

## More information on Smoking.

Smoking - 2 harmful chemicals in smoke - nicotine which increases the baby's heartbeat and carbon monoxide which replaces oxygen in the baby's blood. All this passes through the placenta.

\* Babies are smaller in weight and weaker.

\* Smokers more likely to have miscarriage.

\* Smokers more likely to suffer from bronchitis and pneumonia.

\* Babies brain cells are likely to be damaged in later pregnancy.

\* Babies more at risk to cot death

and passive smoking can cause cancers e.g. Leukaemia.

### SMOKING

Quite simply, try to stop smoking for your own, and your baby's, well being. Smoking during pregnancy can affect your baby's development. Premature labour is more common among women who smoke and nicotine is transmitted to your baby if you smoke while breastfeeding. Smoking may also be a contributory factor in cot death and babies growing up in households where there is a smoker, are more likely to suffer from chest infections.

Task Title I investigate and identify the most necessary equipment and laughte items required for a new-born baby. Find out the cost.

Assessment Area	Maximum mark	Achieved mark	Teacher Comment
Planning	4	4	Concise logical Plan of a chie. Identified resources in detail - of the home are produced.
Execution i) organisation and skills	8	7	Carried out planned work to a high standard, independently. Organised resources efficiently and used a range of methods.
ii) outcomes	4	3	Quality outcome. Produced clear results and graphs - a pity only 4 people were surveyed. Clear costs.
Evaluation	4	3	Drawn some conclusions. Identified strengths / weaknesses.
Total	20	17	

## Resource Task

Investigate and Identify the most necessary equipment and Layette items required for a newly born baby

I have to produce a questionnaire for mothers of newly born babies or who have had babies. The questions that I'm going to ask are about what the mothers think are the most necessary equipment and what are the most necessary Layette items required. I'm going to show my results in a bar graph. I'm also going to find out prices of the most popular equipment and the most popular Layette items. When I have collected this information, I will put the prices of the most popular items into a table.

I will use catalogues such as Argos and Empire to find the prices of the most popular items. I might also go to shops to compare prices.

I am going to give my questionnaire to people who have had babies such as my mum, auntie and friends.

### Plan of Action

- \* Think of questions to use for my questionnaire
- \* Put together my questionnaire
- \* Ask mum, family and friends
- \* Draw graphs to show results
- \* Find out the prices of the most popular items

- \* Put the prices into a table
- \* Do Evaluation

### Questions for my Questionnaire -

1. Which of the following equipment items did you find necessary for your baby?  
Cot, Pram, Baby Alarm, Push Chair, Moses Basket, Car Seat
2. Which equipment items were the most expensive?
3. Which of the following Layette items did you find necessary for your baby?  
Vests, Baby Grows, Hat, Shawl, Socks, Cardigans, bonnetts
4. Which Layette items were the most expensive?

To record the results I will put them into graphs. I will use bright colours to make them stand out and so people can see the results clearly.

On my questionnaire I will write out the questions and my family and friends will just need to tick what they think is necessary.

## Questionnaire

1. Which of the following equipment items did you find necessary for your baby?

People	Person 1	Person 2	Person 3	Person 4
Cot				
Pram				
Baby Alarm				
Push Chair				
Moses Basket				
Car Seat				

2. Which equipment items were the most expensive?

People	Person 1	Person 2	Person 3	Person 4
Cot				
Pram				
Baby Alarm				
Push Chair				
Moses Basket				
Car Seat				

You can tick as many as you like.
