Paper 1 Higher

# Final 

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

GCSE Mathematics Linear 4306/1H Mark Scheme Nov 2010
Glossary for Mark Schemes
GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

M Method marks are awarded for a correct method which could lead to a correct answer.

A Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied.

B Marks awarded independent of method.
Mdep A method mark dependent on a previous method mark being awarded.
B dep A mark that can only be awarded if a previous independent mark has been awarded.
ft Follow through marks. Marks awarded following a mistake in an earlier step.
SC Special case. Marks awarded within the scheme for a common misinterpretation which has some mathematical worth.
oe
Or equivalent. Accept answers that are equivalent.
eg, accept 0.5 as well as $\frac{1}{2}$

| Q | Answers | Mark | Comment |
| :---: | :---: | :---: | :---: |
| 5 | $8 \times 4.50$ or 36 | M1 | $4.50 \div 3$ or 1.50 |
|  | their $36 \div 3$ or 12 | M1 | $1.50 \times 8$ or 12 |
|  | $104.95 \div$ their 12 or $8.74 \ldots$ or their $12 \times 9$ | M1 | oe attempt at $104.95 \div$ their 12 (division seen) or their $12 \times n \geq 104.95(12 \times 9=108$ is enough) |
|  | 9 (weeks) | A1 |  |
|  | Note $104.95 \times 3 \div 4.50 \div 8=8.74 \ldots$ so two of these steps earns M1 M1 M0 A0 <br>  <br> eg. <br>  <br>  <br>  <br>  accept eg. 105 used for 104.95 in these calculations |  |  |

| $\mathbf{6}$ (a) | 14 | B1 |  |
| :--- | :--- | :--- | :--- |

| $\mathbf{6}$ (b) | 12 | B1 |  |
| :--- | :--- | :--- | :--- |

| $\mathbf{6}(\mathbf{c})(\mathbf{i})$ | straight line drawn from <br> $(1036,50)$ to $(1110,50)$ <br> and | B1 | allow curve |
| :--- | :--- | :--- | :--- |
| straight line drawn from $(1110,50)$ |  |  |  |
| to $(1150,0)$ |  |  |  |$\quad$| line need not be ruled |
| :--- |

| 6 (c) <br> (ii) | $50 \div 40(\times 60)$ | M1 | oe eg. $50 \div 2 \times 3$ or $25 \times 3$ |
| :---: | :--- | :---: | :--- |
|  | 75 | A 1 | SC 1 for $1.25(\mathrm{~km} / \mathrm{min})$ |

| 7 (a) (i) | correct front elevation |
| :--- | :--- |

B1

| 7 (a) <br> (ii) | correct side elevation | B1 | Must be elevation from RHS |
| :---: | :--- | :---: | :--- |

| 7 | $(5+5+3) \times 2$ | M1 | Look for evidence of adding six values, including two <br> 5 (b) |
| :--- | :--- | :---: | :--- |
|  | 26 | A1 | Must one 3, for this mark from adding the six correct values |
|  | $\mathrm{cm}^{2}$ | B1 |  |

| $\mathbf{8}$ (a) | $10 w-10(=15)$ or $w-1=1.5$ | B 1 |  |
| :---: | :--- | :---: | :--- |
|  | $10 w=15+10$ or $w=1.5+1$ | M 1 | ft from their 3 term equation $\ldots$ but not from $w-1=5$ |
|  | 2.5 | A 1 ft | SC 1 for 1.4 and 0.5 |

| 8 (b) | $(5 t+12=) 3 t+15$ | B1 |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $5 t-3 t=15-12$ or $2 t=3$ | M1 | allow 1 sign error | ft from their 4 term equation |
|  | 1.5 | A1ft | oe eg. $\frac{3}{2}$ A1ft only if no sign error in rearranging |  |
|  | $\begin{gathered} \text { eg. } 5 t+12=3 t+5 \rightarrow 2 t=-7 \rightarrow t=-3.5 \text { scores B0 M1 A1ft } \\ 5 t+12=3 t+5 \rightarrow 8 t=-7 \rightarrow t=-\frac{7}{8} \text { scores B0 M1 A0 } \end{gathered}$ |  |  |  |
