other member of the group, EZ, at 31 October 2007 are given below:

|  | $\begin{gathered} A X \\ \$ 000 \end{gathered}$ | $\begin{aligned} & C Y \\ & \$ 000 \end{aligned}$ | $\begin{aligned} & E Z \\ & \$ 000 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| ASSETS |  |  |  |
| Non-current assets: |  |  |  |
| Property, plant and equipment | 20,000 | 8,900 | 5,000 |
| Investment in subsidiaries (notes 1 \& 2) | 15,500 | - | - |
|  | 35,500 | 8,900 | 5,000 |
| Current assets | 34,500 | 9,500 | 4,700 |
|  | 70,000 | 18,400 | 9,700 |
| EQUITY AND LIABILITIES |  |  |  |
| Equity: |  |  |  |
| Called up share capital (\$1 shares) | 20,000 | 4,000 | 3,000 |
| Retained earnings | 18,000 | 7,000 | 3,000 |
|  | 38,000 | 11,000 | 6,000 |
| Non-current liabilities | - | 2,400 | 1,000 |
| Current liabilities | 18,000 | 5,000 | 2,700 |
| Suspense account (notes 1 \& 3) | 14,000 | - | - |
|  | 70,000 | 18,400 | 9,700 |

## Notes:

1. The investment in $80 \%$ of CY's ordinary share capital was purchased several years ago for $\$ 8$ million when CY's retained earnings were $\$ 3.5$ million. There has been no change since then in the amount of CY's share capital, and goodwill has remained unimpaired. No adjustments to fair value of CY's net assets were made either at acquisition or subsequently.

On 31 October 2007 AX sold one quarter of its shareholding in CY to an unconnected party for $\$ 4$ million. This amount has been debited to cash and credited to the suspense account. It is estimated that a tax liability of $\$ 400,000$ will arise in respect of the profit on disposal of the investment; no provision for this liability has been made in the balance sheet above.
2. The investment in 100\% of EZ's ordinary share capital was purchased on 30 April 2005 for $\$ 7.5$ million when EZ's retained earnings were $\$ 1.5$ million. Goodwill has remained unimpaired since the date of acquisition.

Upon acquisition a revaluation exercise was carried out. Plant and equipment in EZ with a book value of $\$ 1$ million was revalued to $\$ 1.5$ million. There were no other adjustments in respect of fair value. The revaluation is treated as a consolidation adjustment only: EZ continues to recognise non-current assets at depreciated historic cost. The remaining useful life of the plant and equipment at 30 April 2005 was estimated to be five years, of which thirty months had elapsed by 31 October 2007.
3. $A X$ issued $\$ 10$ million of $5 \%$ convertible bonds on 31 October 2007. The bonds were issued in units of $\$ 1,000$ and are repayable on 31 October 2010. However, each bond is convertible into 250 ordinary shares at any time until maturity at the option of the bondholder. The market rate for similar, non-convertible, bonds is $7 \%$. It can be assumed that there were no issue costs. The $\$ 10$ million raised by the issue was debited to cash and credited to the suspense account.

## Required:

(a) Explain the appropriate accounting treatment to record the issue of convertible bonds, discussing the reasons for the approach that is adopted by International Financial Reporting Standards for this type of financial instrument.
(b) Prepare the consolidated balance sheet for the AX group at 31 October 2007.
(20 marks)
(Total for Question Six = 25 marks)

Section C continues on the next page

## Question Seven

DAS, a listed entity, is engaged in house-building activities. It was listed a little over two years ago and it prepares its financial statements in compliance with International Financial Reporting Standards.

A business associate of yours is thinking about applying for a job as human resource manager at DAS. The job advertisement promises a "great future in a rapidly expanding business". She was made redundant when her last employer went into liquidation, and she is looking for a new role with a more stable and prosperous employer. She has obtained DAS's recently published financial statements for the year ended 31 August 2007 and would like your advice on the entity's prospects for the future.

DAS provides several potentially useful voluntary disclosures about the nature of its business and its current work in progress. In the year ended 31 August 2006 DAS sold 1,080 new houses. During the financial year ended 31 August 2007, a major part of the entity's efforts were directed towards the development for housing on the site of a former hospital. This was DAS's largest project to date. By the year end most of the houses on site were nearly complete, and a few were ready for sale. The site contains 225 houses, which are expected to sell for between $\$ 425,000$ and $\$ 600,000$ each. DAS's directors consider that the development scheme has been successful; by the year end 100 of the available houses had been reserved by buyers who paid a $10 \%$ deposit. None of the hospital site house transactions had been completed by 31 August 2007, although the Chief Executive's report noted that there were several completions during September and October 2007. DAS sold 675 other houses during the year ended 31 August 2007.

DAS's balance sheet at 31 August 2007 and an income statement for the year then ended, together with comparatives, follow:

DAS: Balance sheet at 31 August 2007
\$ million $\quad \stackrel{2007}{\$ \text { million } \quad \$ \text { million } \quad \$ \text { million }}$

ASSETS
Non-current assets:
$\begin{array}{lll}\text { Property, plant and equipment } & 9.3 & 9.8\end{array}$
Current assets:

| Inventories | 270.5 |  | 275.0 |  |
| :--- | ---: | ---: | ---: | ---: |
| Trade and other receivables | 3.2 |  | 3.7 |  |
| Cash | - | $\underline{2.8}$ |  |  |
|  |  | $\underline{273.7}$ | $\underline{281.5}$ | $\underline{291.3}$ |

## EQUITY AND LIABILITIES

Equity

| Called up share capital (\$1 shares) | 8.2 |  | 8.2 |  |
| :--- | ---: | ---: | ---: | ---: |
| Other reserves | 16.3 |  | $16 \cdot 3$ |  |
| Retained earnings | $\underline{61.9}$ |  | $\underline{54.7}$ |  |
|  |  | 86.4 |  | 79.2 |
| Non-current liabilities: |  | 114.7 |  | 112.0 |
| Long-term borrowings |  |  |  |  |
| Current liabilities: | 52.6 |  | 75.4 |  |
| Loans and borrowings | $\underline{29.3}$ |  | $\underline{24.7}$ | $\underline{100.1}$ |
| Trade and other payables |  | $\underline{81.9}$ | $\underline{291.3}$ |  |

DAS: Income statement for the year ended 31 August 2007

|  | 2007 | 2006 |
| :---: | :---: | :---: |
|  | \$ million | \$ million |
| Revenue | 157.9 | 243.0 |
| Cost of sales | (126.5) | (192.7) |
| Gross profit | 31.4 | $50 \cdot 3$ |
| Expenses | (9.2) | (8.6) |
| Finance costs | (12.2) | (13.4) |
| Profit before tax | 10.0 | 28.3 |
| Income tax expense | (2.8) | (8.9) |
| Profit for the period | $7 \cdot 2$ | $19 \cdot 4$ |

## Notes:

1. DAS's policy is to recognise revenue from the sale of houses upon legal completion of the transaction.
2. Most of the house-building work is undertaken by sub-contractors; DAS retains only a small direct labour force. Payments to sub-contractors are included as part of property under construction in inventories until such time as the houses are sold.
3. Inventories comprise the following:

|  | 2007 | 2006 |
| :--- | ---: | ---: |
|  | $\$$ million | $\$$ million |
| Land held for development | $130 \cdot 0$ | $210 \cdot 0$ |
| Property under construction | $\underline{140 \cdot 5}$ | $\underline{\underline{65 \cdot 0}}$ |
|  | $\underline{270 \cdot 5}$ | $\underline{275 \cdot 0}$ |

4. The statement of changes in equity (not given above) shows that no dividend was paid in the period of a little over two years since DAS was listed.
5. Deposits paid by buyers are included in trade and other payables.
6. Economic conditions are generally buoyant and house prices during 2006 and 2007 have risen at a rate significantly in excess of the general rate of inflation. Bank interest rates in respect of low risk lending have been running at between $5 \%$ and $6 \%$ throughout the two year period covered by the financial statements shown above.

## Required:

Write a report to your business associate that analyses and interprets the information given above. The report should explain the extent to which DAS can be considered to meet her requirements for a "stable and prosperous" employer.

Up to eight marks are available for the calculation and explanation of relevant accounting ratios.
(Total for Question Seven = 25 marks)
(Total for Section C = 50 marks)

## End of Question Paper

Maths Tables and Formulae are on pages 15-17

This page is blank

## MATHS TABLES AND FORMULAE

## Present value table

Present value of $\$ 1$, that is $(1+r)^{-n}$ where $r=$ interest rate; $n=$ number of periods until payment or receipt.

| Periods | Interest rates $(r)$ |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $(n)$ | $1 \%$ | $2 \%$ | $3 \%$ | $4 \%$ | $5 \%$ | $6 \%$ | $7 \%$ | $8 \%$ | $9 \%$ | $10 \%$ |  |
| 1 | 0.990 | 0.980 | 0.971 | 0.962 | 0.952 | 0.943 | 0.935 | 0.926 | 0.917 | 0.909 |  |
| 2 | 0.980 | 0.961 | 0.943 | 0.925 | 0.907 | 0.890 | 0.873 | 0.857 | 0.842 | 0.826 |  |
| 3 | 0.971 | 0.942 | 0.915 | 0.889 | 0.864 | 0.840 | 0.816 | 0.794 | 0.772 | 0.751 |  |
| 4 | 0.961 | 0.924 | 0.888 | 0.855 | 0.823 | 0.792 | 0.763 | 0.735 | 0.708 | 0.683 |  |
| 5 | 0.951 | 0.906 | 0.863 | 0.822 | 0.784 | 0.747 | 0.713 | 0.681 | 0.650 | 0.621 |  |

## FORMULAE

## Annuity

Present value of an annuity of \$1 per annum receivable or payable for $n$ years, commencing in one year, discounted at $r \%$ per annum:

$$
\mathrm{PV}=\frac{1}{r}\left[1-\frac{1}{[1+r]^{n}}\right]
$$

## Perpetuity

Present value of \$1 per annum receivable or payable in perpetuity, commencing in one year, discounted at $r \%$ per annum:

$$
\mathrm{PV}=\frac{1}{r}
$$

## Growing Perpetuity

Present value of \$1 per annum, receivable or payable, commencing in one year, growing in perpetuity at a constant rate of $g \%$ per annum, discounted at $r \%$ per annum:

$$
\mathrm{PV}=\frac{1}{r-g}
$$

## LIST OF VERBS USED IN THE QUESTION REQUIREMENTS

A list of the learning objectives and verbs that appear in the syllabus and in the question requirements for each question in this paper.

It is important that you answer the question according to the definition of the verb.

| LEARNING OBJECTIVE | VERBS USED | DEFINITION |
| :---: | :---: | :---: |
| 1 KNOWLEDGE |  |  |
| What you are expected to know. | List | Make a list of |
|  | State | Express, fully or clearly, the details of/facts of |
|  | Define | Give the exact meaning of |
| 2 COMPREHENSION |  |  |
| What you are expected to understand. | Describe | Communicate the key features |
|  | Distinguish | Highlight the differences between |
|  | Explain | Make clear or intelligible/State the meaning of |
|  | Identify | Recognise, establish or select after consideration |
|  | Illustrate | Use an example to describe or explain something |
| 3 APPLICATION |  |  |
| How you are expected to apply your knowledge. | Apply | To put to practical use |
|  | Calculate/compute | To ascertain or reckon mathematically |
|  | Demonstrate | To prove with certainty or to exhibit by practical means |
|  | Prepare | To make or get ready for use |
|  | Reconcile | To make or prove consistent/compatible |
|  | Solve | Find an answer to |
|  | Tabulate | Arrange in a table |
| 4 ANALYSIS |  |  |
| How are you expected to analyse the detail of what you have learned. | Analyse | Examine in detail the structure of |
|  | Categorise | Place into a defined class or division |
|  | Compare and contrast | Show the similarities and/or differences between |
|  | Construct | To build up or compile |
|  | Discuss | To examine in detail by argument |
|  | Interpret | To translate into intelligible or familiar terms |
|  | Produce | To create or bring into existence |
| 5 EVALUATION |  |  |
| How are you expected to use your learning to evaluate, make decisions or recommendations. | Advise | To counsel, inform or notify |
|  | Evaluate | To appraise or assess the value of |
|  | Recommend | To advise on a course of action |
