

OXFORD CAMBRIDGE AND RSA EXAMINATIONS
General Certificate of Secondary Education

MATHEMATICS C
(Graduated Assessment)

1966/2336B

MODULE M6 – SECTION B

Monday **23 JANUARY 2006** Morning 30 minutes

Candidates answer on the question paper.

Additional materials:

- Geometrical instruments
- Tracing paper (optional)
- Scientific or graphical calculator

Candidate
Name

TIME 30 minutes

INSTRUCTIONS TO CANDIDATES

- Write your name, Centre number and candidate number in the boxes above.
- Answer **all** the questions.
- Write your answers on the dotted lines unless the question says otherwise.
- Use blue or black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure you know what you have to do before starting your answer.
- There is a space after most questions. Use it to do your working. In many questions marks will be given for a correct method even if the answer is incorrect.
- Do not write in the bar code. Do not write in the grey area between the pages.
- **DO NOT WRITE IN THE AREA OUTSIDE THE BOX BORDERING EACH PAGE. ANY WRITING IN THIS AREA WILL NOT BE MARKED.**

INFORMATION FOR CANDIDATES

- You are expected to use a calculator in Section B of this paper.
- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this Section is 25.
- Section B starts with question 7.
- Use the π button on your calculator or take π to be 3.142 unless the question says otherwise.

FOR EXAMINER'S USE	
Section B	

This question paper consists of 6 printed pages and 2 blank pages.

Formula Sheet

Area of trapezium = $\frac{1}{2} (a + b)h$

7 (a) Calculate.

$$13.8 - \frac{5.75}{4.6}$$

(a)[1]

(b) Calculate.

$$1.27^3$$

Give your answer correct to 2 decimal places.

(b)[2]

3

8 (a) The equation of a curve is $y = 2x^2 - 6$.

Work out the value of y when

(i) $x = 3$,

(a)(i)[1]

(ii) $x = -4$.

(ii)[1]

(b) Factorise.

$$2x^2 - 6$$

(b)[1]

3

[Turn over

In the diagram FAB is a straight line.
BE is parallel to DC.

- (a) Work out angle x .
Give a reason for each step of your working.

$x = \dots\dots\dots^\circ$ because $\dots\dots\dots$
 $\dots\dots\dots$
 $\dots\dots\dots$ [3]

- (b) Work out angle y .
Give a reason for your answer.

$y = \dots\dots\dots^\circ$ because $\dots\dots\dots$
 $\dots\dots\dots$
 $\dots\dots\dots$ [2]

5	
---	--

10 (a) In a lottery, Martin won £1800 and Pat won £4200.

Work out the ratio of Martin's winnings to Pat's winnings.
Give your answer in its simplest form.

(a) : [2]

(b) Marion and Peter won £650 in a raffle.
They shared the £650 between them in the ratio 1 : 4.

How much was Peter's share?

(b) £ [2]

4

11

The picture shows a circular coffee table.
The radius of the top of the table is 55 cm.

Calculate the area of the top of the table.
Give the units of your answer.

..... [3]

3

[Turn over

- 12 Hanif is playing a game with a **biased** four-sided dice.
The faces are numbered from 1 to 4.

The table shows the probabilities of the dice landing on the numbers 1 to 3.

Number	1	2	3	4
Probability	0.27	0.43	0.19	

Work out the probability of the dice landing on 4.

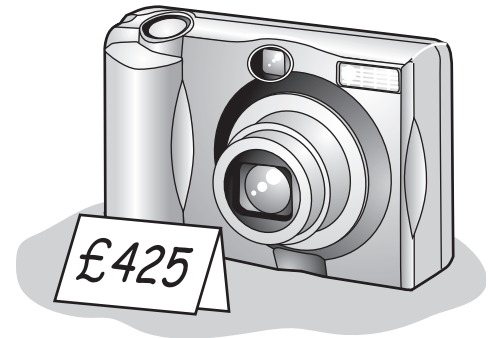

.....[2]

2

- 13 The cash price of a camera is £425.

Here are the credit terms.

<p>Deposit 23% of the cash price PLUS 12 monthly payments of £31.50</p>

How much **more** is the **total** credit price than the cash price?

£[5]

5
