

Pearson

Mark Scheme (Results)

Summer 2017

Pearson Edexcel GCSE
In Manufacturing & Engineering (5EM03)
Paper 3D: Engineering Fabrication

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Summer 2017

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
 - i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear*
 - ii) select and use a form and style of writing appropriate to purpose and to complex subject matter*
 - iii) organise information clearly and coherently, using specialist vocabulary when appropriate.*

Question Number	Answer	Mark
1(a)	<ul style="list-style-type: none"> • Door handle • Machine vice <p><i>If 3 boxes or more crossed - no marks</i></p>	<p>(2 x 1) 2</p>

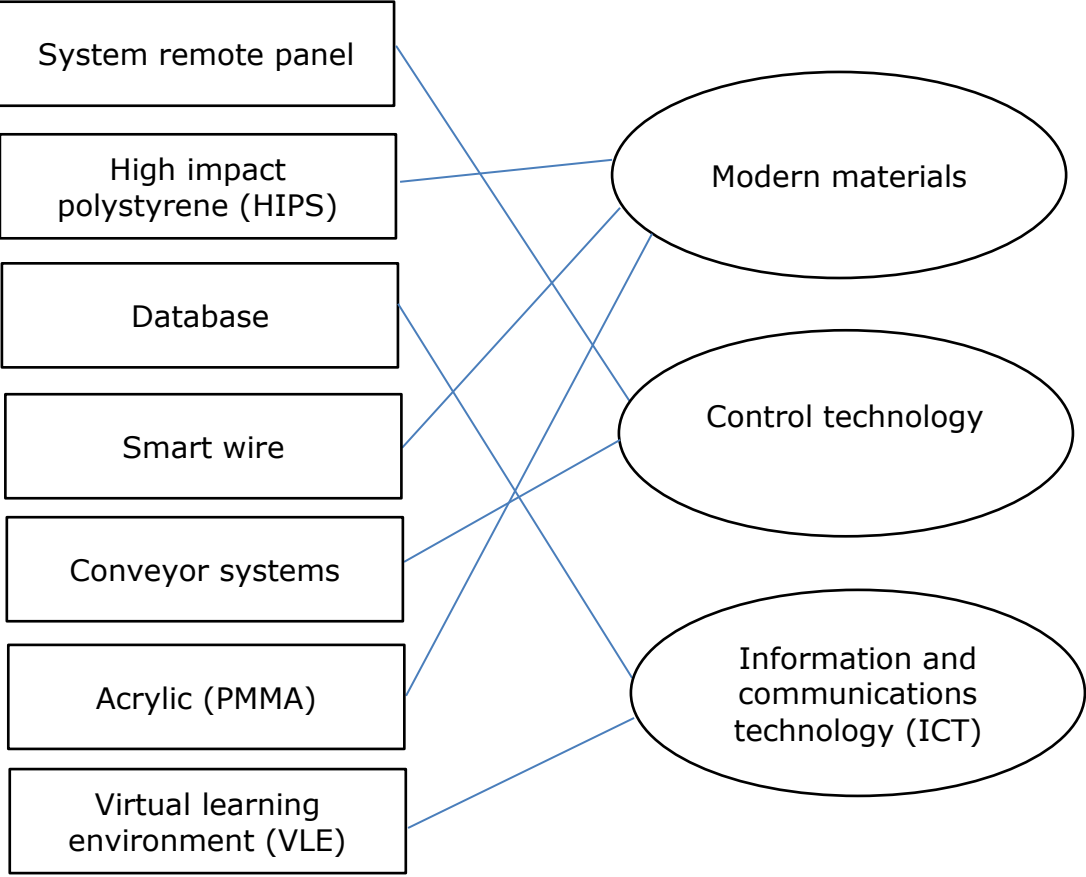

Question Number	Answer	Mark
1(b)	<ul style="list-style-type: none"> • Tank cutter • Piano hinge <p><i>If 3 boxes or more crossed - no marks</i></p>	<p>(2 x 1) 2</p>

Total for question 1 = 4 marks

Question Number	Answer	Mark
<p>2(a)1</p>	<ul style="list-style-type: none"> • Socket set screw • Cap screw • Cap head • Cap head screw • Socket head • Socket head screw • Socket machine screw • Allen cap screw • Allen screw • Socket screw <p>Do not accept screw by itself Do not accept bolt by itself</p> <p><i>Accept any recognisable spelling (phonetic) of the answers above</i></p> <p style="text-align: right;">(1 x 1)</p>	
<p>2(a)2</p>	<ul style="list-style-type: none"> • Gear • Spur gear • Straight gear • Cog <p>Do not accept bevel gear</p> <p><i>Accept any recognisable spelling (phonetic) of the answers above</i></p> <p style="text-align: right;">(1 x 1)</p>	2

Question Number	Answer	Mark
2(b)1	<p>An answer that makes reference to two of the following points:</p> <ul style="list-style-type: none"> • Used for tightening/unscrewing bolts/screws/nuts (1) • Used to gain access/get in difficult spaces (1) • Used to give leverage (1) • Different sizes available for use on different size bolt/screw heads (1) <p><i>Accept any other appropriate response</i> e.g. a tool that is used to tighten a bolt (1) creating leverage when tightening (1)</p> <p style="text-align: right;">(1 x 2)</p>	
2(b)2	<p>An answer that makes reference to two of the following points:</p> <ul style="list-style-type: none"> • Drills/makes holes (1) • Fits securely in a chuck (1) • The flutes enable the swarf to be removed (1) • Different sizes allow different diameter holes to be produced (1) • The point on the bit follows a centre punch mark (1) <p><i>Accept any other appropriate response</i> e.g. The drill bit fits into a chuck (1) to make a round hole in a metal piece (1)</p> <p style="text-align: right;">(1 x 2)</p>	4

Total for question 2 = 6 marks

Question Number	Answer	Mark
<p>3</p>	<p>Key terms linked to key areas:</p>  <p><i>No mark awarded where 2 or more lines are drawn from a term. Lines do not have to be straight but term and key area must be clearly linked.</i></p> <p style="text-align: right;">(7 x 1)</p>	<p>7</p>

Total for question 3 = 7 marks

Question Number	Answer	Mark
4(a)(i)	<p>Appropriate two products such as e.g.</p> <ul style="list-style-type: none"> • Bicycle brake caliper • Bicycle hand pump • Skateboard • Office stapler • Lawn sprinkler • Shopping trolley • Hole punch • Golf trolley • Mechanics Vice • Wheelbarrow • Darts <p>A brand name of a specific product is acceptable</p> <p><i>This list is not exhaustive; accept any product associated with the engineering fabrication sector that uses finishing processes in its manufacture.</i></p> <p style="text-align: right;">(2 x 1)</p>	2

Question Number	Answer	Mark
4(a)(ii)	<p>Appropriate two processes, such as:</p> <ul style="list-style-type: none"> • Electroplating/Plating • Galvanizing • Painting • Powder coating • Knurling • Anodising • Sheradising • Polishing/Buffering • Blackodising/Hot blackening • Sand/Shot blasting • Fettling • Barrelling/Tumbling <p><i>Accept any other appropriate response. Do not accept 'filing'</i></p> <p style="text-align: right;">(2 x 1)</p>	2

Question Number	Answer	Mark
4(a)(iii)	<ul style="list-style-type: none"> • Electroplating/plating - is a process that uses electric current to reduce dissolved metal cations (1) so that they form a coherent metal coating on an electrode (1) • Galvanizing - is the process of applying a protective zinc coating to steel or iron (1) to prevent rusting (1) • Painting - is any liquid, liquefiable or mastic composition that is applied to a surface (1) and converts to a solid protective film (1) • Powder coating - for metal painting and finishes that uses equipment that electrostatically charges the paint (1) so it adheres to any metal surface (1) • Knurling - is a manufacturing process, typically conducted on a lathe (1), whereby a pattern of straight, angled or crossed lines is cut or rolled into the material (1) • Anodizing - is an electrolytic passivation process (1) used to increase the thickness of the natural oxide layer on the surface of metal parts (1) • Sheradising - is a process of galvanization (1) of ferrous metal surfaces (1) • Polishing/Buffering - is the process of creating a smooth and shiny surface (1) by rubbing it or using a chemical action, leaving a surface with a significant specular reflection (1) • Blackodising/Hot blackening – a high-temperature process (1) in which the product is inserted into a series of tanks containing cleaners, caustics, and coolants (1) • Sand/Shot blasting - is the operation of forcibly propelling a stream of abrasive material against a surface under high pressure (1) to smooth a rough surface, roughen a smooth surface, shape a surface, or remove surface contaminants (1) • Fettling – a grinding or abrasive process (1) that removes unwanted materials from the part (1) • Barrelling/Tumbling – parts are placed in a barrel and spun around like a washing machine (1) which removes any sharp edges etc (1) <p><i>Accept any other appropriate response.</i> <i>If no answers or incorrect answers for 4a(ii) then no marks for 4a(iii)</i></p>	<p>(1 x 2) 2</p>

Question Number	Answer	Mark
<p>4(b)</p>	<p>One mark for each technique One mark for each description</p> <p>Visual inspection (1) to check for defects and blemishes (1)</p> <p>Measurement checks (1) to compare against specific requirements, i.e. micrometer to check dimensions (1)</p> <p>Gauge checks (go/no go) (1) to check part is acceptable (1)</p> <p>Optical checks (1) to ascertain alignment (1)</p> <p>Functional checks (1) to check the operation of the product (1)</p> <p>Ultrasonic tests (1) to detect flaws or measure thickness (1)</p> <p>Material/component checks (1) to meet specification (1)</p> <p><i>Accept any other appropriate response</i> <i>No credit for repetition</i> <i>Low response (1) or two low responses (2), or detailed response (2) for each of the techniques.</i></p> <p style="text-align: right;">(2 x 1) (2 x 2)</p>	<p>4</p>

Total for question 4 = 10 marks

Question Number	Answer	Mark
5(a)	<p>Accept any two responses:</p> <ul style="list-style-type: none"> • To control machine processes (1) • To assist in the operations of a manufacturing plant (1) • To assist in planning (1) • To assist in management (1) • To assist in transportation (1) • To assist in storage (1) • To create a faster production process (1) • To reduce waste (1) • To reduce energy consumption (1) • To improve product consistency (1) • To improve product accuracy (1) • To reduce the risk of injury (1) <p><i>Accept any other appropriate response.</i></p>	<p>(2 x 1) 2</p>

Question Number	Answer	Mark
5(b)	<p>One mark for identifying the disadvantage One mark for the description</p> <ul style="list-style-type: none"> • The software itself is expensive (1) so initial costs are high (1) • Can be slower than traditional methods (1) for one-off or low-volume production (1) • Training costs are high (1) when staff are using software and machinery (1) • Can be expensive to maintain (1), as highly skilled technicians required to carry out repairs (1) • Programming errors can occur (1), creating defective batches of products (1) • Consumers can look negatively (1) on this 'deskilling' of workers (1) <p><i>Accept any other appropriate response.</i></p>	<p>(1 x 2) 2</p>

Question Number	Answer	Mark
5(c)	<p>One mark for identifying each benefit One mark for each description</p> <ul style="list-style-type: none"> • PLCs control manufacturing devices i.e. laser cutters/NC/CNC machines/robots (1) to improve quality (1) • PLCs give continuous operation (1) as they do not need breaks (1) • PLCs can repeat actions (1) indefinitely (1) • PLCs can work in hazardous environments (1), reducing dangers for workers (1) • PLCs can work with fewer staff (1), reducing costs (1) <p><i>Accept any other appropriate response</i> <i>No credit for repetition</i> <i>Low response (1) or two low responses (2), or detailed response (2) for each of the benefits.</i></p> <p style="text-align: right;">(2 x 1) (2 x 2)</p>	4

Total for question 5 = 8 marks

Question Number	Answer	Mark
6(a)(i)	<p>Any one of the following:</p> <ul style="list-style-type: none"> • Mobile phone/infrared/bluetooth • Video conferencing • Voice over Internet Protocol (VoIP) • Electronic point of sale (EPOS) • EDI • ISDN • Texting • Phone • Walkie talkie • Fax • Smart phone • Tablet <p><i>Accept brand names of the above</i> <i>Accept any other appropriate response</i></p> <p style="text-align: right;">(1 x 1)</p>	1

Question Number	Answer	Mark
6(a)(ii)	<p>An answer that makes reference to two of the following points:</p> <ul style="list-style-type: none"> • A method of connecting devices • A local area network (LAN) • Hotspots • Wireless connection • Access to the internet • Access with router • Allows you to use email • Allows easy communication • Enables the internet of things • Allows transfer of information <p><i>Accept any other appropriate response</i> e.g. A method of connecting devices (1) which allows easy communication (1)</p> <p style="text-align: right;">(1 x 2)</p>	2

Question Number	Answer	Mark
6(b)	<p>One mark for identifying each reason One mark for each explanation</p> <p>The use of a dedicated computer system (1) within a larger system to perform specific functions (1)</p> <p>To monitor each process (1) as each part of the process has its own embedded system (1)</p> <p>Embedded computers are integral to process design (1) as industrial workplaces can often be harsh environments (1)</p> <p>Embedded systems don't require large power supplies (1) because they integrate dedicated/miniaturised componentry (1)</p> <p>Embedded computers reduce the need for cooling (1) as they will produce a lot less heat (1)</p> <p>There is minimal ingress of moisture/dust/chemicals (1), as it can be a fan-less system (1)</p> <p>Easier maintenance (1), no need to trace component faults/instant diagnosis (1)</p> <p>Allows opportunities for effective change of function (1) as the embedded computer can be reprogrammed when required (1)</p> <p><i>Accept any other appropriate response</i> <i>No credit for repetition</i> <i>1 x 1 mark low response, 3 x 1 mark three low responses, or detailed response (2) per reason.</i></p> <p style="text-align: right;">(3 x 2)</p>	6

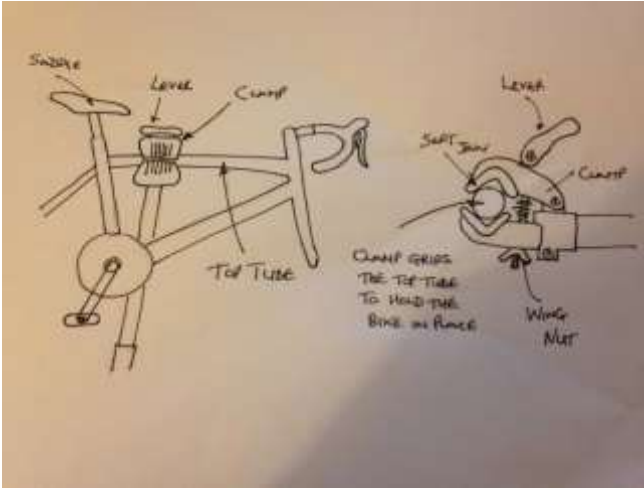

Total for question 6 = 9 marks

Question Number	Answer	Mark
7(a)	<p>One mark for identifying the benefit, up to two marks for the explanation:</p> <ul style="list-style-type: none"> • Allows online questionnaires to be used (1) instant feedback (1) target market can be established (1) • Demographic information can be analysed (1) existing products known to target market (1), allows matching customer requirements (1) • Information about materials can be obtained (1) suitability for product (1) cost details (1) • Compare existing products (1) to optimise the development of the design (1) minimising the cost of the product (1) • To generate break even data (1) through the use of spreadsheets (1) to calculate cost of production (1) <p><i>Accept any other appropriate response</i> <i>Low response (1) or detailed statement (3)</i></p> <p style="text-align: right;">(1 x 3)</p>	3

Question Number	Answer	Mark
7(b)	<p>One mark for identifying the benefit, up to two marks for the explanation:</p> <ul style="list-style-type: none"> • Fewer material shortages (1) by accessing stock records (1) and matching orders accordingly (1) • Improved scheduling (1) by accessing orders (1) and minimising downtime (1) • Efficient utilisation of staff (1) by utilising training/skills records (1) to ensure skilled staff are in the appropriate position (1) • Appropriate allocation of plant/equipment (1) by accessing resources list (1) and process capability (1) • Set control points for quality checks (1) access product specifications (1) to minimise product waste (1) • Allows modelling of deadlines (1) use of spreadsheets (1) access to process data (1) • Maximise machine efficiency (1) by ensuring correct process allocation (1) from accessing computer stored data and information (1) <p><i>Accept any other appropriate response</i> <i>Low response (1) or detailed statement (3)</i></p> <p style="text-align: right;">(1 x 3)</p>	3

Total for question 7 = 6 marks

Total for Section A = 50 marks

Question Number	Answer	Mark
8(a)	<p>An answer that makes reference to any of the following points:</p> <ul style="list-style-type: none"> • To hold the bike securely (1) • To protect the bike frame when being clamped (1) • To be able to adjust the clamp pressure for different size frames (1) • To allow the rider/mechanic to work hands free (1) • To be able to clamp different diameter tubes (1) • To be able to clamp onto different parts of the frame (1)  <p>Accept any other appropriate response Must have notes and sketches (notes or sketches only, maximum 2 marks) 1 x 1 mark low response, or up to 3 marks for detailed response</p>	<p>(1 x 3) 3</p>

Question Number	Answer	Mark
<p>8(b)</p>	<p>An answer that makes reference to any of the following points:</p> <ul style="list-style-type: none"> • To store components in the trays (1) • Magnetic strip to attach/stop components going missing (1) • To allow tools to be hung from the edges (1) • To hold fluids (1) • To provide easy access to tools/components (1) • Can be moved up or down (1) <div data-bbox="518 568 1129 1021" data-label="Image"> </div> <p>Accept any other appropriate response Must have notes and sketches (notes or sketches only, maximum 2 marks) 1 x 1 mark low response, or up to 3 marks for detailed response</p>	<p>(1 x 3) 3</p>

Question Number	Answer	Mark
8(c)	<p>An answer that makes reference to any of the following points:</p> <ul style="list-style-type: none"> • Stabilises the unit as attached to each leg (1) • Creates a bigger surface area to prevent tipping (1) • Fold up for easy storage (1) • Pivoted to allow for different height adjustments (1) • Holes in footplate to allow it to be fixed (1) <div data-bbox="513 533 1134 994" data-label="Image"> <p>A hand-drawn sketch of a tripod frame. At the top, a vertical line is labeled 'CLAMP' with a double-headed arrow indicating height adjustment. Three legs extend downwards from a central point. The top of the legs is labeled 'STABILISES THE LEGS OF THE FRAME'. The legs are labeled 'LEG SUPPORTS'. One leg is labeled 'STABILISING LEG'. At the bottom of the legs are circular footplates labeled 'FOOTPLATE'. A note at the bottom of the sketch says 'CREATES A GREATER SURFACE AREA TO PREVENT STAND TIPPING OVER'.</p> </div> <p>Accept any other appropriate response Must have notes and sketches (notes or sketches only, maximum 2 marks) 1 x 1 mark low response, or up to 3 marks for detailed response</p>	<p>(1 x 3)</p> <p>3</p>

Total for question 8 = 9 marks

Question Number	Answer	Mark
9(a)(i)1	<p>1st Box</p> <p>Must be in this order:</p> <ul style="list-style-type: none"> • Processing and production • Production and processing • Production processing • Production • Processing • Processing/Production • Production/Processing <p><i>Accept any recognisable spelling (phonetic) of the answers above.</i></p>	(1 x 1)
9(a)(i)2	<p>2nd Box</p> <p>Must be in this order:</p> <ul style="list-style-type: none"> • Assembly and finishing • Finishing and assembly • Assembly • Finishing • Assembly/Finishing • Finishing/Assembly <p><i>Accept any recognisable spelling (phonetic) of the answers above.</i></p>	(1 x 1)
		2

Question Number	Answer	Mark
9(a)(ii)	<ul style="list-style-type: none"> • Design • Stage 1/stage one • One/1 • First/ First stage 	(1 x 1)
		1

Question Number	Answer	Mark
9(b)	<p>An answer that makes reference to any of the following:</p> <ul style="list-style-type: none"> • Gathering consumer opinion (1) • Calculating product costs (1) • Developing a marketing plan (1) • Using market research (1) • Developing a competitive edge (1) • Advertising the bike stand (1) • Promoting the bike stand (1) • Carrying out questionnaires/surveys (1) • Pricing for the target market (1) • Using trade/electronic (internet, email) media (1) • Identifying gaps in the market (1) <p><i>Accept any other appropriate response.</i></p> <p style="text-align: right;">(3 x 1)</p>	3

Question Number	Answer	Mark
9(c)	<p>Appropriate descriptions including three of the following points (statements must be applicable to the bike stand):</p> <ul style="list-style-type: none"> • Bike stands boxed (1) • Boxes packed onto pallets (1) • Boxed items sent to distributors (1) • Bar coding applied to boxed sets of products (1) • Details sent to finance department for invoicing requirements (1) • Planning route for delivery (1) • Selecting correct packaging materials/equipment (1) • Sealing packaging (1) • Packing/shipping lists (1) • Labelling (1) • Gathering together of manufactured parts (1) • Final quality control checks (1) • Stock control (1) <p><i>Any other appropriate response but must be related to the manufacture of bike stands</i> e.g. At this stage the bike stand would be put into boxes (1) and then sent to the customer/distributor (1). The details of this would then be sent to the finance department (1).</p> <p><i>Up to 3 marks</i> <i>1 x 1 mark low response, 3 x 1 mark 3 low responses, or up to 3 marks for a detailed response</i></p> <p style="text-align: right;">(1 x 3)</p>	3

Total for question 9 = 9 marks

Question Number	Answer	Mark
10(a)	<ul style="list-style-type: none"> • Steel • Mild steel • Low carbon steel • Aluminium <p>Do not accept metal on its own</p> <p><i>Accept any other appropriate response</i> <i>Accept any other appropriate response.</i></p> <p style="text-align: right;">(1 x 1)</p>	1

Question Number	Answer	Mark
10(b)(i)	<p>Any three of the following:</p> <ul style="list-style-type: none"> • drilling • turning • milling • grinding • polishing/coating/painting/powder coating/plating • cutting • gluing • riveting • tapping • Extrusion • Die casting • Punching/blanking/presswork <p><i>Any other appropriate response</i> <i>Do not accept 'injection moulding', 'moulding', 'shaping' or 'forming' on its own</i> <i>Accept any recognisable spelling (phonetic) of the answers above</i></p> <p style="text-align: right;">(3 x 1)</p>	3

Question Number	Answer	Mark
10(b)(ii)	<p>An explanation that makes reference to three of the following points:</p> <ul style="list-style-type: none"> • quick method/fast production rate • excellent surface finish • no machining needed • any excess material can be re-used • unit costs are low for medium to high volume runs • highly automated process • reliable process • minimal waste • products have consistent quality • not labour intensive • can be mass produced easily • complex shapes can be produced • multiple components produced from one mould <p><i>Accept any other appropriate response</i> e.g. Injection moulding is a highly automated process (1) allowing components to be mass produced easily (1) and minimal waste (1)</p> <p><i>3 x 1 mark for 3 low responses, or up to 3 marks for a detailed response</i></p> <p style="text-align: right;">(1 x 3)</p>	3

Question Number	Answer	Mark
10(c)	<p>An explanation that makes reference to three of the following points:</p> <ul style="list-style-type: none"> • Improved aesthetics • Better ergonomics • Better functionality/strength • Longer lasting/durable • More consistent product • More accurate product • More reliable product • Safer product • Lower costs • Increased efficiency • Lower purchase price • Allows for product guarantee • Allows for increased range/variation of product • Lighter product • Appropriate-sized product <p><i>Accept any other appropriate response</i> e.g. Modern materials have better functional characteristics (1), are more durable (1) and allow for greater consumer choice (1)</p> <p><i>3 x 1 mark for 3 low responses, or up to 3 marks for a detailed response</i></p> <p style="text-align: right;">(1 x 3)</p>	3

Total for question 10 = 10 marks

Question Number	Answer	Mark
11(a)	<p>An answer that makes reference to any of the following:</p> <ul style="list-style-type: none"> • The use of systems (1) to control machinery / processes (1) • The use of control systems (1) to replace human operators (1) • The ability of a process (1) to operate without the need for human sensory input (1) • Mechanical devices that are operated electronically (1) and function automatically (1) <p><i>Accept any other appropriate response.</i></p> <p style="text-align: right;">(1 x 2)</p>	2

Question Number	Answer	Mark
11(b)(i)	<p>One mark for each example One mark for each description</p> <ul style="list-style-type: none"> • Robots/pick and place (1) to assemble products (1) • Use of conveyor systems (1) to move the product from one process to the next (1) • Flexible manufacturing system/embedded computers (1) to perform dedicated functions at each step of assembly/production (1) • Machine monitoring (1) to control quality and accuracy (1) • To improve safety (1) in hazardous conditions by using robots (1) • PLCs (1) to control processes in production (1) • Remotely operated vehicles (1) moving bike stand components to another stage of production/storage (1) <p><i>Accept any other appropriate response</i> <i>No credit for repetition</i> <i>1 x 1 mark low response, 3 x 1 mark 3 low responses, or detailed response (2) per example</i></p> <p style="text-align: right;">(3 x 2)</p>	6

Question Number	Answer	Mark
11(b)(ii)	<p>One mark for the disadvantage One mark for the explanation</p> <ul style="list-style-type: none"> • Increased capital cost (1) due to purchase of equipment (1) • Increased noise (1) due to more machines being used (1) • Increased energy usage (1) as increased power requirements of the machines (1) • Increased maintenance costs (1) as more equipment to monitor and maintain (1) • More training required (1) to be able to operate the equipment (1) • Programming requires high skills (1) increased cost (1) <p><i>Accept any other appropriate response</i> <i>Do not accept 'Expensive' without justification</i></p> <p style="text-align: right;">(1 x 2)</p>	2

Question Number	Answer	Mark
11(b)(iii)	<p>One mark for the benefit One mark for the explanation</p> <ul style="list-style-type: none"> • Consistent product (1) as controlled better (1) • Product reliability (1) as more likely to be produced to specification (1) • Reduced delivery time (1) as manufacturer can vary product to suit demand (1) • Lower prices (1) as less waste and quicker assembly (1) • Product guarantee (1) as confidence in the automation process (1) • Customer satisfaction (1) because of consistent products (1) <p><i>Accept any appropriate response.</i></p> <p style="text-align: right;">(1 x 2)</p>	2

Total for question 11 = 12 marks

Question Number	Answer	Mark
12(a)(i)	<p>An answer that makes reference to two of the following points:</p> <ul style="list-style-type: none"> • Reduced noise (1) • Quieter machines (1) • Cleaner workplace (1) • Fewer hazards (1) • Modern technology can replace workers in hazardous areas (1) • Healthier environment (1) • Atmosphere cleaned (1) • Less vibration (1) • Less risk of accident/injury (1) <p><i>Accept any other appropriate response</i></p>	<p>(2 x 1) 2</p>

Question Number	Answer	Mark
12(a)(ii)	<p>One mark for identifying each effect One mark for each explanation</p> <ul style="list-style-type: none"> • Continuous operation (1) reducing time (1) • Modern machines (1) faster production (1) • Reduced costs (1) by automating processes (1) • Access to data (1) allows constant monitoring (1) • Eliminating worker waste (1) improves use of time (1) • Less waste produced (1) due to carefully controlled production (1) <p><i>Accept any other appropriate response</i> <i>Do not accept cheaper, faster, quicker without an explanation</i> <i>No credit for repetition</i> <i>Low response (1) or two low responses (2), or detailed response (2) for each of the effects</i></p>	<p>(2 x 1) (2 x 2) 4</p>

Question Number	Answer	Mark
12(b)	<p>One mark for identifying each advantage One mark for each explanation</p> <ul style="list-style-type: none"> • Modern machines use less energy (1) so reducing CO2 emissions (1) • Smaller products (1) less use of natural resources (1) • Less waste/reworking of materials (1) less materials used/processing (1) • Transportation reduced (1) saving of fossil fuels/less emissions (1) • Use of alternative energies (1) reducing energy requirements (1) <p><i>Accept any other appropriate response</i> <i>No credit for repetition</i> <i>Low response (1) or two low responses (2), or detailed response (2) for each of the advantages</i></p> <p style="text-align: right;">(2 x 1) (2 x 2)</p>	4

Total for question 12 = 10 marks

Question Number	Answer	Mark
13	<p>One mark for identifying each impact One mark for each explanation</p> <p>Real time stock taking (1) reduces waste of stock (1)</p> <p>Simplified sourcing (1) Improved cost control (1)</p> <p>Use of barcodes (1) improved material traceability (1)</p> <p>Direct links to supplier and other departments (1) allowing immediate updating of material lists (1)</p> <p>Allows more frequent ordering (1) meaning less storage space required (1)</p> <p>Accurate modelling of material usage (1) ensures less stock out (1)</p> <p>Identifies potential obsolescence (1) avoids over ordering (1)</p> <p>Search facilities using databases/spreadsheets (1) allow sourcing/ordering of alternative materials (1)</p> <p><i>Accept any other appropriate response</i> <i>Do not accept cheaper, faster, quicker without an explanation</i> <i>No credit for repetition</i> <i>Low response (1) or two low responses (2), or detailed response (2) for each impact</i></p> <p style="text-align: right;">(2 x 1) (2 x 2)</p>	4

Total for question 13 = 4 marks

Question Number	Answer	Mark
<p>14</p> <p>QWC i, ii, iii</p>	<p>Indicative content</p> <ul style="list-style-type: none"> ● Use of energy management systems ● Intelligent lighting ● Use of low energy devices ● Energy consumption alarms ● Minimising over production ● Start up and shut down scheduling ● Generating own sources of energy ● Lean manufacturing techniques ● Efficient production planning ● Minimise high/low temp operations ● Pre-heating ● Use of heat exchangers/heat pumps/heat sinks ● Improved insulation ● Energy recovery systems ● Retrofit PLCs ● Reduce transportation/movement ● Improve staff awareness <p>e.g. manufacturers can use peak and demand monitor devices which will suggest better consumption methods that can be automatically actioned. They will be able to control their energy use by careful strategies such as intelligent lighting and the fitting of low energy devices. Manufacturers could use their own sources of supply such as solar panels/wind turbines or use heat pumps to service some energy needs. Other areas of energy control can be achieved by careful planning and use of insulation.</p>	<p>6</p>

Level	Mark	Descriptor
	0	No material deserving of reward
1	1–2	The learner identifies at least two methods of monitoring/controlling energy consumption or gives a brief description of one method. The learner shows limited knowledge of monitoring/controlling energy consumption. The learner uses everyday language and the response lacks clarity and organisation. Spelling, punctuation and the rules of grammar are used with limited accuracy.
2	3–4	The learner gives a brief description of two methods of monitoring/controlling energy consumption or a detailed description of one method. The learner shows good knowledge of monitoring/controlling energy consumption. The learner uses some manufacturing/technological terms and shows some focus and organisation. Spelling, punctuation and the rules of grammar are used with some accuracy. Some spelling errors may still be found.
3	5–6	The learner gives a detailed explanation of at least two methods of monitoring/controlling energy consumption. The learner shows a developed knowledge of monitoring/controlling energy consumption. The learner uses a range of appropriate manufacturing/technological terms and shows good focus and organisation. Spelling, punctuation and the rules of grammar are used with considerable accuracy.

Total for question 14 = 6 marks

Total for Section B = 60 marks

Total for paper = 110 marks
