Examiner's Initials	

Answer **all** questions in the spaces provided.

For **Questions 1 to 6**, write the letter or letters for the answers in the spaces given.

1 What does **RAM** stand for?

- A Remote Access Memory
- B Reliable Access Memory
- C Random Access Memory
- D Replaceable Access Memory

Answer

(1 mark)

2 What does **ROM** stand for?

- A Read Only Memory
- B Remote Only Memory
- C Random Only Memory
- D Reply Only Memory

Answer

(1 mark)

3 Which **one** of the following best describes the process of data validation?

- A Checking of data after processing to make sure it is correct
- B Checking of data after processing to make sure it is sensible
- C Checking of data before processing to make sure it is correct
- D Checking of data before processing to make sure it is sensible

Answer

(1 mark)

4 Which **two** of the following are methods of data validation?

- A Data logging
- B Linked tables
- C Police check
- D Presence check
- E Range check
- F Truancy check

Answer

(2 marks)

5 Which **three** of the following are features you would expect to find in graphics software?

- A Resizing of objects
- B Importing images
- C Data validation
- D Mailmerging
- E Insertion and deletion of fields
- F Use of brushes

Answers (3 marks)

6 Which **one** of the following is **not** a common feature of Web design software?

- A Financial modelling
- B Hotspots to be placed over parts of pictures
- C Hyperlinks to be created from text and graphics
- D Text and pictures to be imported

Answer (1 mark)

9

- 7 (a) Each piece of hardware in the table below is either an input, output or storage device. For **each** put a tick in the correct box. As an example, an inkjet printer is an output device and so a tick is placed in the Output column.

Device	Input	Output	Storage
Inkjet printer		✓	
Digital camera			
Floppy disk drive			
Laser printer			
Mouse			
Plotter			
Scanner			
Speakers			

(7 marks)

- (b) Name **one** other input device **not** given in the table above.

.....
(1 mark)

- (c) Name **one** other output device **not** given in the table above.

.....
(1 mark)

- (d) Name **one** other storage device **not** given in the table above.

- 8 A computer system is used to control a crane that puts boxes on to ships. A grip at the end of the crane is used to pick up and put down the boxes.

The grip is moved by typing commands into the computer system.

The commands which are used to move the grip are as follows:

RIGHT 2	Move the grip right 2 units
LEFT 3	Move the grip left 3 units
UP 4	Move the grip up 4 units
DOWN 5	Move the grip down 5 units
CLOSE	Close the grip to pick up the box
OPEN	Open the grip to release the box.

Using only commands from the list below, write down the instructions needed for the grip to pick up box A and place it on the ship's deck next to box B. The grip must then return to its original starting position.

Command List
RIGHT 14
LEFT 14
UP 4
UP 3
DOWN 3
DOWN 4
CLOSE
OPEN

Dotted lines for writing.

- 9 A poster is needed to advertise Lancre Playgroup's summer fair. The poster has to contain the following information, which should be grouped as shown below.

General details

Lancre Playgroup Summer Fair

Date - 19th July 2005

Where - Rugby Stadium

Time - 1pm to 3pm

Ring Lancre 767676 for more details

Admission

Adults 50p

Children 25p

Children under 3 free

Stalls

Books and Comics

Cakes

Face Painting

Ice Cream

Plants

Tins and Packets

Toys

Other attractions

Fun Fair

Refreshments

Motorbike Display

- (a) Use the space on the page opposite to design a layout for the poster. You do not need to colour in your design. *(5 marks)*
- (b) Label your design to show where you would use each one of the following features:
- Large, bold font;
Coloured text;
Importing clip art. *(3 marks)*
- (c) Annotate your design to say why you would use each feature in the way you have shown. *(3 marks)*

Design your poster in the box below.

- 10 A school uses a spreadsheet to help calculate the profit made by its tuck shop. Part of the spreadsheet that calculates the profit made in one day is shown below.

	A	B	C	D	E	F
1	Product name	Cost per item	Selling price per item	Profit per item	Number sold	Profit
2						
3	Chocolate bar	£0.15	£0.25	£0.10	50	£5.00
4	Toffee bar	£0.10	£0.20	£0.10	40	£4.00
5	Strawberry chews	£0.05	£0.10	£0.05	60	£3.00
6	Plain crisps	£0.12	£0.25	£0.13	25	£3.25
7	Cheese crisps	£0.12	£0.25	£0.13	40	£5.20
8	Cola drink (can)	£0.15	£0.25	£0.10	60	£6.00
9	Orange squash (carton)	£0.14	£0.20	£0.06	30	£1.80
10						
11					Total profit	£28.25

- (a) Which cell contains the selling price of one packet of plain crisps?

	Tick one box only
B6	
B7	
C6	
C7	

(1 mark)

- (b) Some of the cells in this spreadsheet contain text, number, currency or a formula. State which **one** of these is contained in the following cells.

(i) B3

(ii) E4

(iii) F4

(3 marks)

- (c) Tick **two** boxes to show advantages to the school of using this software package to help them work out the profit rather than using a calculator, pen and paper.

	Tick two boxes only
The tuck shop will make more profit	
Time can be saved by replication of formulae	
Changes are automatically re-calculated in totals	
The sweets, crisps and drinks will arrive faster	
More people will use the tuck shop	

(2 marks)

- (d) Describe **one** possible disadvantage to the school of using this software package to help them work out the cost rather than using a calculator, pen and paper.

13 An insurance company stores personal information about its customers on a database. As a data user, the insurance company must register under the 1998 Data Protection Act.

(a) Tick **five** boxes to show which of the following are responsibilities of the insurance company as a data user.

	Tick five boxes only
Information should never be given to anyone	
Information should never contain names	
Information should be accurate and up-to-date	
Information should always be changed at the request of the data subject	
Information should be kept secure	
Information should be relevant and not excessive for the purpose	
Information should never be kept longer than necessary	
Information should not be transferred outside of the European Union (E.U.)	
Information should only be given to the police	
Information should never be looked at by the insurance company's staff	

(5 marks)

(b) Give **two** rights the Data Protection Act gives to the customers.

Right 1

.....

Right 2

.....

(2 marks)

(c) Security of data is a major issue for the insurance company. Describe **two** methods that could be used to prevent unauthorised access to confidential information stored on their computer system.

Method 1

.....

Method 2

- 14 The definitions given below are all related to data logging and control systems. From the list given, choose the term which best matches the definition in the left-hand column of the table below. Write your answers in the spaces provided.

actuator	feedback	modem
calibrate	graphing	period of logging
data logging	logging interval	sensor
encryption	multiplexer	web browser

Definition	Term which best matches the definition
An input device used to measure environmental conditions	
Collecting and storing of data at regular, fixed intervals over a period of time	
The time taken between the first reading being taken and the last reading being taken	
The time between one reading being taken and the next reading being taken	
To correlate the readings of a sensor against those of a known standard	
The modification or control of a process or system by its results or effects
