As a result of the global economic recession that began in 2009, Boots has had to make 900 employees redundant. 750 of these worked in IT support based in the South East and 150 worked in manufacturing in the Midlands.

The cuts would reduce the operating costs of Boots by £56m in 2014. The aim would be to deliver efficiencies.

Paul Maloney of the GMB union said the cuts were 'really bad news' and the union would be seeking urgent talks with the company.

(a) Explain the likely impact on Boots of reducing its workforce by 900 employees. (4)

The use of online and mobile technologies is widespread in education.

For students, learning online or using mobile technologies is an exciting way of studying.

Using online or mobile technologies means students can be part of an electronic community. They can discuss, share, help and be helped, motivate themselves and others, and overcome any problems for students who work on their own.

The internet has led to a huge expansion of web-based resources that are available to all. It allows students to select their own resources from a range of sites. Students need to recognise which online resources are appropriate to their studies.

(a) Other than those given in the above information, identify **two** benefits to students of using online and mobile technologies.

(2)
