## Assessment commentary - Unit 6

The candidate has spent a lot of time researching this brochure and has used maps and pictures to enliven the work. This topic risks becoming no more than a list of buildings and so on, but this candidate has included a large number of opinions as well as descriptions. The language is simple but contains adjectives and there is limited use of subordination using *parce que*. There are anglicisms, and a number of words and phrases are repeated. Nevertheless, this is an attractive piece of work from a candidate of average ability.

## Marks awarded

Communication and content				
Knowledge and application of language	2			
Accuracy of language	2
