Paper 3 (Higher Tier)

Candidates answer on the Question Paper

OCR Supplied Materials:

None

Other Materials Required:

- · Geometrical instruments
- Tracing paper (optional)

Duration: 1 hour 45 minutes

Candidate Forename				Candidate Surname				
Centre Numbe	er				Candidate Nur	mber		

INSTRUCTIONS TO CANDIDATES

- Write your name clearly in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure that you know what you have to do before starting your answer
- Your answers should be supported with appropriate working. Marks may be given for a correct method even if the answer is incorrect.
- Answer all the questions.
- Do **not** write in the bar codes.
- Write your answer to each question in the space provided.

INFORMATION FOR CANDIDATES

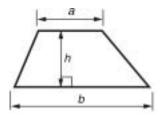

- The number of marks is given in brackets [] at the end of each question or part question.
- Your Quality of Written Communication is assessed in questions marked with an asterisk (*).
- The total number of marks for this paper is 100.
- This document consists of 24 pages. Any blank pages are indicated.

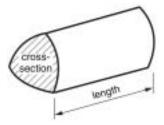

OCR is an exempt Charity SPECIMEN

Formulae Sheet: Higher Tier

Area of trapezium = $\frac{1}{2}(a+b) h$

Volume of prism = (area of cross-section) × length

In any triangle ABC

Sine rule
$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$$

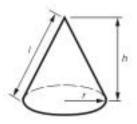

Cosine rule $a^2 = b^2 + c^2 - 2bc \cos A$

Area of triangle =
$$\frac{1}{2}ab\sin C$$

Volume of sphere $=\frac{4}{3}\pi r^3$ Surface area of sphere $=4\pi r^2$

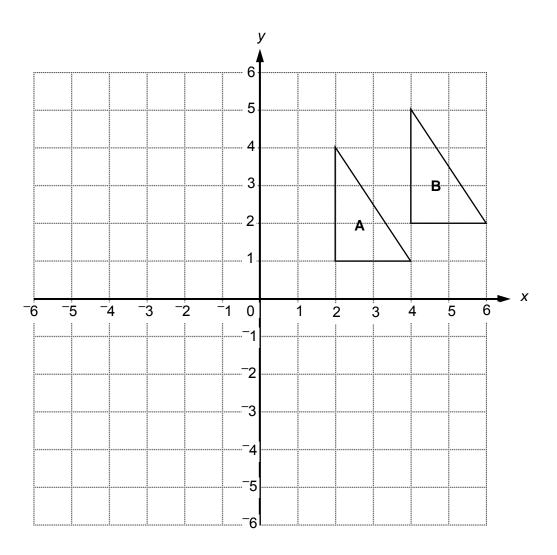

The Quadratic Equation

The solutions of $ax^2 + bx + c = 0$, where $a \neq 0$, are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

PLEASE DO NOT WRITE ON THIS PAGE

1

(a) Rotate triangle **A** by 90° clockwise about the origin. Label the image **C**.

[3]

(b) Describe fully the single transformation that maps triangle A onto triangle B.

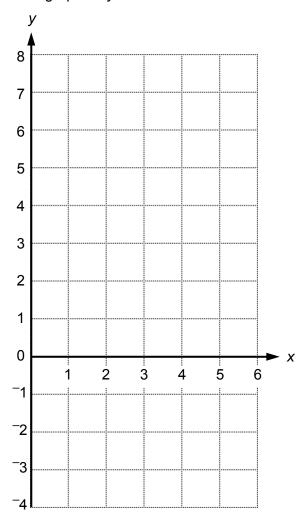

_ [2]

2 (a) Complete this table for y = 7 - 2x.

Х	0	2	4
У	7		

[1]

(b) Draw the graph of y = 7 - 2x.

[2]

(c) Use your graph to find the value of x when y = 0.

(c) x = [1]

3 *

Sunidra estimates that she needs $1\frac{1}{2}$ litres of milk each day. Milk is sold in 2, 4 and 6 pint bottles, as shown above. Sunidra wants to buy enough milk to last for a week.

Advise Sunidra which bottles of milk she should buy for the whole week.

[6]

1	(a) Pearrange	each of these	formulae to	make h	the subject
4	(a) Realiange	each of these	ioiiiiulae lo	make n	the Subject.

(i)
$$P = 3h - 5$$

(a)(i)
$$T = 2(h + w)$$

(b) Solve this inequality and represent your solution on the number line.

$$6x \ge 2x - 8$$

[3]

5	(a)	Estimate	the	answer	to	this	calculation.
J	(a,	Louinate	uic	answei	w	นเมื	calculation.

$$\frac{17.5\times3.8}{0.483}$$

(b) Explain how you can tell that the following answer must be wrong.

$$(4.1 \times 10^7) \times (4.8 \times 10^{15}) = 1.968 \times 10^{22}$$

6 A bag contains only red, green, blue and yellow counters. A counter is taken from the bag at random. Some probabilities for this are shown in the table.

Colour	Red	Green	Blue	Yellow
Probability	0.25	0.15		0.4

(a)	Find the pr	obability tha	t the counte	r is green o	r yellow.	
(b)	Find the pr	obability of t	aking a blue	e counter.	(a)	[1]
(2)	i ind the pr	obasimty of t	aning a blue	, deamer.		
					(b)	[2]

7 Abbie is making a lottery machine for her school. It contains five balls, numbered from 1 to 5. It has to work so that each ball has an equal probability of being selected. She tests the machine by using it 50 times. Here are her results.

Number	Relative Frequency
1	0.12
2	0.28
3	0.20
4	0.24
5	0.16

(a)	If Abbie	repeated t	his test	, would	she	get the	same	results	;?
	Explain	your answ	er.						

		[1]
		נייו
(b)	Make two comments about the results of Abbie's test.	
	1	
	2	
		[2]

8 (a) Calculate the interior angle of a regular pentagon.	
	(a)° [2
(b) Use your answer to part (a) to explain why regular p	pentagons do not tessellate.
	[1]
	[i1.
9 Here are the first four terms of a sequence.	
7 13 19	25
(a) Explain why 286 cannot be in this sequence.	
	[1]
(b) Write an expression for the <i>n</i> th term of this sequence	e.
	(b)[2

10	As a pr	oduct of prime factors,	
		$24 = 2 \times 2 \times 2 \times 3$.	
	(a) Write	e 40 as a product of prime factors.	
		(a)	[2]
	(b) (i)	Work out the highest common factor (HCF) of 24 and 40.	
		(b)(i)	[2]
	(ii)	Work out the lowest common multiple (LCM) of 24 and 40.	
		(ii)	[2]

11 A garage displays this sign.

Sale 15% off all car prices

(a) The original price of one car is £8640.

Calculate its sale price.

(a)	£	[3]
(a)	<u>ــــــــــــــــــــــــــــــــــــ</u>	[၁]

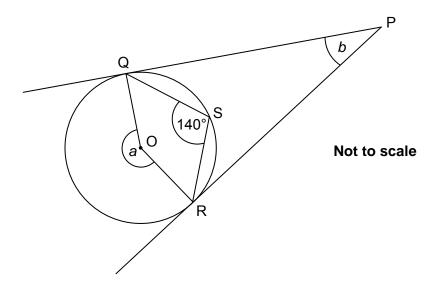

(b) Hidetoshi sees this sign on a different car at the garage.

was £12 800 now reduced by £2000

Does the offer on this car match the 15% sale at the garage?

_____[3]

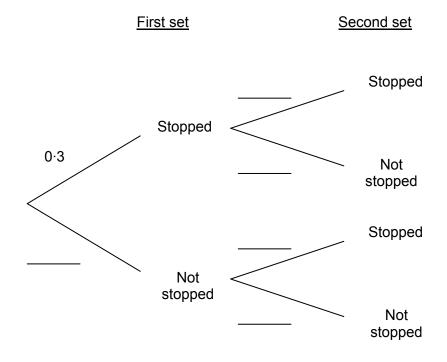

12 In this diagram, O is the centre of the circle.PQ and PR are tangents.S is a point on the circumference of the circle.Angle QSR = 140°.

Calculate angles a and b.

a =	0
b =	° [3]

- 13 There are two sets of traffic lights on Dwayne's journey home. The probability that he is stopped at the first set of lights is 0·3. The probability that he is stopped at the second set of lights is 0·4. These probabilities are independent.
 - (a) Complete the tree diagram to represent this information.

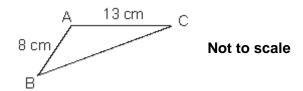

(b) What is the probability that Dwayne is **not** stopped at either set of lights?

(b) _____[2]

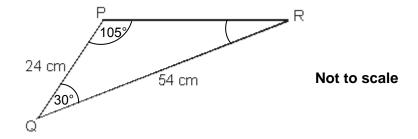

[2]

14 Triangle ABC is the logo for *Linsdell's Laundry*.

Linsdell's Laundry wants to print copies of this logo, as well as an enlarged version to go on the side of their van.

The enlarged version is triangle PQR below.

They need to tell the printers the measurements of **all** the sides and angles of both logos.

Show clearly what information *Linsdell's Laundry* should give to the printers.

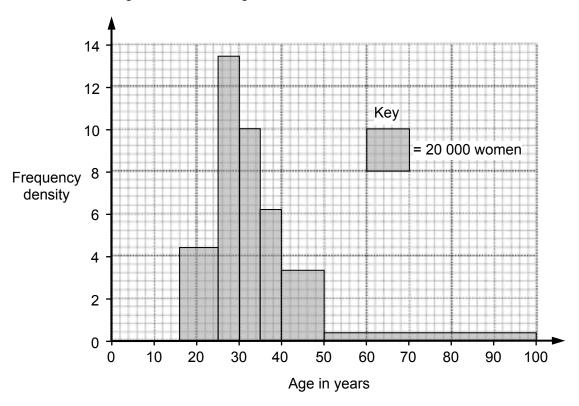

[7]

15 In 2006 there were approximately 240 000 marriages in England and Wales.

This table shows the age distribution for the **men** who married in 2006 in England and Wales.

Age (n years)	Frequency (thousands)
16 ≤ <i>n</i> < 25	21
25 ≤ <i>n</i> < 30	57
30 ≤ <i>n</i> < 35	56
35 ≤ <i>n</i> < 40	37
40 ≤ <i>n</i> < 50	40
50 ≤ <i>n</i> <100	29

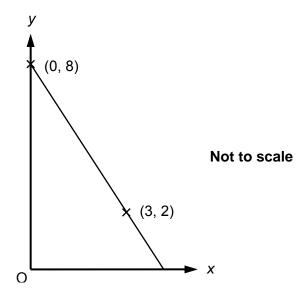

This histogram shows the age distribution for the women who married in 2006.

Use the table and the histogram to decide whether these statements are true, or false, or whether there is not enough information to decide.

(a) The oldest woman wa	as 99 when she married.		
Tick (✓) the correct b	OX.		
True	False	Not enough information	
Explain your answer.			
			[1]
(b) About half the womer Tick (✓) the correct b	n were aged between 25 and ox.	l 35 when they married.	
True	False	Not enough information	
Explain your answer.			
			[2]
	n men aged under 25, and n men aged 50 and over.		
True	False	Not enough information	
Explain your answer.			
			[2]

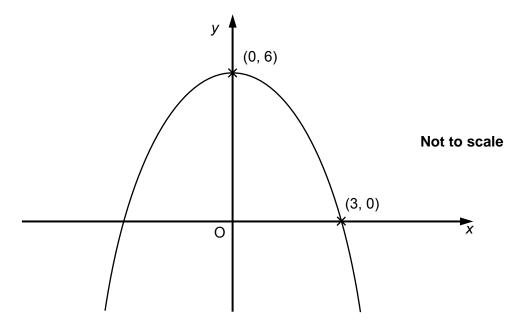

16 A line goes through the points (0, 8) and (3, 2).

Find the equation of this line.

_____[3]

17 This is a sketch of the function y = f(x), which is symmetrical about the y-axis.

Using the same axes, sketch the graph of the function y = f(x - 2), showing the coordinates of the points where the new graph crosses the *x*-axis.

[3]

18 Solve.

$$\frac{3x+7}{4} + \frac{x-1}{2} = 15$$

19 Bishopfield School has students from Year 7 to Year 13. Nada is conducting a survey about leisure activities at the school. She decides to interview a representative stratified sample of 40 students.

In Year 7 to Year 9 there are 450 students in total. In Year 10 and Year 11 there are 350 students in total. In Year 12 and Year 13 there are 200 students in total.

How many students should Nada interview from Year 12 and Year 13?

[2]

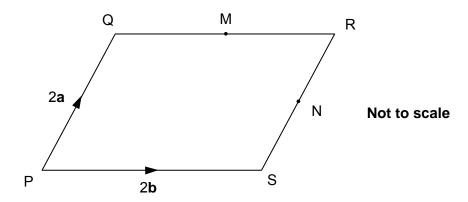

20 The expression $\left(\frac{a^4}{b^2}\right)^{\frac{1}{2}} \times a^5$ can be simplified to $a^x b^y$ where x and y are integrated as $a^x b^y = a^x b^y = a^x$	gers.
---	-------

Find the values of *x* and *y*.

21 PQRS is a parallelogram.

M is the midpoint of QR and N is the midpoint of RS.

$$\overrightarrow{PQ} = 2\mathbf{a}, \overrightarrow{PS} = 2\mathbf{b}.$$

- (a) Find, in terms of a and b,
 - (i) \overrightarrow{QS} ,

(a)(i)
$$\overrightarrow{QS} =$$
_____[1]

(ii) \overrightarrow{MN} .

(ii)
$$\overrightarrow{MN} =$$
_____[1]

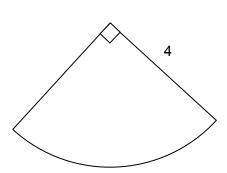

(b) What is the relationship between the line segments QS and MN? Use vectors to justify your answer.

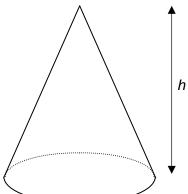

_____[2

22 (a)	Write	$x^2 + 10x - 12$	in the form $(x+a)^2$	+ b.	
				(a)	[3]
(b)) Simpli	fy.			
	$\frac{x}{2}$	$\frac{x^2 - 25}{2x + 10}$			
				(b)	[3]

TURN OVER FOR QUESTION 23

23 The sector below is the net for the curved surface of the cone. All lengths are in centimetres.

(a) Calculate *h*, the height of the cone. Give your answer in exact form.

(a)	\	cm	[5]	ı
14			L_{Λ}	L

(b) A mathematically similar sector has radius 8 cm.

Find the height of the cone that can be made from this sector.

(b)_____cm [2]

Paper 3 (Higher Tier)

Specimen Mark Scheme

The maximum mark for this Paper is **100**.

© OCR 2010 SPECIMEN Turn over

SP (SLM) T12103

1	(a) Correct rotation to triangle with vertices (1, -2), (4, -2), (1, -4)	3	B2 for rotation 90° anticlockwise about origin OR B1 for rotation 90° clockwise about incorrect centre
	(b) Translation [2] [1]	1	Accept "2 right 1 up"
2	(a) 3 and $^-$ 1	1	Both correct
	(b) Points correctly plotted Ruled line through (0, 7) and (4, ⁻ 1)	1 1	ft their (a) Correct line only
	(c) 3·4 - 3·6	1	

3* Complete correct calculation to find $18\frac{3}{8}$ pints required, and rounds up to

20. Indicates with correct and clear language that as the bottles have the same unit cost it does not matter which combination is chosen, and gives at least one combination for 20 pints.

Correct method but incomplete or containing a minor error - but if followed without errors, would lead to $\frac{147}{8}$ or $18\frac{3}{8}$. Provides a brief comment saying that it does not matter which combination is chosen but without a clear reason. Gives a combination for *their* answer.

Correctly converts both mixed numbers to improper fractions, or correctly multiplies one of the mixed numbers by 7 and attempts to multiply the result by the other fraction. Weak comment concerning the price of the bottles.

No relevant calculations or comments.

6-5 For the lower mark, there may be one minor slip in the arithmetic at any stage, or weaker explanation.

Examples of combinations:

6, 6, 6, 2

6. 6. 4. 4

6, 6, 2, 2, 2, 2

6. 4. 4. 4. 2

6, 4, 4, 2, 2, 2

6, 2, 2, 2, 2, 2, 2

4, 4, 2, 2, 2, 2, 2, 2

2, 2, 2, 2, 2, 2, 2, 2, 2

Example of working:

 $1\frac{1}{2} = \frac{3}{2}$ and $1\frac{3}{4} = \frac{7}{4}$

 $\frac{3}{2} \times \frac{7}{4} = \frac{21}{8}$

 $\frac{21}{8} \times 7 \text{ (days)} = \frac{147}{8}$

 $18\frac{3}{8}$

4-3 For the lower mark, more than one error is present in the working, **or** comment is missing or has several errors in spelling, punctuation and grammar, **or** no combination for *their* answer.

For the lower mark, as 2 but with errors in the conversion or in the multiplication, or limited comment which may have poor spelling, punctuation and grammar.

Mathematics B Paper 3 (Higher Tier)

	Topic	Context	Ref	AO1	AO2	AO3	Functional
1	Transformations		HIG6	5			
2	Draw straight-line graph		HIA4	4			
3	Calculations with mixed numbers	Milk	HBN2			6	6
4	Change subject of formulae; solve inequality		HBA2 HBA3	7			
5	Estimate answer to calculation		HBN5 HSN3	3			
6	Mutually exclusive probability	Counters	HIS1		3		
7	Relative frequency	Lottery machine	HBS1		3		
8	Angle in pentagon; tessellating		HBG3	3			
9	Sequence		HBA1	3			
10	Prime factors, HCF, LCM		HBN6	6			
11	Percentages	Selling cars	HBN4		6		3
12	Geometrical calculation		HSG1	3			
13	Probability with tree diagram	Traffic lights	HSS1		4		2
14	Similar triangles	Company logo	HSG5		7		7
15	Interpreting table and histogram	Marriage statistics	HGS2 HGS3		5		5
16	Find equation of line		HSA7	3			
17	Transforming graph		HGA6	3			
18	Algebraic fraction equation		HSA1	4			
19	Stratified sampling	School	HGS4		2		2
20	Laws of indices		HGN1	3			
21	Vectors	Parallelogram	HGG5	2		2	
22	Completing the square; simplifying		HGA2, HSA2	6			
23	Mensuration of sectors and cones		HGG4			7
