## Uniform mark (UMS) guidance: an example GCSE Italian

## What are uniform marks and why do we use them?

Grade boundaries are set using raw marks. For each unit, raw marks are mapped to uniform marks. A GCSE qualification grade is determined from the unit uniform mark scores.

Uniform marks are used to ensure that the standard required to gain a particular unit score is the same from exam series to exam series.

Below we have exemplified what the use of uniform marks mean in GCSE Italian.
Abena \& Peter are both re-taking GCSE Italian Unit 1 in this exam series. Abena is re-taking the Higher tier. Peter is re-taking the Foundation tier.

Unit $1(5 / \mathrm{NO} 01 / 1 \mathrm{H})$ is out of 40 raw marks and has a total 60 UMS.
After they have sat the examination and their papers have been marked, Edexcel senior examiners recommend the raw mark grade boundaries as follows:

| Unit 1 Higher Tier | Max. <br> mark | $A^{*}$ | A | B | C | D | E | F | G | U |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Raw Mark boundary this <br> exam series | 40 | 36 | 32 | 28 | 24 | 20 | $(18)$ | - | - | 0 |
| Raw mark boundary last <br> exam series | 40 | 34 | 30 | 26 | 22 | 18 | $(16)$ | - | - | 0 |
| Uniform Mark boundary | 60 | 54 | 48 | 42 | 36 | 30 | $(27)$ | - | - | 0 |

## IMPORTANT NOTE:

*The raw boundary marks listed above are for illustration only to show how raw marks map to uniform marks in this subject area and should not be taken as the actual grade boundaries for the unit.

## Why are the raw marks boundaries different in this series compared to the last series?

You'll notice, for example, that at C on the Higher tier, the raw boundary mark was 22 last series; this series it is 24 . However, you will also notice that C will always have a uniform mark of 36 .

## Why do raw mark boundaries change?

Raw mark boundaries change from series to series since examination papers can vary in difficulty. Even though the raw mark boundaries have changed, the uniform mark for each grade boundary remains the same for all series. In this example, the reason for the different raw mark boundaries is that, in the last series, the paper was more demanding.

In the last examination series when Abena \& Peter took the exam for the first time the raw mark boundaries were higher. Abena scored 31/ 40 and Peter scored 29/ 40 in raw marks.

This series, Abena scores a raw mark of 26/ 40 and Peter scores $26 / 40$.

## Calculating Results - GCSE Italian Cash in code: 2INO1

Abena achieved 50 uniform marks in her original unit 1H resit. She has also taken units 2, 3 \& 4 in this series. For the resit she gained 39 uniform marks; a lower score. Since she has also taken units 2, $3 \& 4$ in this series, the better result can count as it is not needed to satisfy the $40 \%$ terminal requirement.

Sumita achieved:

| Unit | Uniform Mark |  |
| :--- | :--- | :--- |
|  | This series | Last series |
| 1 | 39 (resit) | 50 |
| 2 | 54 |  |
| 3 | 42 |  |
| 4 | 62 |  |

Abena's total score is $50+54+42+62=208$ uniform marks. With reference to the table below, she will achieve a grade C .

| Qualification Grade | $A^{*}$ | A | B | C | D | E | F | G |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Uniform mark grade <br> threshold | 270 | 240 | 210 | 180 | 150 | 120 | 90 | 60 |

For the Foundation tier, as with the Higher tier, the uniform marks are fixed but the raw mark boundaries are set in each examination series. Where there is no tiering (e.g. Units 2 and 4) the same principles apply, but the available grade range is from A*-G.

| Unit 1 Foundation Tier | Max. <br> Mark | A*$^{*}$ | A | B | C | D | E | F | G | U |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Raw Mark boundary this <br> exam series | 40 | - | - | $(33)$ | 30 | 26 | 22 | 18 | 14 | 0 |
| Raw mark boundary last <br> exam series | 40 | - | - | $(32)$ | 29 | 25 | 21 | 17 | 13 | 0 |
| Uniform Mark boundary | 60 | - | - | $(41)$ | 36 | 30 | 24 | 18 | 12 | 0 |

Peter has 36 uniform marks from his original unit 1 result. For his resit he gained 30 uniform marks; a lower score. Since he has also taken units $2,3 \& 4$ in this series, his better result can count as it is not needed to satisfy the $40 \%$ terminal requirement.

Peter achieved:

| Unit | Uniform Mark |  |
| :--- | :--- | :--- |
|  | This series | Last series |
| 1 | 30 (Resit) | 36 |
| 2 | 42 |  |
| 3 | 35 |  |
| 4 | 43 |  |

Peter's total score is $36+42+35+43=156$ uniform marks. With reference to the table below, he will achieve a grade D.

| Qualification Grade | A $^{*}$ | A | B | C | D | E | F | G |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Uniform mark grade <br> threshold | 270 | 240 | 210 | 180 | 150 | 120 | 90 | 60 |
