

## GCSE Geography Specification A 40304F

Question 5	
5(a)(i)	Correct answer.
5(a)(ii)	Shading the wrong direction according to the key for Colton.
5(a)(iii)	The candidate is confused between percentages and absolute figures in the first statement.
5(a)(iv)	There are two problems listed and neither show any description. Traffic congestion more a problem caused by influx if tourists in general, rather than the existence of high percentage of second homes.
5(b)(i)	Correct answer.
5(b)(ii)	The candidate has given a definition which is not required. There is some clarity (Level 2), and linked statements. Nowhere does the candidate indicate how all these developments would cause pressure on the rural-urban fringe.  Not all the lines need to be used to get full marks.
5(b)(iii)	Correct answer.
5(b)(iv)	The candidate develops the point getting full credit.
5(c)(i)	Correct answer.
5(c)(ii)	The candidate shows all Level 2 statements. This is an excellent answer which has more than enough clarity to get full marks. Full marks had been achieved at the end of the third sentence.
Question 6	
6(a)(i)	Correct answer.
6(a)(ii)	The candidate's answer to part 2 cannot be seen on Figure 16. This is a question testing the geographical skill of photograph description.
6(b)(i)	Level 1. All simple statements that apply to any coastal resort and no indication of why these attractions are important for the growth of a holiday resort.
6(b)(ii)	Both points are specific to the named example.
6(c)(i)	Correct answer.
6(c)(ii)	Level 2. These are linked statements. The candidate needs to make it clearer as to how these help the country cope better with increasing numbers of visitors.
6(d)(i)	Correct answer.
6(d)(ii)	Question has not been answered
6(d)(iii)	No credit for unqualified pollution.
