MONDAY 6 JUNE, AFTERNOON

**MARK
SCHEME**

General Marking Instructions

Introduction

Mark schemes are published to assist teachers and students in their preparation for examinations. Through the mark schemes teachers and students will be able to see what examiners are looking for in response to questions and exactly where the marks have been awarded. The publishing of the mark schemes may help to show that examiners are not concerned about finding out what a student does not know but rather with rewarding students for what they do know.

The Purpose of Mark Schemes

Examination papers are set and revised by teams of examiners and revisers appointed by the Council. The teams of examiners and revisers include experienced teachers who are familiar with the level and standards expected of students in schools and colleges.

The job of the examiners is to set the questions and the mark schemes; and the job of the revisers is to review the questions and mark schemes commenting on a large range of issues about which they must be satisfied before the question papers and mark schemes are finalised.

The questions and the mark schemes are developed in association with each other so that the issues of differentiation and positive achievement can be addressed right from the start. Mark schemes, therefore, are regarded as part of an integral process which begins with the setting of questions and ends with the marking of the examination.

The main purpose of the mark scheme is to provide a uniform basis for the marking process so that all the markers are following exactly the same instructions and making the same judgements in so far as this is possible. Before marking begins a standardising meeting is held where all the markers are briefed using the mark scheme and samples of the students' work in the form of scripts. Consideration is also given at this stage to any comments on the operational papers received from teachers and their organisations. During this meeting, and up to and including the end of the marking, there is provision for amendments to be made to the mark scheme. What is published represents this final form of the mark scheme.

It is important to recognise that in some cases there may well be other correct responses which are equally acceptable to those published: the mark scheme can only cover those responses which emerged in the examination. There may also be instances where certain judgements may have to be left to the experience of the examiner, for example, where there is no absolute correct response – all teachers will be familiar with making such judgements.

COVID-19 Context

Given the unprecedented circumstances presented by the COVID-19 public health crisis, senior examiners, under the instruction of CCEA awarding organisation, are required to train assistant examiners to apply the mark scheme in case of disrupted learning and lost teaching time. The interpretation and intended application of the mark scheme for this examination series will be communicated through the standardising meeting by the Chief or Principal Examiner and will be monitored through the supervision period. This paragraph will apply to examination series in 2021–2022 only.

				AVAILABLE MARKS										
1	(a) A	Hypertext transfer protocol secure	[1]											
	(b) A	Output from a digital application is used as input to another application	[1]											
	(c) C	A composite key is made up of more than one field	[1]											
	(d) D	Template documents which are set up to contain merge-fields	[1]											
	(e) C	On-screen graphic which moves around on screen	[1]	5										
2	(a)	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="padding: 2px;">Description</th><th style="padding: 2px;">Term</th></tr> </thead> <tbody> <tr> <td style="padding: 2px;">Shows the layout of individual screens in a website</td><td style="padding: 2px;">Storyboard</td></tr> <tr> <td style="padding: 2px;">Shows the pathways a user can take through the app</td><td style="padding: 2px;">Navigational Structure Diagram</td></tr> <tr> <td style="padding: 2px;">An outline of the sequence of a movie or animation</td><td style="padding: 2px;">Timeline</td></tr> <tr> <td style="padding: 2px;">Contains the details of the field headings held in a database</td><td style="padding: 2px;">Data Dictionary</td></tr> </tbody> </table>	Description	Term	Shows the layout of individual screens in a website	Storyboard	Shows the pathways a user can take through the app	Navigational Structure Diagram	An outline of the sequence of a movie or animation	Timeline	Contains the details of the field headings held in a database	Data Dictionary	[4]	
Description	Term													
Shows the layout of individual screens in a website	Storyboard													
Shows the pathways a user can take through the app	Navigational Structure Diagram													
An outline of the sequence of a movie or animation	Timeline													
Contains the details of the field headings held in a database	Data Dictionary													
	(b) (i)	Throwaway	[1]											
	(ii)	Evolutionary	[1]											
	(c)	Any two from: <ul style="list-style-type: none"> • User may confuse prototype and final system/expectation that all elements of prototype will be in final solution • Can lead to delays/increased development time • Increased costs • Prototyping not suitable for all applications • System can grow/more features added/changing user requirements 	[2]											
	(d)	Any two from: <ul style="list-style-type: none"> • Contains list of all necessary features of application • Lists requirements which are easily measured/clearly understood/ clearly stated [accept numbered list] • Uses language easily understood by client • Contains only requirements that can be attained (within budget/time/ limits of available technology)/manageable requirements • Will include input from end user/client • Set of numbered requirements 	[2]											
	(e)	Any three from: <ul style="list-style-type: none"> • All browsers support HTML/reference to cross-compatibility • No additional software needed to support it/easily edited/can use any software to edit • Most developers are familiar with HTML • Scripting can be added 	[3]	13										

		AVAILABLE MARKS												
3	(a)	<table border="1"> <tr> <td>Statement</td><td>TRUE/FALSE</td></tr> <tr> <td>Icons are used to represent tasks or applications</td><td>TRUE [1]</td></tr> <tr> <td>High specification graphics cards are required to run a GUI</td><td>TRUE [1]</td></tr> <tr> <td>A lot of training is needed before a GUI can be used properly</td><td>FALSE [1]</td></tr> <tr> <td>GUIs use very little RAM and suit inexperienced users</td><td>FALSE [1]</td></tr> <tr> <td>Users can select shortcuts using a pointing device</td><td>TRUE [1]</td></tr> </table> <p>[5]</p>	Statement	TRUE/FALSE	Icons are used to represent tasks or applications	TRUE [1]	High specification graphics cards are required to run a GUI	TRUE [1]	A lot of training is needed before a GUI can be used properly	FALSE [1]	GUIs use very little RAM and suit inexperienced users	FALSE [1]	Users can select shortcuts using a pointing device	TRUE [1]
Statement	TRUE/FALSE													
Icons are used to represent tasks or applications	TRUE [1]													
High specification graphics cards are required to run a GUI	TRUE [1]													
A lot of training is needed before a GUI can be used properly	FALSE [1]													
GUIs use very little RAM and suit inexperienced users	FALSE [1]													
Users can select shortcuts using a pointing device	TRUE [1]													
	(b)	<p>Any two from:</p> <ul style="list-style-type: none"> • Reflective markers/red-dot tracking/white-dot tracking • Sensors • LEDs • Infrared (camera) but not camera on its own <p>[2]</p>												
	(c)	<p>Advantages</p> <p>Any two from:</p> <ul style="list-style-type: none"> • Input device integrated into device/no additional devices attached • Intuitive use • Reference to accessibility issues • Easy to clean • 0 for portability <p>[2]</p> <p>Disadvantages</p> <p>Any two from:</p> <ul style="list-style-type: none"> • Not easily replaced if damaged/difficult to interact with if damaged • Expensive technology • Easily damaged • Sanitary issues (not easily dirtied - reference to germs spreading etc) <p>[2]</p>												
	(d)	<p>Level 0 [0] Answer is not worthy of credit.</p> <p>Level 1 ([1]–[2]) The candidate refers to one [1], or two [2] disadvantages, or describes one disadvantage [2] of natural language interfaces/voice data entry in this scenario. The candidate makes limited use of spelling, punctuation and grammar. The meaning of the text is not always clear. The candidate displays a limited form and style appropriate to the question. The organisation of the answer is limited.</p> <p>Level 2 ([3]–[4]) The candidate briefly describes two [3] or three [4] disadvantages of natural language interfaces/voice data entry in this scenario. The candidate makes satisfactory use of spelling, punctuation and grammar. The meaning of the text is usually clear. The candidate demonstrates a satisfactory form and style appropriate to the question. The organisation of the answer is satisfactory.</p> <p>Level 3 ([5]–[6]) The candidate fully describes three disadvantages of natural language interfaces/voice data entry in this scenario The candidate uses a good standard of spelling, punctuation and grammar. The meaning of the text is always clear. The candidate demonstrates a good standard of form and style appropriate to the question. The organisation of the answer is good.</p>												

Answers may include:

- Difficulty understanding wide range of voices/accents/not carrying out correct actions/instructions misunderstood
- Increased technical demands/RAM/processing power/storage
- Can only understand limited commands – difficulty ensuring users know those commands
- Security – users speaking PIN codes, etc
- Training
- Background noise
- Accessibility issues (not foreign language)
