Mathematics
Unit T6 Paper 2
(With calculator)
Higher Tier
[GMT62]

WEDNESDAY 15 JANUARY 10.45 am-12.00 noon

## TIME

1 hour 15 minutes, plus your additional time allowance.

## INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.
You must answer the questions in the spaces provided. Complete in blue or black ink only.
Answer all sixteen questions.
Any working should be clearly shown in the spaces provided since marks may be awarded for partially correct solutions. You may use a calculator for this paper.

## INFORMATION FOR CANDIDATES

The total mark for this paper is 50 .
Figures in brackets printed at the end of each question indicate the marks awarded to each question or part question. Functional Elements will be assessed in this paper. Quality of written communication will be assessed in question 10.
You should have a calculator, ruler, compasses and protractor.
The Formula Sheet is on pages 4 and 5 .

## BLANK PAGE

## (Questions start on page 6)

## Formula Sheet

Volume of prism $=$ area of cross section $\times$ length

Volume of sphere $=\frac{4}{3} \pi r^{3}$
Surface area of sphere $=4 \pi r^{2}$

## Quadratic Equation

The solutions of $a x^{2}+b x+c=0$
where $a \neq 0$, are given by
$x=\frac{-b \pm \sqrt{b^{2}-4 a c}}{2 a}$

Area of trapezium $=\frac{1}{2}(a+b) h$

Volume of cone $=\frac{1}{3} \pi r^{2} h$
Curved surface area of cone $=\pi r l$

In any triangle $A B C$

Sine Rule: $\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$
Cosine Rule: $a^{2}=b^{2}+c^{2}-2 b c \cos A$

Area of triangle $=\frac{1}{2} a b \sin C$

## 1 Divide £292 in the ratio 1:7 [2 marks]

Answer £ $\qquad$ and $£$

(a) Reflect the shape S in the line $\boldsymbol{x}=-1$ [1 mark]
(b) Draw the image of shape $S$ after a translation 5 right and 4 down. [1 mark]

3 (a) This spinner is a regular octagon.

The spinner is spun 60 times.
How many times would you expect it to land on a number greater than 2? [2 marks]

Answer $\qquad$
(b) A box contains a number of packets of crisps of different flavours.
A packet of crisps is taken at random from the box. Some of the probabilities of taking each flavour are shown in the table below.

| Flavour | Cheese | Vinegar | Bacon | Sausage | Beef |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Probability | 0.3 | 0.12 |  | 0.25 | 0.05 |

Calculate the probability that the crisps are Bacon flavour. [2 marks]

Answer $\qquad$

4 Three friends share a flat. Martin claims 1 in 20 phone calls to the flat are for him. Peter claims that the probability a phone call is for him is 0.4

Noel claims $60 \%$ of the phone calls are for him.
(a) Explain why their claims cannot be correct. [1 mark]
(b) Martin and Noel are correct.

Calculate the probability that a phone call is for Peter. [1 mark]

Answer $\qquad$

5 Katie went on a cycling trip from her home.
The diagram below shows the distance/time graph for her complete journey.

(a) What was the average speed for the first 30 minutes? [1 mark]

Answer $\qquad$ km/h
(b) At what stage of the trip was she travelling at the fastest average speed? [1 mark]

Answer $\qquad$
(c) After how many minutes had she travelled a distance of 14 kilometres? [1 mark]

Answer $\qquad$ minutes

6 Work out the value of $y^{2}-4 y$ when $y=-3$ [2 marks]

Answer $\qquad$

7 A solid hexagonal prism of mass 8600 g has a cross-sectional area of $60 \mathrm{~cm}^{2}$ and length 23 cm .

Calculate the density of the prism in g/cm ${ }^{3}$. [4 marks]
Give your answer to an appropriate degree of accuracy.

Answer $\qquad$ $\mathrm{g} / \mathrm{cm}^{3}$

8 (a) Solve the inequality $5 x+4>11$ [2 marks]

## Answer

$\qquad$
(b) Illustrate your answer to part (a) on the number line below. [1 mark]

9 A pencil holder is in the shape of an open-topped cylinder with radius 5 cm and height 14 cm . Find the total surface area of the cylindrical pencil holder. [3 marks]

Answer $\qquad$ $\mathrm{cm}^{2}$

## Quality of written communication will be assessed in this question.

10 In a school there are 340 pupils, of which 180 are boys. The total number of pupils in the Sports Club is 164 The probability that a boy is a member of the Sports Club is 0.6

Calculate the probability that a girl in the school is a member of the Sports Club. [4 marks]

Answer

11 The probability that I stay up late on a Saturday night is $\frac{3}{4}$ When I stay up late, the probability that I lie in on Sunday morning is $\frac{2}{3}$
When I do not stay up late on Saturday night, then the probability that I lie in on Sunday morning is $\frac{1}{5}$
(a) Complete the tree diagram. [2 marks]

(b) Calculate the probability that I Iie in on a Sunday morning. [2 marks]
$\qquad$

12 (a) On the grid below, show by shading and the letter R, the region which satisfies all the inequalities. [3 marks]
$x \geqslant 1$
$y \geqslant x$
$x+2 y \leqslant 6$

(b) Work out the greatest value of $2 x+y$ in the region R above. [2 marks]

Answer $\qquad$

13 (a) Write 0.0000473 in standard form. [1 mark]

Answer $\qquad$
(b) Write $3.6 \times 10^{-12}$ in decimal form. [1 mark]

Answer

14 Rationalise the denominator of $\frac{10}{\sqrt{5}}$ [2 marks]

Answer $\qquad$

15 The diagram below shows a large cone of radius 4 cm and height 12 cm and a small cone with height $\boldsymbol{h}$.

The volume of the large cone is three times the volume of the small cone.

Calculate the height $\boldsymbol{h}$ of the small cone. [4 marks]

$\qquad$

16 Prove that $\frac{p+r}{p r}-\frac{p+q}{p q} \equiv \frac{q-r}{q r}$ [4 marks]
