# Mark Scheme

*2006 examination – June series*

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

## Foundation Tier

### Broad Principles:

- Most questions have a levels mark scheme, some have up to four levels, some up to three and some up to two.
- In all levels mark schemes, examiners must start at the top level, and use the level descriptor to see if the candidate response matches that descriptor. If the response does not match the descriptor, examiners should move down to the next level until the appropriate descriptor is matched by the candidate response.
- Once the correct level has been identified, examiners will also have to decide which mark to award within that level. This will be done by using the level descriptor, any further guidance and where applicable the exemplar responses. At its simplest, this will require the examiner to decide if the candidate is operating at the top, middle or bottom of a level that has three marks available to be awarded.
- Examiners should take great care, when using the range of marks for each level, to award the right number of marks for each response.
- For most questions a list of possible points is included in the mark scheme. This is not intended to be a comprehensive list. Nor is the wording deemed to be the only acceptable form for which marks may be awarded. Examiners will need to use their judgement as to whether a point made by the candidate is relevant to the question. Team leaders may be used for advice where examiners are unable to make such a decision.
