GCSE Information and Communication Technology B (1095/1995) Unit 3 (2378) Interactive System

INTRODUCTION	
This is a brief introduction explaining that you intend to build an interactive system for a Tourist Information Centre to aid travel.	
Mention the following; Name of area covered, type of attraction, benefits of having this system (you will go into more detail later)	
ANALYSIS	
Research a local Tourist Information Centre at the moment – what advice does it give, how does it give advice, what does it sell etc. – who are its customers/users?	A02a
I have been asked to help xxxx Tourist Information Centre to construct a	
How does xxxx Tourist Information Centre promote itself at the moment? What are the advantages or disadvantages of these methods?	A02a
The xxxx Tourist Information Centre promotes itself at the moment by (Word of mouth, newspapers, advertisements, leaflets etc - get examples of these and annotate them if you can.)	
What other ways could be used to further advertise/promote xxxx Tourist Information Centre?	A02
xxxx Tourist Information Centre could further advertise/promote itself by (Mail shots, sponsorship to gain publicity, offering free samples through schools (or other places), in supermarkets and magazines, billboards, adverts on other peoples Internet sites etc)	
What does xxxx Tourist Information Centre want to do in terms of getting better– how will this affect the business?	A02
After re-reading my introduction and visiting xxxx Tourist Information Centre I think xxxx Tourist Information Centre needs to (Reach a wider audience, use surplus space/time/facilities, make use of new ICT technology, cut costs etc. Probably a combination of these and others, though one may be more important).	
IMPORTANT - The purpose of this work is, therefore, to	
xxxx Tourist Information Centre expects to gain from using this form of interactive service/promotion	
What do the potential customers/users want from an interactive system as detailed in the Assignment instructions? (do not be afraid to modify any ideas you may have recorded above, you could earn extra marks!)	A02
I have interviewed a group of potential tourists/users of to find out what they might want on such a system as described in the Assignment.	
My finding are set out below (questions about content, colour, organisation of site, features, what would get people to revisit centre, how important is changing/up dating site regularly etc). I have made some changes to my ideas as a result of this initial research.	
Benefits of Website as opposed to Powerpoint.	

How easy was it to navigate around the site? Did the website have a search engine? If not was this a problem? What age of customer would be attracted to this website? Was the text on the site easy to read and understand? Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, newspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word locuments with pasted information. Are there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data may be is collected if I decide on a web- site (membership details, orders, smalls etc- is it sensitive, dangerous, valuable or in need of security. CXXX will control the web site, CXXX will control the web site, CXXX who will check that the data is correct and will use various tools to help (proof reading, spellchecker, ask colleague to check facts) CXXX can access the data that might be collected, it will be used to	Question	Evaluation
Site? Did the website have a search engine? If not was this a problem? What age of customer would be attracted to this website? Was the text on the site easy to read and understand? Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, rewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word locuments with pasted information. The following data/information will appear	Name of site	
If not was this a problem? What age of customer would be attracted to this website? Was the text on the site easy to read and understand? Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word occuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? hink carefully about the potential users (your audience) who will use this system. The following data/information will appear	•	
What age of customer would be attracted to this website? Was the text on the site easy to read and understand? Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? The found the following information, which I will use in this task (from other sites, magazines, everypapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word occurrents with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear		
Was the text on the site easy to read and understand? Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word occuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? hink carefully about the potential users (your audience) who will use this system. The following data/information will appear	What age of customer would be	
Is the colour scheme appropriate? If so why, if not why not. Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? hink carefully about the potential users (your audience) who will use this system. The following data/information will appear	Was the text on the site easy to read	
Is the website a good advertisement for the company? Explain your views Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? hink carefully about the potential users (your audience) who will use this system. The following data/information will appear	Is the colour scheme appropriate? If so	
Do the prices of the goods seem cheaper or more expensive than you would expect to pay in Nottingham? What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? hink carefully about the potential users (your audience) who will use this system. The following data/information will appear	Is the website a good advertisement for	
What improvements could you suggest to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear	Do the prices of the goods seem	
to make the website more attractive? How could the company conduct more market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear	would expect to pay in Nottingham?	
market research about what the customer might want to buy? have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear		
have found the following information, which I will use in this task (from other sites, magazines, ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear	. ,	
ewspapers, interviews, CD Rom, the Internet etc – enclose cuttings, copies, and Word ocuments with pasted information. The there any possible concerns about using the Website as opposed to Interactive System? Think carefully about the potential users (your audience) who will use this system. The following data/information will appear	customer might want to buy?	
The following data/information will appear The following data may be is collected if I decide on a web- site (membership details, orders, emails etc- is it sensitive, dangerous, valuable or in need of security. EXXXX will control the web site, EXXXX who will check that the data is correct and will use various tools to help (proof reading, spellchecker, ask colleague to check facts) EXXXX can access the data that might be collected, it will be used to What information will be held on PowerPoint system		I will use in this task (from other sites, magazines

	The following data/information will appear The following data may be is collected if I decimals etc- is it sensitive, dangerous, valuable xxx will control the web site, xxx who will check that the data is correct an pellchecker, ask colleague to check facts) xxx can access the data that might be collected what information will be held on PowerPoint site.	the Website as opposed to Interactive System? audience) who will use this system. side on a web- site (membership details, orders, e or in need of security. and will use various tools to help (proof reading, ted, it will be used to

I have chose	n for my preser	ntation t	o work with (what	t software).	
Please see th system.	ne attached eva	aluation	form which poter	ntial customers	have filled in reviewing my
Input, Proces	s & Output. Wri	ite down	exactly what you	expect each so	ection will do (and maybe
Web/ Powe	INPUT that will go into erPoint page are: ing galleries (International others)	: -	PROC I will change, or manipulate and using Frontifeatures – marque PowerPoint feat hyperlinks, sour animation, text a	rganise, organise Page/HTML uee, ures –	OUTPUT The end result can be seen (Where?)
Some parts o	f my system w f my system w	rill need	and others infreq to be updated req anged every so c e changed for sor	gularly, these a	are
Price up a su	itable set of ha	ırdware		the interactive	eras system (either Web or s are listed below
Name	I or O	Price	Description	Character benefits	ristics, drawbacks &

Software			
A) I could have so advertising by;	lved the	problem of xxxx T	ourist Information Centre requiring additional
•		high quality brock	nures and posters
•			to create the interactive system (either Web or
owerPoint) and r			to create the interactive system (either Web or specification and prices are listed below
owerPoint) and r			· · · · · · · · · · · · · · · · · · ·
PowerPoint) and r			· · · · · · · · · · · · · · · · · · ·
PowerPoint) and rEXAMPLE Name	maintain i	in the future. The s	specification and prices are listed below
PowerPoint) and r XAMPLE Name Serif WebPlus	maintain i	in the future. The s	specification and prices are listed below
	maintain i	Description Drawing and animation	Characteristics, drawbacks & benefits High quality software used to create and edit drawings, logos & graphics. It includes an animation package which I will use to create appropriate animations for the

	DESIGN	
	Outline of the website / PowerPoint. Just a LIST of the images, text, pictures, links you already intend to put in the interactive system.	A02b
	Text	
	Type of places to be viewed etc.	
	Sound	
	CommentaryNarration etc.	
	Images • Logo of business	
	 Pictures of key staff Pictures of locations etc 	
	Animation	
	Video of Area etc Links	
	To all pagesTo XXX websites	
	Discuss problems you may have finding all the above and possible solutions	
D2	Interactive System Outline	A02b
	Sketch out your basic layout of your Interactive system	
OCP	2006/07	4

OCR 2006/07

D3	Detailed design Take plain or squared paper and give a detailed sketch for the design of your system - this should be a detailed sketch (<u>not</u> done on a computer) - remember you are doing this for the tourist board. Remember the PURPOSE of the task.	A02a A02b
	For Example What background colours will you use? What sized text and type of fonts - give reasons for your choice? Will you use buttons or boxes for the hyperlinks and graphics and scanned pictures for effect, see ClipArt on Blackboard. Collect a number of buttons, colours, images and fonts - put them in a Word document (could use a table) and discuss good and bad points - remember who will read the information on the interactive system (either web site or PowerPoint) - What about people with disabilities - how will they cope - give reasons.	

IMPLEMENTATION	
Documenting the building of the interactive system (either web site or Powerpoint)	
The best way of documenting your system is to screen shot (print screen) each page and use callouts to label all the features you have used. The callouts should include evidence of the following;	
 VERIFICATION (checking what was typed in was correct) and VALIDATION (errors in the data and not typing mistakes) checks The proof reading by you and/or someone else (an Editor / Web Master) is very important. 	

TESTING	
Test all the pages of your system and read the content carefully. Note any mistakes and highlight them using callouts.	
Ask a friend to test your system using an evaluation (questionnaire) you have created.	
Make Improvements	
Make any corrections and improvements to your system as identified above. You MUST document these improvements to gain high marks	

USER GUIDE	
User Guide	A02d
Produce USER documentation for the person/people who will be ADMINISTERING the site - make it as easy as possible - remember some people may not have much experience in interactive systems.	
Define TECHNICAL documentation - how will you train the personnel who will administer the system? Do not forget to use ICT terms and definitions appropriately - GIVE REASONS WHY .	
Test User Guide	
Ask a friend to test your user guide, and write down their comments.	

Refine your User Guide

Re-do your user guide in the light of comments made by your friend. **USE SCREEN SHOTS.**

EVALUATION	
Evaluate the performance of your system	A02c
Write justifying why ICT is better than other methods (including manual). Comments like EASIER, QUICKER etc. on their own are not specific enough - say HOW, WHY etc. You must relate your final system to your original analysis - write down detailed comments according to your view/opinion? (REMEMBER IT IS YOUR OPINION THEREFORE IT CANNOT BE WRONG!)	
Did the hardware/software selected limit the development of your system -give reasons why?	
Alternative methods of solving the problem rather than ICT	A02c
The xxxx Tourist Board could have used to promote itself. I think my solution was	
The benefits and drawbacks of my solution are	
The people who would most benefit are Benefits of using ICT	A03
Identify who would benefit from your system, for example	
The employees would benefit from my system because	
Customers would benefit from my system because	
Some of the problems with my system were/are	
ICT in the wider world	A04
I have compared my interactive system with xxxx company website / PowerPoint and have identified the following differences	
ICT will / may change the Tourist Industry in other ways, for example	
Jobs in all sorts of businesses are changing because of ICT. For example	
ICT comes at a cost. This is(training, flexible hours, working from home and purchase of hardware and software)
