## Duration: Three Hours

$>$ Read the following instructions carefully.

1. This question paper contains all objective questions. Q. 1 to Q .30 carries one mark each and Q. 31 to Q. 80 carries two marks each. Q. 81 to Q. 85 each contains part "a" and "b". In these questions, part "a" as well as "b" carry two marks each.
2. Answer all the questions.
3. Questions must be answered on special machine gradable Objective Response Sheet (ORS) by darkening the appropriate bubble (marked $\mathrm{A}, \mathrm{B}, \mathrm{C}$, D) against the question number on the left hand side of the ORS, using HB pencil. Each question has only one correct answer. In case you wish to change an answer, erase the old answer completely using a good soft eraser.
4. There will be negative marking. In Q. 1 to Q.30, 0.25 mark will be deduced for each wrong answer and in Q. 31 to Q. $80,0.5$ mark will be deduced for each wrong answer. In Q. 81 to Q.85, for the part "a", 0.5 mark will be deduced for a wrong answer. Marks for correct answers to part "b" of Q. 81 to Q. 85 will be given only if the answer to the corresponding part "a" is correct. However, there is no negative marking for part "b" of Q. 81 to Q .85 . More than one answer bubbled against a question will be deemed as an incorrect response.
5. Write your registration number, name and name of the center at the specified locations on the right half of the ORS.
6. Using HB pencil, darken the appropriate bubble under each digit of your registration number and the letters corresponding to your paper code.
7. Calculator is allowed in the examination hall.
8. Charts, graph sheets or tables are not allowed.
9. Use the blank pages given at the end of the question paper for rough work.
10. This question paper contains 28 printed pages including pages for rough work. Please check all pages and report, if there is any discrepancy.

The symbols N, Z, R and C denote the set of natural numbers, integers, real numbers and complex numbers, respectively throughout the paper.
