General Marking Guidance

- This mark scheme gives you:
 - 1. An idea of the type of response expected / acceptable / not acceptable
 - 2. How individual marks are to be awarded
 - 3. Specific codes styles used in this marks scheme
 - 4. Information on how to apply this mark scheme
 - All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
 - Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
 - Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
 - There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
 - All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
 - Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
 - When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.

Marking

- Only answers that make sense can be credited. Where candidates are required to describe or explain etc, words/phrases which are put together in a meaningless way cannot be credited
- Do not award marks for a repeat of the stem of the question.
- The answers given in the mark scheme are exemplars and have been written in adult terminology. Credit must be given for answers which convey the same meaning as those detailed here as well as correct answers that are not shown.
