Controlled Assessment Record Sheet

Edexcel GCSE in Geography Specification A Unit 4 (5GA04) Investigating Geography

Examination year:				
Centre name:		Centre number:		
Candidate name:		Candidate number:		
Unit 4 - Task question				
Assessment criterion	Total	Marks	Moderator Mark (for	
	marks	awarded	Edexcel use only)	
A - Purpose of investigation	6			
B - Methods of collecting data	9			
C - Methods of presenting data	11			
D -Analysis and conclusions	9			
E- Evaluation	9			
F - Planning and organisation	6			
Total marks	50			
Candidate declaration I can confirm that which is acceptable under the guideline			ssistance other than that	
Signed candidate	Date _			
Teacher declaration I confirm that the specification. I have authenticated the work produced is solely that of the cand	candidate's work			
Signed teacher	Date _			
Name of teacher				
By signing the above declaration you ag Development, Online Support and Train concerns regarding this please contact of	ing of both Centre-	Assessors and Edexcel Moderat		

N.B. Please attach this controlled assessment record sheet to the candidates work before submitting it to the moderator.

GCSE Geography Specification A Unit 4 - Controlled Assessment Mark sheet

Assessment criterion	Mark	Actual	Comment
A - Purpose of investigation	range	Mark	
No location or issue identified.	0		
Issue or question is weakly identified.	_		
Location is mentioned but unclear.	1-2		
A clear statement identifies the issue or question.	3-4		
Location is established.	0 4		
A focused statement identifies and evaluates the issue or question.	5-6		
Location is focused on the place of the investigation. B – Methods of collecting data			
There is no evidence of data collected or method(s) of collection.	0		
There is limited evidence of data collected.			
The methods used to collect the data are briefly described.	1-3		
There is no explanation of the methods used to collect the data.			
The evidence collected is appropriate for the investigation.			
The method(s) used to collect the data are clearly described. There is some explanation of the method(s) used.	4-6		
The evidence is accurately collected and is appropriate for the investigation.			
The method(s) used to collect the data are described in detail.	7-9		
There is detailed explanation of the method(s) used.			
C - Methods of presenting data			
There is no evidence of data presentation.	0		
A limited range of basic presentation techniques is used.	1-4		
The methods used are usually not appropriate.			
A range of mainly appropriate data-presentation techniques are used. Techniques are well presented, scales, titles present on most techniques.	5-8		
At the top of this level, some of the techniques should be more sophisticated.	3-0		
A wide range of presentation techniques, well presented and appropriate.			
Techniques are well presented, scales, titles present on most techniques.	9-11		
A number of the presentation methods will be more sophisticated.			
D -Analysis and conclusions			
D -Analysis and conclusions There is no analysis or conclusion.	0		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described.			
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the	0 1-3		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described.			
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in

D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected.	1-3 4-6 7-9 0 1-3 4-6		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation	1-3 4-6 7-9 0 1-3 4-6 7-9		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation.	1-3 4-6 7-9 0 1-3 4-6 7-9		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence.	1-3 4-6 7-9 0 1-3 4-6 7-9		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation.	1-3 4-6 7-9 0 1-3 4-6 7-9		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence. Geographical terminology may not be used accurately or appropriately. There is a sequence of enquiry in the investigation report. Content is clear, for example page numbers, are all present.	1-3 4-6 7-9 0 1-3 4-6 7-9		
There is no analysis or conclusions. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence. Geographical terminology may not be used accurately or appropriately. There is a sequence of enquiry in the investigation report. Content is clear, for example page numbers, are all present. The student spells, punctuates, uses grammar with some accuracy.	1-3 4-6 7-9 0 1-3 4-6 7-9 0 1-2		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence. Geographical terminology may not be used accurately or appropriately. There is a sequence of enquiry in the investigation report. Content is clear, for example page numbers, are all present. The student spells, punctuates, uses grammar with some accuracy. Geographical terminology is used appropriately in the investigation report.	1-3 4-6 7-9 0 1-3 4-6 7-9 0 1-2		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence. Geographical terminology may not be used accurately or appropriately. There is a sequence of enquiry in the investigation report. Content is clear, for example page numbers, are all present. The student spells, punctuates, uses grammar with some accuracy. Geographical terminology is used appropriately in the investigation report. The sequence of the enquiry in the investigation report is well established. Diagrams are integrated into the text with appropriate sub-headings.	1-3 4-6 7-9 0 1-3 4-6 7-9 0 1-2 3-4		
D -Analysis and conclusions There is no analysis or conclusion. Data has been extracted and described. Some basic conclusions have been drawn which vaguely relate to the question or issue investigated. Data is described in some detail with analytical comments. Plausible conclusions are reached using the evidence which is presented in the investigation report There are analytical comments, which draw together the student's findings. The conclusions are accurate and substantiated and refer to the correct theory where appropriate. E-Evaluation There is no evaluation. There is limited evaluation of the investigation. Either all aspects of the investigation have been evaluated in limited detail or some aspects of the investigation have been evaluated in more detail. There is evaluation of the investigation which varies in completeness between the aspects. Some of the limitations of the evidence collected have been recognised. There is detailed evaluation of the investigation which reflects on the limitations of the evidence collected. F - Planning and organisation The investigation report lacks any planning or organisation. The work may be incomplete and not organised into a logical sequence. Geographical terminology may not be used accurately or appropriately. There is a sequence of enquiry in the investigation report. Content is clear, for example page numbers, are all present. The student spells, punctuates, uses grammar with some accuracy. Geographical terminology is used appropriately in the investigation report.	1-3 4-6 7-9 0 1-3 4-6 7-9 0 1-2
