## GCSE LINKED PAIR PILOT

## WJEC CBAC

## 4362/01

## APPLICATIONS OF MATHEMATICS <br> UNIT 2: Financial, Business and Other Applications FOUNDATION TIER

A.M. THURSDAY, 20 June 2013<br>$1 \frac{1}{2}$ hours

## ADDITIONAL MATERIALS

A calculator will be required for this paper.

## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer all the questions in the spaces provided.
Take $\pi$ as $3 \cdot 14$ or use the $\pi$ button on your calculator.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.
Unless stated, diagrams are not drawn to scale.
Scale drawing solutions will not be acceptable where you are asked to calculate.
The number of marks is given in brackets at the end of each question or part-question.
You are reminded that assessment will take into account the

| For Examiner's use only |  |  |
| :---: | :---: | :---: |
| Question | Maximum <br> Mark | Mark <br> Awarded |

## Formula List

Area of trapezium $=\frac{1}{2}(a+b) h$

Volume of prism $=$ area of cross-section $\times$ length

1. Maurice runs the French Café.

He wants to place an order for the goods that he sells.
The costs of the goods are shown below.

| Croissants 10 pence each | Cheese $£ 6.92$ | Pain au chocolat <br> 32 pence each |
| :--- | :--- | :--- |
| Coffee $£ 1.52$ |  |  |

(a) (i) Complete the order for Maurice to find the total cost of the goods.

| Goods | Quantity | Cost |
| :---: | :---: | :---: |
| Croissants | 15 | $£ 1.50$ |
| Cheese | 1 | $£$ |
| Pain au chocolat | 10 | $£$ |
| Coffee | 4 | $£ 6.08$ |
| Bread | 10 | $£ 9.90$ |
| Jam | 5 | $£$ |
|  | TOTAL COST | $£$ |

(ii) The company, which supplies Maurice's goods, offers him a discount of $15 \%$ of the total cost of his order.
How much discount does he receive?
(b) Maurice sells the pains au chocolat for 62 pence each.

Melodie has $£ 5$ to buy as many pains au chocolate as she can from Maurice.
(i) How many pains au chocolat can Melodie buy?
(ii) How much change will she receive?
(c) The following table shows the number of drinks that Maurice sold on a Saturday morning.

| Drink | Tea | Coffee | Fizzy Drink | Orange Juice | Bottled water |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Number sold | 12 | 16 | 20 | 7 | 11 |

Draw a graph or chart to display this information.

(d) Maurice knows that 7 boxes of bottled water will cost him less than $£ 65$.

What is the greatest possible cost of one box of bottled water?
Give your answer to the nearest pound.
2. Every week, Sarah does her family shopping on the Internet. She has to be careful to order things in the correct quantities.

The following table shows the items and quantities that Sarah has ordered.
Place a ' $\mathbf{X}$ ' by the items that do not appear to have a sensible quantity and a ' $\sqrt{ }$ ' by those that do. Two have been completed for you.

| Item | Quantity | $\times$ or $\checkmark$ |
| :---: | :---: | :---: |
| Orange juice | 2 litres | $\checkmark$ |
| Mushrooms | 50 kilograms |  |
| A bag of sugar | 1 kilogram |  |
| Tomato sauce | 350 litres | $\times$ |
| Potatoes | 5 grams |  |
| Large chocolate bar | 100 grams |  |
| Bottle of vinegar | 250 millilitres |  |
| Butter | 500 grams |  |
| Milk | 500 litres |  |
| Washing-up liquid |  |  |

$\mathbf{A}=$
kg
$\mathbf{B}=$
kg
$\mathrm{C}=$ $\qquad$ kg
6. (a) You will be assessed on the quality of your written communication in this part of the question.

The table below shows the room-only costs for a 7-night holiday to Menorca, Spain. The table shows different arrival dates for August.

| Arrival date | Price per adult (£) | Price per child <br> Aged 5-16 (£) |
| :---: | :---: | :---: |
| August 1, 8 | 486 | 203 |
| August 3, 10, 17 | 498 | 219 |
| August 15, 22 | 512 | 226 |
| August 24 | 475 | 199 |

## Supplements

## Price per person per night

Sea view $£ 4$
Bed and breakfast £8
Half board £18
All Inclusive £25

All children under the age of 5 go free and do not have to pay for any supplements.

- Mr and Mrs Edwards book a 7-night holiday to Menorca for themselves and their 3 children.
- Their three children are aged 13,8 and 4 .
- They decide to book the holiday with an arrival date of 10 August.
- They have chosen to book rooms with a sea view.
- They also decide to have the all-inclusive package for the whole family.

[^1](b) The holiday company records the number of families that stay at certain hotels in Menorca. The following table shows these hotels and the number of families that stayed there during the week commencing 10 August.

| Hotel | Viva Menorca | Hamilton <br> Hotel | Fiesta Hotel | Sol Menorca |
| :---: | :---: | :---: | :---: | :---: |
| Number of <br> families | 62 | 54 | 40 | 84 |

Draw a pie chart to illustrate these results.
You should show how you calculate the angles of your pie chart.

8. The following section of a flowchart is used to find the entry fee for an Aqua Park.

Use this section of the flowchart to find the Aqua Park entry fee for each of the following customers.
Howard, aged 20
$\qquad$

Betty, aged 10
$\qquad$

Charlie, aged 6
9. Billy and Shaun both completed a survey.

They collected leaves from a number of trees and decided to measure them.
They agreed on the following decisions.

- The length of the leaf does not include the stem.
- The width of the leaf is measured at the widest section of the leaf.

(a) Why have they both agreed on these decisions about measuring the leaves?
(b) Billy measured the length and width of each leaf he had collected.

Shaun did the same with his leaves.
They displayed the lengths and widths of their own leaves on separate scatter diagrams. Billy's scatter diagram is shown below and Shaun's scatter diagram is shown opposite.
$\qquad$
$\qquad$

(i) Who found the longest leaf?

Write down the length of this leaf. cm
(ii) One of the two boys collected leaves from a variety of trees. Who was this, Billy or Shaun? Give a reason for your answer.
$\qquad$
$\qquad$
(iii) Draw, by eye, a line of best fit on Shaun's scatter diagram.
(iv) Shaun realises he has one more leaf that he has not included on his scatter diagram. The leaf is damaged in such a way that Shaun cannot measure its width.
The leaf is of length 8.5 cm .
Write down a reasonable estimate for the width of this leaf.
$\qquad$ cm
10. Laura has her own car.

During April

- Laura drove a total distance of 560 miles in her car.
- Her car's fuel consumption was 37.8 mpg (miles per gallon).
- Petrol cost $£ 1.48$ per litre.
(a) Given that 1 gallon is approximately 4.55 litres, calculate the cost of the petrol that Laura used during April.
You must show all your working.
$\qquad$
$\qquad$

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

[^3](ii) Select which of the following best describes the roads on which Laura travelled during April.

You must give a reason for your answer.
A: Mainly small narrow country lanes
B: Mainly inner city roads with lots of traffic lights
C: Mainly motorways and dual carriageways
D: Mainly steep mountain routes with many sharp bends
E: Mainly roads with speed limits of 30 mph
Reason:
11. A plate manufacturer wishes to design a pattern to be printed on a new circular dinner plate. They consider three possible designs as shown below.

Rings

Petals

Legs

The new design must satisfy the following criteria.

## Given that

$n=$ the number of lines of symmetry
$r=$ the order of rotational symmetry
then $n>2$ and $r-n=0$
Complete the following table.

| Design | $n$ | $r$ | Satisfies the criteria? <br> Yes or No |
| :---: | :---: | :---: | :---: |
| Rings |  |  |  |
| Petals |  |  |  |
| Legs |  |  |  |

12. Abbiford Computers sells computer systems.

Their customers are Internet businesses and town centre shops.
All customers are given access to a helpline when they are setting up a new computer system. Abbiford Computers carried out a survey to find the number of times each customer called the helpline.
The stem-and-leaf diagram shows the results of the survey.

Key: Internet businesses 3 | 2 means 23 calls Town centre shops $1 \mid 8$ means 18 calls
(a) Complete the following table.

|  | Median | Range | Mode |
| :---: | :---: | :---: | :---: |
| Internet <br> businesses |  |  |  |
| Town centre <br> shops |  |  |  |

[^0]:    Examiner
    3. Gethin wants to organise a mountain walk in the Brecon Beacons with his 3 friends Chloe, Robert and Martyn during 2014.
    He has the following information:

    - He (Gethin) can only go on a Sunday;
    - Chloe cannot go during the last 4 months of the year;
    - Martyn works on the first 3 Sundays of each month;
    - Robert cannot go during the school holidays;
    - All his friends agree that the months of November, December and January are unsuitable for the walk.

[^1]:    Showing all your working, calculate the total amount that they pay for their 7-night holiday.

[^2]:    (c) The holiday company performs the following calculation to work out the percentage of hotel rooms that were occupied.

    $$
    \frac{635 \times 100}{200+180+75+225}
    $$

    Calculate this percentage, giving your answer correct to 1 decimal place.

[^3]:    (b) (i) Laura spent 10 hours 45 minutes driving during April.

    Calculate the average speed of Laura's car for the distance driven during April. Give your answer in miles per hour.
