Seismic method

FEDERAL PUBLIC SERVICE COMMISSION FOR POSTS IN BS-17

GEOLOGY, PAPER-II

TIME ALLOWED:			(PART-I MCQs) 30 MIN						AXIMUM MARKS: 20			
THREE HOURS			(PART			S & 30 MINUT		MAXIMUM MARKS: 80				
NOTE: (i) First attempt PART-I (MCQs) on separate Answer Sheet which shall be taken back after 30 minutes.												
(ii) Overwriting/cutting of the options/answers will not be given credit.												
(PART-I MCQs) (COMPULSORY)												
Q.1.	Sele	ect the best of	option/a	nswer and fill	in the app	ropriate box on	the A	nswer Sheet	•	(1 x 20=20)		
(:)	TT1	1:4 £	-1 - CTI	1 . 1	 - •	_						
(i)		. •		r coal deposits		T in midin	(J) C	N1- 1- 14	(-) A 11 - £ 41		
(::)	(a)	Anthracitic	` ′	Bituminous		· ·		Sub-bitumino	us (e) All of these		
(ii)	-	• •	`			s capable to gen		C 1	()	None of these		
····	(a)	Condensate	` /		(c)	Gas	(d)	Coal	(e) None of these		
(iii)		-		npir (Sindh) o		Naui Eaunatia	_					
	(a)	Laki Forma			(b)	Nari Formation			,	N A 11 C .1		
<i>(</i> ;)	(c)	Dungan Fo			(d)	Kirthar Format	10n		(e) All of these		
(iv)		_		on, Rutile and	Apatite ar (b)							
	(a)	Sand and Sandstone				Chalk and Limestone

GEOLOGY, PAPER-II

										.0	
(xiii)	To ob	tain information	n abou	ıt magnetic m	ninerals f	rom	Stereogram/Ste	ereopai	r followi	ng instrum	4
	(a)	Stereometer	(b)	Magnetome	eter (c)	Re	esistivitymeter				2
	(d)	Seismometer	(e)	None of the	ese						3.
(xiv)	To obtain information about magnetic minerals from Stereogram/Stereopair following instrum (a) Stereometer (b) Magnetometer (c) Resistivitymeter (d) Seismometer (e) None of these Following rocks are not suitable as construction materials due to ASR and ACR hazards respectively:										
	(a) Granite and Diorite (b) Dolomite and Calcite									•	
	(c) Andesite and Dolomite (d) Basalt and Gabbro (e) None of these										
(xv)	Prese	Presence of Pegmatite is especially an indicator of possible occurrence of:									
	(a) Base-metals					(b) Radioactive minerals					
	(c) Magnetic minerals (d) Non-metals								(e) All of	these	
(xvi)	For ex	xploration and c	leterm	ination of un	dergrour	nd wa	nter quality mos	st suita	ble meth	od is:	
	(a)	Seismic	(b)	Magnetic	(c)	G	eochemical	(d)	Resistiv	ity (e) Non	e of these
(xvii)	If a map shows distribution of rocks and other geological materials (features also) of different ages over the Earth's surface or below, it is known as:										
	(a)	Topographic N	Лар		(b)) G	eological Map				
	(c)	Physiographic	Map		(d)) M	line-Survey Ma	ıр		(e) None of	these
xviii)	A map which shows the surface contours on an imaginary surface to which water would rise in a drilled well is termed as:										
	(a)	a) Piezometric Contour Map				(b) Groundwater Contour Map					
	(c)	Water Table C	Contou	r Map	(d)) So	onometric Cont	tour Ma	ap	(e) All of the	nese
(xix)	Follo	wing is the term	descr	ribes the Iron	-Oxide r	ich z	one which lies	above a	a Sulphid	le bearing ore d	leposit:
	(a) Greisen (b) Genesis (c) Gossan (d) Gneiss (e) None of these										
(xx)	Oil se	epages in the S	ulaima	an Range are	from the	rock	s of the follow	ing age	es:		
	(a)	Triassic and Ju	ırassic		(b)) Ju	rassic and Cret	taceous	3		
	(c)	(c) Cretaceous and Paleocene				(d) Paleocene and Eocene (e) All of these
