

Resources and support for GCSE Mathematics

Resources and support for GCSE Mathematics

We've devised a complete support package that's tailored to suit your needs and the interests and abilities of your students.

You can choose to:

- receive step-by-step guidance and support
- dip into our resources as you wish
- add our resources to your existing resources
- tailor our resources to suit your own needs and those of your students.

We'll save you time and help you get the best results for your students.

Using knowledge and experience from our maths pilots, along with extensive research, we've developed a tried-and-tested package of support and resources. So you can be confident that we'll provide all the information you need to save you time in adapting to the new maths specifications and give you more time to spend on teaching.

Don't miss out on any of our **free** resources and support. If you're teaching our GCSE specifications, make sure you sign up to teach and be kept up to date at aqa.org.uk/mathsnow

Have a look at the **FREE** resources available from the **AQA Maths pilots**, including:

- Specimen question papers and mark schemes
- Functional Maths information leaflet
- Functional Maths accredited specimen questions papers and mark schemes
- Pilot GCSE Additional Maths Teachers' Guide.

All available at aqa.org.uk/mathszone

Did you know...?

In March 2009, an Ofqual report stated that AQA offered the best telephone support over the summer exam period of all awarding bodies.

Resources and services
