Instructions

- Use blue or black ink or ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer **all** questions in the spaces provided.
- Do all rough work in this booklet.
- If your calculator does not have a π button, take the value of π to be 3.14 unless otherwise instructed in the question.

Information

- The maximum mark for this paper is 100.
- Mark allocations are shown in brackets.
- Additional answer paper, graph paper and tracing paper will be issued on request and must be tagged securely to this answer booklet.
- You are expected to use a calculator where appropriate.

Advice

- In all calculations, show clearly how you work out your answer.

Formulae Sheet: Intermediate Tier

You may need to use the following formulae:

Area of trapezium = $\frac{1}{2}(a+b)h$

Volume of prism = area of cross-section \times length

Answer **all** questions in the spaces provided.

- 1 (a) Three cards are numbered 1, 3 and 4.
Three discs are numbered 2, 4 and 5.

A game consists of picking one card at random and one disc at random.
The numbers on the card and disc are added together.

- (i) Complete the table to show all the possible totals.

		Disc		
		2	4	5
Card	1	3
