This document consists of **11** printed pages and **1** blank page.

1 A patient is admitted to hospital.

The hospital needs the following personal details about the patient:

first name, last name, age and home address.

(i) Why would it **not** be sensible to store the age of the patient in the database?

.....
..... [1]

(ii) How can this problem be overcome?

.....
..... [1]

(iii) More than one field is used for storing the home address.
Why is this useful?

.....
.....
.....
..... [2]

2 A hospital has three sites some distance apart. It has a wide area network (WAN) that is connected between these sites.

Give **one** method of communication that could connect the network between the two sites.

.....
..... [1]

3

3 A supermarket has a database which it uses for stock control. The database is updated as goods are sold at the checkout.

Details of some goods are entered into the database at the checkout using keyboards and keypads.

Identify **two** other devices that could be used to collect data from the goods and give **one** reason why each device would be used.

Device 1

Reason

.....

Device 2

Reason

..... [4]

4 An online store has a warehouse from which it sends out goods.

(a) The database of items in the warehouse is stored on a hard disk.

State **two** reasons why the database is stored on a hard disk rather than a CD-ROM.

Reason 1

.....

Reason 2

..... [2]

(b) The data on the hard disk is regularly archived.

What is an archive?

.....

.....

.....

..... [2]

(c) Explain the advantages to the company of selling its goods online.

.....

.....

.....

.....

.....

.....

.....

.....

..... [4]

5 A company replaces its old computer system with a new system.

(a) State **two** tasks that must be done before the operators can use the new system.

Task 1

.....

Task 2

..... [2]

(b) For six months, the company uses the old system alongside the new system.

Give **one** reason for doing this.

.....

..... [1]

6 A car manufacturer uses robots to make its cars.

One advantage of using robots is that human error is eliminated.

(a) Give **two** reasons why errors might still occur.

Reason 1

.....

Reason 2

..... [2]

(b) Give **two** advantages, other than eliminating human errors, of using robots.

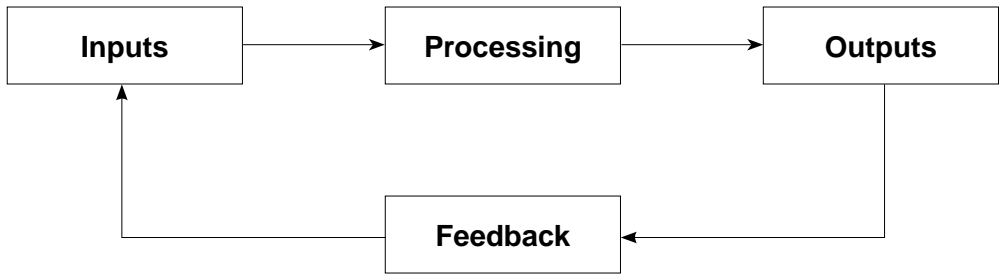

Advantage 1

.....

Advantage 2

..... [2]

7 The diagram shows the control feedback loop system for controlling the central heating of a house.

(a) Identify **two** items of data that will be input to this system.

Data item 1

.....

Data item 2

..... [2]

(b) Identify **one** output from this system.

.....

..... [1]

(c) Explain what is meant by feedback.

.....

.....

.....

..... [2]

9 A computer system uses on-line processing.

(a) Describe on-line processing.

.....
.....
.....
..... [2]

(b) Give **one** example where on-line processing is most suitable.

.....
..... [1]

10 Describe how a medical expert system provides a doctor with a diagnosis.

.....
.....
.....
.....
.....
.....
.....
.....
..... [4]

11 Two UK Acts of Parliament are designed to deter computer abuse.

Explain the purpose of each of the Acts shown below.

Data Protection Act (1998)

.....

.....

.....

.....

.....

.....

.....

.....

.....

Computer Misuse Act (1990)

.....

.....

.....

.....

.....

.....

.....

.....

.....

..... [6]
