## Digital Technology

Unit 1: (Compulsory Core)

Digital Technology

**MV18**

**[GDG11]**

**THURSDAY 17 MAY, AFTERNOON**

### Time

1 hour, plus your additional time allowance.

### Instructions to Candidates

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

**You must answer the questions in the spaces provided.**

**Do not write on blank pages.**

Complete in black ink only.

Answer **all twelve** questions.

### Information for Candidates

The total mark for this paper is 90.

Figures in brackets printed at the end of each question indicate the marks awarded to each question or part question.

Quality of written communication will be assessed in Questions **3(b)** and **6(b)**.

**For Question 1 insert the appropriate letter in the space provided.**

**1 (a) Select the statement which is true about data.**

[1 mark]

- A** Data is facts and figures which has been processed and given a meaning.
- B** Data is facts and figures which has not been processed but has meaning.
- C** Data is facts and figures which has not been processed and has no meaning.
- D** Data is facts and figures which has been processed but has no meaning.

Answer \_\_\_\_\_

**(b) Select the statement in which the units of data storage are listed in ascending order (smallest to largest).**

[1 mark]

- A** bit, byte, nibble, kilobyte
- B** kilobyte, megabyte, terabyte, gigabyte
- C** nibble, byte, kilobyte, megabyte
- D** nibble, bit, byte, kilobyte

Answer \_\_\_\_\_

**(c)** Select the statement which is true about a buffer when transferring moving images. [1 mark]

- A** A buffer is a continuous stream of data.
- B** A buffer is a memory location used to store a downloaded part of a video before it is watched.
- C** A buffer is a large video downloading from the Internet whilst it is being watched.
- D** A buffer slows down video streaming and improves the user's experience.

Answer \_\_\_\_\_

**(d)** RSI stands for: [1 mark]

- A** Repetitive State Injury
- B** Repetitive Strain Injury
- C** Remote Strain Injury
- D** Remote State Injury

Answer \_\_\_\_\_

**(e)** Select the statement which describes the data encryption process. [1 mark]

- A** Encryption allows data to be transferred securely and data can only be read with a key.
- B** Encryption allows data to be transferred securely and data can be accessed without a key.
- C** Encryption prevents data from being transferred securely and data can be accessed without a key.
- D** Encryption prevents data from being transferred securely and data can only be read with a key.

Answer \_\_\_\_\_

**(f)** Max placed an item in his online shopping basket. Even though he did not press the purchase button, the company charged his bank account. Which law did the company break? [1 mark]

- A** Consumer Control Regulations
- B** Consumer Contracts Requirements
- C** Consumer Contracts Regulations
- D** Consumer Control Requirements

Answer \_\_\_\_\_

**(g)** Select the statement which correctly describes the role of the Information Commissioner. [1 mark]

- A** The person within an organisation who ensures the Data Protection Act is followed.
- B** The person who makes the public aware of their rights under the Data Protection Act.
- C** The person who collects data to be held by an organisation.
- D** The person who contacts the public to inform them that data is being stored about them.

Answer \_\_\_\_\_

**(h)** What do the letters HTTPS stand for? [1 mark]

- A** HyperText Transmission Protocol Safety
- B** HyperText Transfer Protocol Secure
- C** HyperText Transmission Protocol Secure
- D** HyperText Transfer Protocol Safety

Answer \_\_\_\_\_

- 2** World of Games is a company which distributes electronic newsletters to members via email. Opposite is a section of the database structure which holds members' details. All members over 16 are charged a joining fee of £20.00. The database records whether or not this fee has been paid in a field called JoiningFeePaid.

**(a)** Suggest the most suitable data types for the following fields: [1 mark for each]

| Field       | Data Type |
|-------------|-----------|
| DateOfBirth |           |
| JoiningFee  |           |

**(b)** In the Member table, MemberCode is shown as the primary key. What is the purpose of a primary key in a table? [1 mark]

---

---

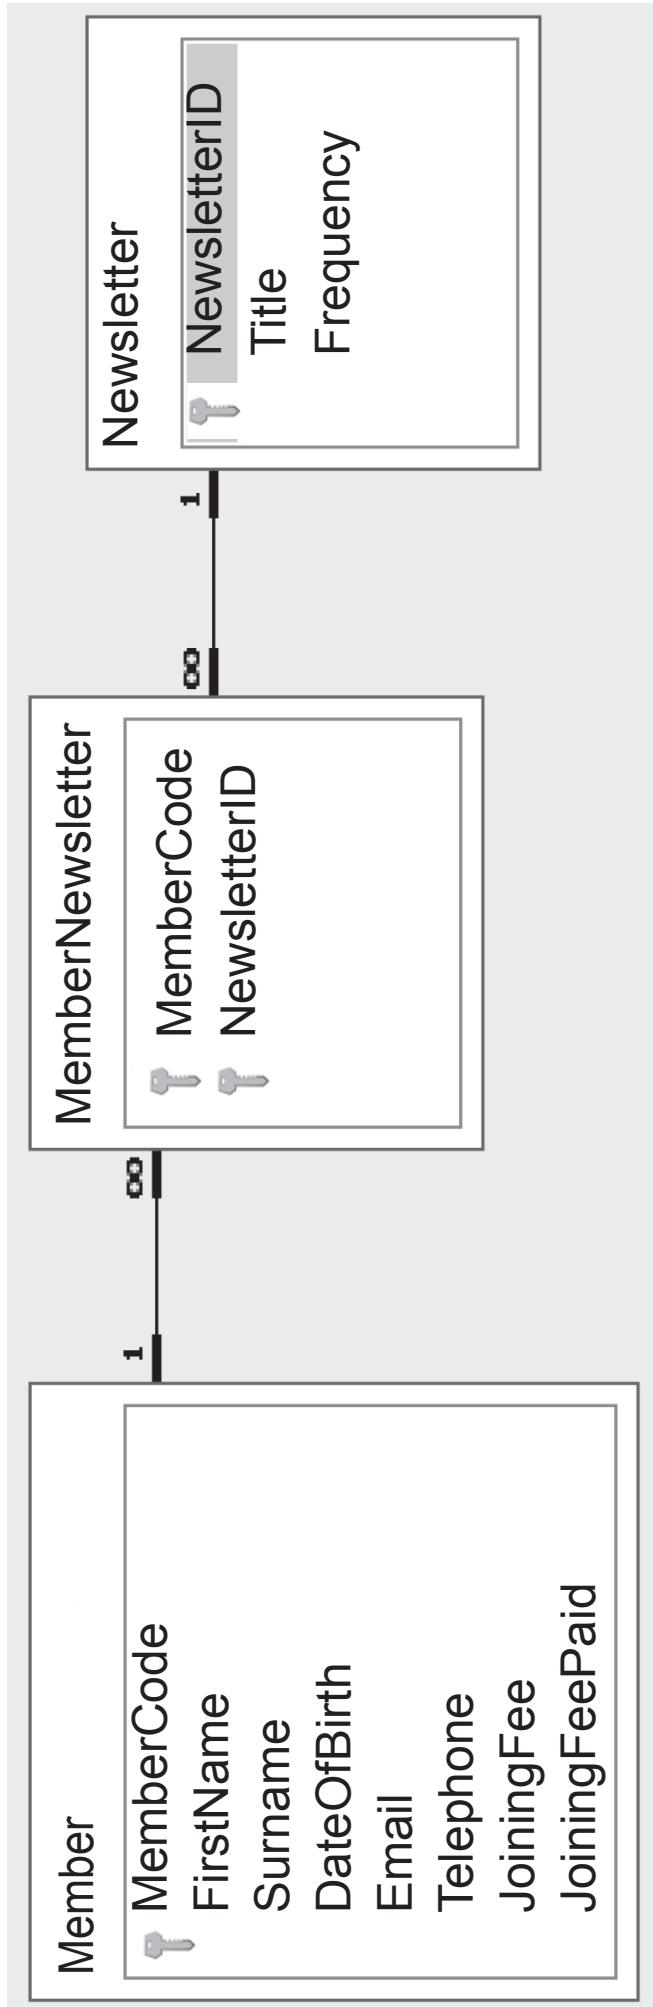

**(c)** What type of relationship exists between the Member table and the MemberNewsletter table? [1 mark]

---

**(d)** What is the purpose of the MemberNewsletter table? [1 mark]

---

---

**3** The Internet of Things generates data, sometimes called ‘big data’, which can be analysed and interpreted.

**(a)** What is data analytics? [2 marks]

---

---

**(b)** Describe ‘big data’ by making reference to volume, velocity and variety. [6 marks]

---

---

---

---

---

---

---

---

---

---

---

---

---

---

**BLANK PAGE**

**(Questions continue overleaf)**

**4** CPC is a small multimedia design business that supplies digital products. These include soundtracks, images and printed material.

**(a)** A client requests a high resolution bitmap image.

**(i)** Describe how a pixel is used in a bitmap image.  
[2 marks]

---

---

**(ii)** Explain the term resolution and its impact on an image. [2 marks]

---

---

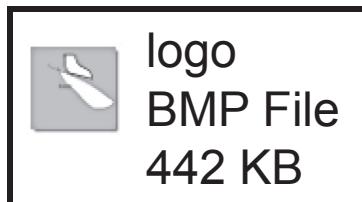

---

**(b)** The image has been saved in a number of file formats.

**(i)** Answer the questions in the table below.

| File Format   |   |
|---|---|
|  logo<br>PNG image<br>52.1 KB  | What do the letters PNG stand for?<br>[1 mark]  |
|  logo<br>JPEG image<br>14.4 KB | What do the letters JPEG stand for?<br>[1 mark] |

**(ii)** The image has also been saved as a bitmap image as shown below.

Explain why the file size of the JPEG file is smaller than that of the BMP file. [2 marks]

---

---

**(iii)** The client has requested a vector-based graphic of the logo. Identify **one** way in which a vector-based graphic differs from a bitmap graphic. [1 mark]

---

---

**5** John has purchased a laptop computer.

- (a) The table below shows some of the technical specification for the laptop.

|                         |   |
|-------------------------|---|
| <b>Operating system</b> | Windows 10 (64-bit)   |
| <b>Processor</b>        | - Intel® Core™ i5-7200U Processor<br>- Dual-core<br>- 2.5 GHz / 3.1 GHz (Turbo Boost)<br>- 3 MB cache |
| <b>RAM</b>              | 8 GB DDR4 - 2133 SDRAM  |
| <b>Storage</b>          | 128 GB SSD  |

- (i) Complete the following table, about the processor components, by inserting the appropriate values from the table above. [1 mark for each]

| <b>Processor component</b> | <b>Value</b> |
|----------------------------|--------------|
| Clock speed                |              |
| Cache size                 |              |
| Number of cores            |              |

- (ii) How does the clock speed impact on the performance of the central processing unit?  
[1 mark]

---

---

**(iii)** Describe the characteristics of the storage device provided with John's laptop. [2 marks]

---

---

**(b)** The system software on the laptop manages resources.

**(i)** Apart from allocating memory, list **two** other resources that are managed by system software. [2 marks]

1. \_\_\_\_\_

2. \_\_\_\_\_

**(ii)** Explain how memory is allocated by system software when a user wants to access data held on a hard disk. [3 marks]

---

---

---

**(c)** Computer systems use different modes of processing.  
Complete the following paragraph, using the phrases listed below, to explain the modes of processing.  
[4 marks]

airline  
booking  
systems

batch  
processing

real-time  
processing

billing  
systems

Collecting groups of similar data over time and processing the data together is called \_\_\_\_\_ . This type of processing is suitable for \_\_\_\_\_ . Processing data immediately as it is collected is called \_\_\_\_\_ . This type of processing is suitable for \_\_\_\_\_ .

**6** A school connects computers on a star network.

- (a)** How do levels of access help protect data on a network?  
[2 marks]

---

---

---

- (b)** Describe how computers are organised on a star network and explain the role of the file server on the network. [4 marks]

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

7 Jen is using the spreadsheet opposite to calculate staff pay in her office.

(a) Apart from bold and centring the text, how have cells D1 to H1 been formatted? [1 mark]

---

(b) Name the function used to carry out the calculation in cell J13. [1 mark]

---

| 1  | A         | B              | C           | D   | E   | F   | G    | H   | I           | J          | K               | L           | M |
|----|-----------|----------------|-------------|-----|-----|-----|------|-----|-------------|------------|-----------------|-------------|---|
| 2  | Name      | Job Title      | Rate of Pay | Mon | Tue | Wed | Thur | Fri | Total Hours | Weekly Pay | Job Title       | Rate of Pay |   |
| 3  | A Smyth   | Office Junior  | £7.50       | 7.5 | 6   | 8   | 8    | 8   | 37.5        | £281.25    | Office Junior   | £7.50       |   |
| 4  | J McKee   | Office Junior  | £7.50       | 4   | 7   | 8.5 | 7    | 6   | 32.5        | £243.75    | Office Manager  | £12.50      |   |
| 5  | K Brown   | Office Junior  | £7.50       | 8   | 8   | 8   | 8    | 0   | 32          | £240.00    | Team Leader     | £10.00      |   |
| 6  | S Sloan   | Office Junior  | £7.50       | 8   | 6   | 8   | 7.5  | 8   | 37.5        | £281.25    |                 |             |   |
| 7  | P McFall  | Team Leader    | £10.00      | 8   | 8   | 8   | 8    | 8   | 40          | £400.00    |                 |             |   |
| 8  | I Murray  | Office Junior  | £7.50       | 4   | 4   | 4   | 4    | 4   | 20          | £150.00    |                 |             |   |
| 9  | B Jones   | Office Junior  | £7.50       | 5   | 5.5 | 7   | 0    | 0   | 17.5        | £131.25    |                 |             |   |
| 10 | E Jonston | Office Manager | £12.50      | 9   | 9   | 9   | 9    | 9   | 45          | £562.50    |                 |             |   |
| 11 | Average   |                | £8.44       | 6.7 | 6.7 | 7.6 | 6.4  | 5.4 | 32.8        |            |                 |             |   |
| 12 |           |                |             |     |     |     |      |     |             |            |                 |             |   |
| 13 |           |                |             |     |     |     |      |     |             |            | Total Staff Pay | £2,290.00   |   |

(c) A VLOOKUP function is used in column C to select the correct Rate of Pay from cells L2 to M5.

(i) Place a tick () beside the correct VLOOKUP function used in cell C3. [1 mark]

| VLOOKUP                      | Tick<br>[ <input checked="" type="checkbox"/> ] |
|------------------------------|---|
| =VLOOKUP(B3,\$L\$3:\$M\$5,1) |   |
| =VLOOKUP(B3,\$L\$3:\$M\$5,2) |   |
| =VLOOKUP(C3,L3:M5,1)         |   |
| =VLOOKUP(C3,L3:M5,2)         |   |

(ii) Explain **one** advantage of using a VLOOKUP table in this way. [1 mark]

---

---

(iii) Some of the formulae listed in the table above use absolute cell references.

Describe **one** advantage of using absolute cell references in spreadsheet formulae. [2 marks]

---

---

**BLANK PAGE**

**(Questions continue overleaf)**

- (d)** Staff who work more than 40 hours are now automatically highlighted in a different colour as shown in column I in the spreadsheet opposite.

What type of formatting has Jen applied to the data in column I to provide the highlighting described?  
[1 mark]

---

- (e)** Cells D3 to H10 contain the hours each staff member works. Staff cannot work more than 9 hours per day.

Name a validation check which could be used in cells D3 to H10 to ensure the data entered is correct.  
[1 mark]

---

- (f)** Jen will add a macro to allow her to print the spreadsheet when it is completed.

What is a macro? [2 marks]

---

---

| 1  | A         | B              | C           | D   | E   | F   | G    | H   | I           | J                         |
|----|-----------|----------------|-------------|-----|-----|-----|------|-----|-------------|---------------------------|

| 11 | Average   |                | £8.44       | 6.7 | 6.7 | 7.6 | 6.4  | 5.4 | 32.8        |                           |
| 12 |           |                |             |     |     |     |      |     |             |                           |
| 13 |           |                |             |     |     |     |      |     |             | Total Staff Pay £2,290.00 |

**8 (a)** Protocols support data transfer over a network.

Complete the table by matching the protocol types listed below with the appropriate use for that protocol.

[2 marks]

**FTP**

**HTTP**

| <b>Protocol Type</b> | <b>Use</b>                                       |
|----------------------|--|
|                      | Used to transfer web pages across the Internet   |
|                      | Used to send and receive files over the Internet |

**(b)** Firewalls are used to protect computer networks. List **two** tasks carried out by a firewall. [2 marks]

1. \_\_\_\_\_

2. \_\_\_\_\_

**(c)** In the table below, circle the example of cybercrime which is being described. [3 marks]

| <b>Example of cybercrime</b> | <b>Description</b>   |
|------------------------------|--|
| Phishing                     | Use of a digital communication application to obtain personal information from users         |
| Spamming                     | Cyber defamation   |
| Phishing                     | Use of a digital communication application to distribute damaging information about a user   |
| Spamming                     | Cyber defamation   |
| Cyber defamation             | Use of a digital communication application to overload the users inbox with unwanted content |

**(d)** Describe how a worm virus can be used to disrupt the operation of a computer system. [3 marks]

---

---

---

---

**9** Alex owns an online gaming business with offices across Northern Ireland. All software and data used by his company are stored in the cloud.

**(a)** Give **two** advantages of using cloud computing to store software and data. [2 marks]

1. \_\_\_\_\_

2. \_\_\_\_\_

**(b)** Give **two** disadvantages of using cloud computing to store software and data. [2 marks]

1. \_\_\_\_\_

2. \_\_\_\_\_

Many game developers now distribute games online.

**(c)** How has the online distribution of games helped the game developers and their customers?  
[1 mark for each]

Game developers \_\_\_\_\_

Customers \_\_\_\_\_

**10** Kane's Kabs allow users to book taxis using a mobile phone app. They use GPS to provide users with additional information about the taxis they have ordered.

**(a)** What do the letters GPS stand for? [1 mark]

---

**(b)** The mobile phone app automatically activates GPS on the user's smart phone.

Why might some users have a problem with this happening? [1 mark]

---

---

**(c)** The office staff in Kane's Kabs have reported a range of health problems associated with regular computer use. These are listed in the table below.

Complete the table by giving **one** way (apart from regular breaks) in which the health problem listed can be prevented. [1 mark for each]

| <b>Health problem</b> | <b>Method of preventing problem<br/>(Regular breaks cannot be used)</b> |
|-----------------------|---|
| Back pain             |   |
| RSI                   |   |
| Eye strain            |   |

**11** Emma works mainly from home (teleworking).

- (a)** Apart from a computer, identify **two** digital technology devices she could use at home to log into her company's intranet to access work emails.  
[2 marks]

1. \_\_\_\_\_
2. \_\_\_\_\_

- (b)** List **two** advantages of teleworking to an employer.  
[2 marks]

1. \_\_\_\_\_
2. \_\_\_\_\_

- 12** Using the terms in the list below choose **one** term that best matches the definition in the left-hand column (not all terms will be used). [1 mark for each]

**Bluetooth**  
**Defragmenting**  
**Switch**  
**Task Scheduling**  
**Program Counter**  
**Router**  
**Wi-Fi**  
**Memory Data Register**

| <b>Definition</b>  | <b>Term</b> |
|--|-------------|
| Part of the processor which holds the address of the next instruction to be executed.  |             |
| A device which connects a number of networks together.   |             |
| A short range wireless technology which allows two devices to connect for the purpose of communication.                      |             |
| A utility that rearranges data on a disk so that files are stored together in blocks, meaning they can be read more quickly. |             |
