## Duration: Three Hours

$>$ Read the following instructions carefully.

1. This questions paper contains 90 objective questions. Q. 1-30 carry 1 mark each and Q. 30-90 carry 2 marks each.
2. Answer all the questions.
3. Questions must be answered on special machine gradable Objective Response Sheet (ORS) by darkening the appropriate bubble (marked A, B, C, D) using HB pencil against the question number on the left hand side of the ORS. Each equation has only one correct answer. In case you wish to change an answer, erase the old answer completely using a good soft eraser.
4. There will be negative marking. For each wrong answer, 0.25 marks from Q. $1-30$ and 0.5 marks from Q. 31-90 will be deducted. More than one answer marked against a question will be deemed as an incorrect response and will be negatively marked.
5. Write your registration number, name and name of the Centre at the specified locations on the right half of the ORS.
6. Using HB pencil, darken the appropriate bubble under each digit of your registration number.
7. Using HB pencil, darken the appropriate bubble under the letters corresponding to your paper code.
8. No charts or tables are provided in the examination hall.
9. Use the blank pages given at the end of the question paper for rough work.
10. Choose the closet numerical number among the choices given.
11. This question paper contains 24 printed pages. Please report, if there is any discrepancy.
