General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

London and the Second World War, 1939-45

Question	
1	Describe two features of the V2 attack on Deptford, 1944. Target: knowledge of key features and characteristics of the period. AO1: 4 marks.
Marking instructions	
Award 1 mark for each valid feature identified up to a maximum of two features. The second mark should be awarded for supporting information. e.g. <ul style="list-style-type: none">• <i>The attack hit the Woolworth's shop in Deptford and killed over 160 people (1). Woolworth's was the largest shop in the area and the attack happened at lunchtime on a Saturday, when it was busy (1).</i>• <i>There was no warning and no chance to take cover (1). The V2 was a rocket with a warhead, which fell silently and at high speed (1).</i>• <i>This was a new type of weapon that was first used in attacks on London in September 1944(1). The government had claimed that the first two V2 bombs were gas explosions (1).</i> Accept other appropriate features and supporting information.	

Question		
2 (a)		<p>How useful are Sources A and B for an enquiry into morale in the East End of London during the Blitz?</p> <p>Explain your answer, using Sources A and B and your knowledge of the historical context.</p> <p>Target: Analysis and evaluation of source utility. AO3: 8 marks.</p>
Level	Mark	Descriptor
	0	No rewardable material.
1	1–2	<ul style="list-style-type: none"> A simple judgement on utility is given, and supported by undeveloped comment on the content of the sources and/or their provenance¹. Simple comprehension of the source material is shown by the extraction or paraphrase of some content. Limited contextual knowledge is deployed with links to the sources.
2	3–5	<ul style="list-style-type: none"> Judgements on source utility for the specified enquiry are given, using valid criteria. Judgements are supported by developed comment related to the content of the sources and/or their provenance¹. Comprehension and some analysis of the sources is shown by the selection and use of material to support comments on their utility. Contextual knowledge is used directly to support comments on the usefulness of the content of the sources and/or their provenance.
3	6–8	<ul style="list-style-type: none"> Judgements on source utility for the specified enquiry are given, applying valid criteria with developed reasoning which takes into account how the provenance¹ affects the usefulness of the source content. The sources are analysed to support reasoning about their utility. Contextual knowledge is used in the process of interpreting the sources and applying criteria for judgements on their utility.

Notes

1. Provenance = nature, origin, purpose.

Marking instructions

Markers must apply the descriptors above in line with the general marking guidance (page 3).

No credit may be given for contextual knowledge unless it is linked to evaluation of the sources.

No credit may be given for generic comments on provenance which are not used to evaluate source content.

Indicative content guidance

Answers must be credited according to candidates' deployment of material in relation to the qualities outlined in the mark scheme. While specific references are made in the indicative content below, this does not imply that these must be included; other relevant material must also be credited. The grouping of points below does not imply that this is how candidates are expected to structure their answers.

Source A

The usefulness could be identified in terms of the following points which could be drawn from the source:

- Source A is useful because it gives examples of low morale, when people booed the king and queen, but also says there was high morale when ordinary people acted in important roles.
- The detail about people smashing open a food warehouse suggests that morale was low and people felt desperate.
- The description of his father's voluntary work, even when it was so upsetting, helps to explain why morale often remained high.

The following points could be made about the authorship, nature or purpose of the source and applied to ascribe usefulness to material drawn from it:

- The author is talking about the situation 60 years ago but he obviously remembers some events very clearly.
- The author was a child at the time and possibly adults tried to cover up low morale so as not to upset children.

Knowledge of the historical context should be deployed to support inferences and/or to assess the usefulness of information. Relevant points may include:

- Propaganda was used to try to keep up morale – posters, radio broadcasts, entertainment etc.

- There is evidence to show that the government was concerned about morale, especially among the working class in the East End of London, which was a major target during the Blitz, while richer areas in the West End of London were less affected by bombs.

Source B

The usefulness could be identified in terms of the following points which could be drawn from the source:

- Source B is useful because it shows the efforts of the royal family and government to give support to the areas affected by bombs.
- The content of Source B is useful as it shows the extent of the devastation caused by bombing, which could lead to low morale.
- The expressions on the faces of the people in the crowd show different levels of morale.

The following points could be made about the authorship, nature or purpose of the source and applied to ascribe usefulness to material drawn from it:

- The photograph appears to be a snapshot taken during a conversation, so it is not a posed photograph.
- The photograph was probably intended to record the royal visit and would be publicised in an attempt to raise morale.

Knowledge of the historical context should be deployed to support inferences and/or to assess the usefulness of information. Relevant points may include:

- It was common for the royal family, Winston Churchill and leading officials to visit bombed areas to show support and raise morale.
- The queen was aware of some resentment against the royals and said that she 'could look the East End in the face again' after Buckingham Palace was bombed.

Question	
2 (b)	<p>How could you follow up Source A to find out more about morale in the East End of London during the Blitz?</p> <p>In your answer, you must give the question you would ask and the type of source you could use.</p> <p>Target: Source analysis and use (the ability to frame historical questions).</p> <p>AO3: 4 marks.</p>
Marking instructions	
<p>Award 1 mark for selecting a detail in Source A that could form the basis of a follow-up enquiry and 1 mark for a question which is linked to it.</p> <p>e.g.</p> <ul style="list-style-type: none"> • <i>Detail in Source A that I would follow up: the food warehouse being smashed open. (1)</i> • <i>Question I would ask: were there any other times when people were desperate enough to take action like this? (1)</i> <p>(No mark for a question that is not linked to following up Source A, e.g. 'because it would be an interesting question to ask'.)</p> <p>Award 1 mark for identification of an appropriate source and 1 mark for an answer that shows how it might help answer the chosen follow-up question.</p> <p>e.g.</p> <ul style="list-style-type: none"> • <i>What type of source I would look for: local newspapers. (1)</i> • <i>How this might help answer my question: the newspapers would record local events and possibly interviews with local officials or with people involved which would explain whether people took action on other occasions. (1)</i> <p>Accept other appropriate alternatives.</p>

Marking instructions

Markers must apply the descriptors above in line with the general marking guidance (page 3).

Performance in AO1 and AO2 is interdependent. An answer displaying **no** qualities of AO2 cannot be awarded more than the top of Level 1, no matter how strong performance is in AO1; markers should note that the expectation for AO1 is that candidates demonstrate both knowledge *and* understanding.

The middle mark in each level may be achieved by stronger performance in either AO1 or AO2.

Indicative content guidance

Answers must be credited according to candidates' deployment of material in relation to the qualities outlined in the mark scheme. While specific references are made in the indicative content below, this does not imply that these must be included; other relevant material must also be credited.

Relevant points may include:

- The longbow could fire arrows with enough power to penetrate armour and therefore the role of mounted knights changed as they became more vulnerable during battle.
- Pike formations and the use of the schiltrons were effective defensive tactics against the charge of the mounted knights and therefore tactics relying on mounted knights had to adapt.
- Archers could be used to shoot the horses of mounted knights, destroying the power of their charge and leading to a change in tactics.
- The introduction of gunpowder began to change the nature of warfare as cannon were used after c1320, making charges by mounted knights less effective.
- The limited duration of knights' service (40 days) meant that commanders often relied on mercenary forces, especially for campaigns abroad, which reduced the importance of mounted knights as a component within the army.

Performance in AO1 and AO2 is interdependent. An answer displaying **no** qualities of AO2 cannot be awarded more than the top of Level 1, no matter how strong performance is in AO1; markers should note that the expectation for AO1 is that candidates demonstrate both knowledge *and* understanding.

The first two bullet points [AO1 and AO2] account for 3 of the 4 marks in the level and are equally weighted; the third bullet point [AO2] accounts for the remaining mark. Once the level has been found, there are two steps to follow to determine the mark within the level:

- Markers should consider bullet points 1 and 2 together. Strong performance (for the level) in both would be awarded all 3 marks, while 2 marks may be achieved by stronger performance in either bullet point; weak performance would be awarded 1 mark.
- The fourth mark in each level is allocated to the bullet point 3 and should be considered independently of the award of the other marks.

Indicative content guidance

Answers must be credited according to candidates' deployment of material in relation to the qualities outlined in the mark scheme. While specific references are made in the indicative content below, this does not imply that these must be included; other relevant material must also be credited. The grouping of points below does not imply that this is how candidates are expected to structure their answers.

Relevant points that support the statement may include:

- There were significant changes in the nature of warfare in the period 1500-1700 because the use of gunpowder led to the development of hand guns as well as cannon, making archers redundant.
- New tactics developed in order to make use of new weapons, for example, the use of musket volleys and pikemen to defend musketeers while reloading.
- Components of the army became more versatile, for example, the dragoons.
- New weapons and tactics needed training and discipline, leading to the creation of the New Model Army, the first professional standing army.

Relevant points to counter the statement may include:

- The use of field artillery led to new tactics such as the infantry squares used by Wellington at Waterloo.
- The use of heavy artillery in the Crimean War led to the early development of trench warfare.
- Rifles became more accurate over longer ranges, reducing the amount of close combat in warfare.
- Cardwell's reforms led to the professionalisation of the army, which led to more specialised groups within an army.

While specific references are made in the indicative content below, this does not imply that these must be included; other relevant material must also be credited. The grouping of points below does not imply that this is how candidates are expected to structure their answers.

Relevant points that support the statement may include:

- Reports about the war in the Crimea by William Russell had a heavy influence on public opinion, giving details of the harsh conditions and casualties, which challenged ideas about war as glorious.
- Photographs taken by Roger Fenton during the Crimean War showed the difficulties faced by the army, making people realise the hardship suffered when on campaign.
- The development of the telegraph meant that reports of the Crimean War could be in the newspapers within days and therefore people could form their own views rather than waiting for the government to publish an official, sanitised report.
- Newspapers, photographs and films were used during the First and Second World Wars to show the realities of war and the impact of bombing on civilians, which challenged people's ideas about the conduct of war.
- During the Gulf and Iraq Wars, television coverage provided detailed reports of the fighting and casualties, which affected people's attitudes because of the sense of direct involvement.

Relevant points to counter the statement may include:

- During the period 1900-present, censorship was sometimes used to prevent reports creating low morale.
- The development of total war, including conscription, meant that everyone was directly involved and therefore their attitudes may have changed.
- The fear of nuclear war led to an increase in anti-war feeling.
