

By doing this test I expected Emily to not to run as far as she did and I also thought that she would of fell over.

This test also shows that Emily is quite advanced for her age as she did not fall over when running. She also ran quite a fair distance which is brilliant for the age that she is.

FEEDING

Fourth Test - Feeding Herself

time doing this test - 20 mins - Date 14th October

For this test I watched Emily eat a family dinner. She did not mind me being there.

For her dinner she had chips + fish fingers on a plate with a fork and had a drink at the side of her plate. Emily began using her fork but then gave up and began to use her fingers. She did not get all the food in her mouth at first but she picked the food up that she dropped and ate that as well. Emily did not play with her food and at the end of the meal, you could tell that Emily enjoyed the meal.

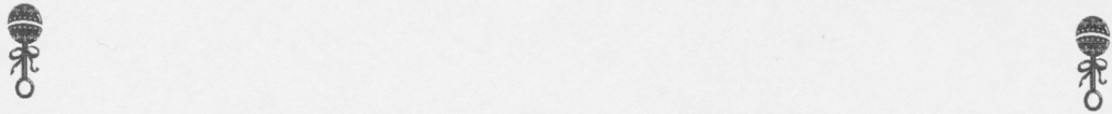

As I live with Emily I expected her to eat all of her food as she always does unless she is not feeling very well.

Emily really enjoys eating food, she also has a sweet tooth for chocolate and other sweet things.

PICKING UP OBJECTS
