

## Individual Task

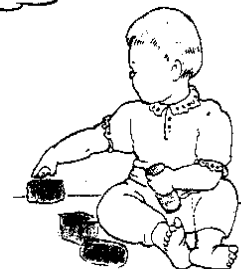

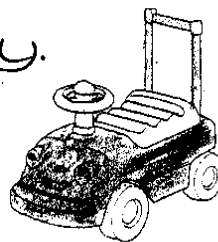

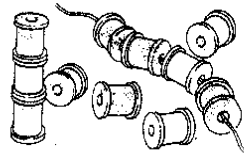

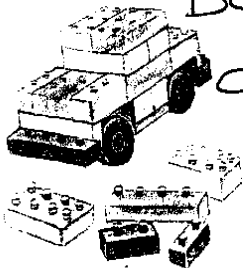

The child I will be observing is called Demilyn, she is 2 years 8 months. She lives with her mum and Dad, but visits grandparents, aunts, uncles and cousins quite often.

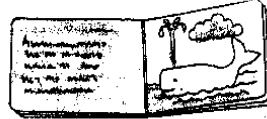

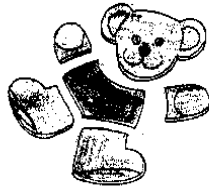

She lives at the far end of midway in a detached house which is quite big with 2 bedrooms. Their garden is big for Demilyn to play on.

In the area there is a park and shop and primary school

just up the road. The road is not that busy.

Demilyn has dark brown hair, blue eyes and is a very excited child but when becomes tired gets quite mardy.

Demilyn likes animals especially dogs and fish. she does not like cows though.

### Physical Development

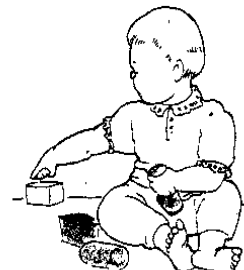

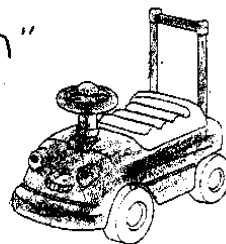

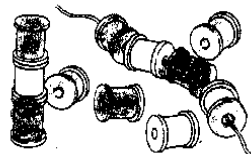

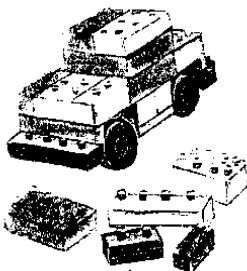

Demilyn is able to walk, run and do lots of physical activities, especially climbing. she jumps around and walks on tip-toe. She can also undress herself.

### Social Development

Demilyn tells you when she needs the toilet and goes by herself or sits on her potty.

Demilyn knows her name and tells you;

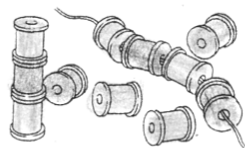

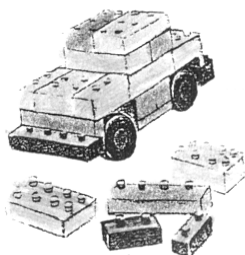

"my names Dem"

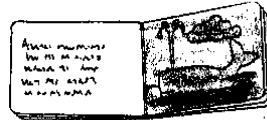

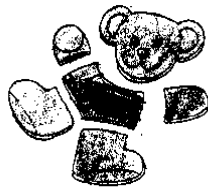

## Emotional Development

Demilyn shows her emotions very well. She gets mad when she's tired, gets shy when she meets new people, she throws tantrums when she does not get her own way and when she is excited she shows it by laughing hysterically and jumping up and down.

What  
DIFFERENT  
TYPES  
OF  
DEVELOPMENT  
ARE

physical      social  
emotional  
intellectual      communication
