

Monday 16 January 2023 – Morning

Level 3 Cambridge Technical in IT

05839/05840/05841/05842/05877 Unit 3: Cyber security

Time allowed: 1 hour

C384/2301

You must have:

• a clean copy of the Pre-release (inside this document)

Please write clea	arly in black ink. Do not write in the barcodes.
Centre number Candidate number	
First name(s)	
Last name	
Date of birth	D D M M Y Y Y

INSTRUCTIONS

- Use black ink.
- Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.
- · Answer all the questions.
- Use the Insert to answer Questions 1 and 2.

INFORMATION

- The total mark for this paper is 60.
- The marks for each question are shown in brackets [].
- Quality of extended response will be assessed in questions marked with an asterisk (*).
- This document has 12 pages.

ADVICE

Read each question carefully before you start your answer.

Section A

Answer **all** the questions.

1	(a)		has been told that she needs to protect the personal data submitted by the member network from both information disclosure and data modification.	oers
		Desc	cribe the difference between information disclosure and data modification.	
				· [-]
	(b)	One (Do S	of the types of security incident that Mia needs to be aware of, is denial of servi (3).	ce
		(i)	What does denial of service (DoS) mean?	
		(ii)	Identify two ways Mia can prevent a DoS attack.	
			1	
			2	
				[2]
		(iii)	Identify one other type of cyber security incident Mia would need to protect again	nst.
				1

(c)	Mia has been warned that she	e might receive emails fror	m scammers.
	Describe two motivations of a	ı scammer who sends ema	ails to Mia.
	1		
	2		
			[4]
(d)	There are different types of at	tacker who may target Mia	a and the data on her network.
	Draw a line to connect each ty	ype of attacker with their d	escription.
	One has been done for you.		
	Type of Attacker		Description
	Insider		An attacker who attempts to discover exploits and sells them
	Phisher		An attack on a network or

Insider

An attacker who attempts to discover exploits and sells them

An attack on a network or computer system by a person with authorised access

Hactivist

An attacker who tries to get individuals to reveal personal information by sending emails pretending to be from companies

Vulnerability Broker

An attack on a network or computer system to achieve social or political goals

(e)	One of the targets is the health data entered by members.
	Describe how a cyber criminal could use the health data they targeted.
	[2]
(f)*	gained access to the webserver.
	[10]

2	(a)*	Mia accesses the webserver remotely using an app on her mobile device. The data sent and received is encrypted .
		Evaluate the use of encryption as a method of securing the data sent between the app and the webserver.
		[7]

(b)	Describe how Mia could use device management to restrict access to the data stored on the webserver.
	[3]
(c)	Describe two other software-based cyber security controls Mia could use to protect the data on the webserver.

(iii) One of the sections of the **cyber security incident** report is responses needed.

	Identify two different groups of people who would need to be informed of the cyber security incident.
	For each group, explain why they would need to know.
	Group:
	Explanation:
	Group:
	Explanation:
	[6]
5	Describe how sandboxing can be used to test a program suspected of containing a virus.
	[4]

END OF QUESTION PAPER

ADDITIONAL ANSWER SPACE

If additional answer space is required, you should use the following lined pages. The question numbers must be clearly shown in the margins - for example, 1(f) or 2(a).

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material OCR will be happy to correct its mistake at the earliest possible opportunity.
