# **Digital Technology**

Unit 2

**Digital Authoring Concepts** 

### [GDG21]

\*GDG21\*

### THURSDAY 25 MAY, AFTERNOON

TIME

1 hour 30 minutes.

### INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You must answer the questions in the spaces provided.

Do not write outside the boxed area on each page or on blank pages.

Complete in black ink only. Do not write with a gel pen.

Answer **all nine** questions.

#### INFORMATION FOR CANDIDATES

The total mark for this paper is 120.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

Quality of written communication will be assessed in Question 6(c).

<u>13</u>860

7 KD Events are organising a charity run. Anyone running in the event can also buy t-shirts and caps.

A relational database is used to record the orders.

(a) Complete the table below by stating whether each statement about a relational database application is TRUE or FALSE.

Statement	TRUE / FALSE
Forms can be used to create menus to help the user access different parts of the database	
Queries can be used to calculate additional data items	
The results of a query can only be displayed on a report	
Reports can be used to combine data from more than one database table	
Data can easily be added to a database using a report	
Data can easily be added to a database table using a form	
Macros are used to create lookup lists in database tables	

13860

Part of the relational database is shown below.

#### RunnerTBL

RunnerID	Surname	FirstName	Address	PostCode
1001	Hall	Grahame	12, Green Road, Bangor	BT20 7UJ
1002	Brown	Tiffany	43, Abbey View, Newry	BT35 9SD
1003	Brien	Peter	9, Blake's Road, Dromore	BT25 1AA

P005	1002	Brown	CGreenS	Cap Green Small	£5.99	2
P006	1002	Brown	TBlueM	T-shirt Blue Medium	£12.99	1
P007	1005	Matthews	CBlueS	Cap Blue Small	£5.99	3

Fig. 1

13860

\*28GDG2120\*

(c) Complete the query design below which would help KD Events to produce the results shown in **Fig. 1**.

Field Name	OrderID	RunnerID			
Table Name	OrderTBL				

- [2]
- (d) KD Events would like a list containing only the names and addresses of all customers who have ordered items worth more than £10.00.

Field Name	Surname		SellingPrice
Table Name	RunnerTBL		
Criteria			
Show	TRUE		

(Show is set to TRUE as this field needs to be displayed in the results of the query)

[4]

(e) KD Events would like to create a query to search for customers from Dromore.

Explain how they would need to change the address field in RunnerTBL to make this query possible.

**8** Jack has created a multimedia package for a local pet food shop.

Some of the user requirements for the package include: -

- A home page with images of staff
- A page showing the products which the shop sells
- A form to book pets into the grooming parlour
- A form page to place orders for products
- Hyperlinks to all of the vet's surgeries in the area
- Navigation buttons to let the user move between each of the four pages in the website

Jack creates a test plan for the package.

(a) Use the words below to decide what type of test Jack is carrying out in each description.

Some terms may be used more than once.

White box	Black box	System	Alpha	Beta

Description	Test type
A version of the application is given to some customers to test	
All staff images load correctly on the home page	
Test scripted elements used for validation on a booking form	
Total orders are displayed in currency format	
A version of the application is given to some employees to test	
Hyperlinks should take users to the correct vet's websites	

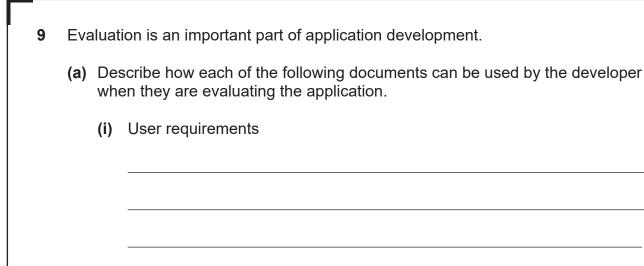

13860
