

**Thursday 19 January 2012 – Afternoon**

**GCSE METHODS IN MATHEMATICS**

**B391/02 Methods in Mathematics 1 (Higher Tier)**

\* B 3 1 6 9 4 0 1 1 2 \*

Candidates answer on the Question Paper.

**OCR supplied materials:**

None

**Other materials required:**

- Geometrical instruments
- Tracing paper (optional)

**Duration: 1 hour 15 minutes**

Candidate forename					Candidate surname				
--------------------	--	--	--	--	-------------------	--	--	--	--

Centre number						Candidate number			
---------------	--	--	--	--	--	------------------	--	--	--

**INSTRUCTIONS TO CANDIDATES**

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer **all** the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Your answers should be supported with appropriate working. Marks may be given for a correct method even if the answer is incorrect.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Do **not** write in the bar codes.

**INFORMATION FOR CANDIDATES**

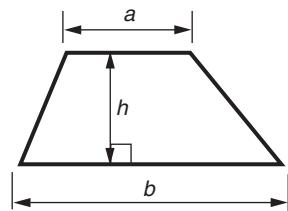

- The number of marks is given in brackets [ ] at the end of each question or part question.
- Your Quality of Written Communication is assessed in questions marked with an asterisk (\*).
- The total number of marks for this paper is **60**.
- This document consists of **16** pages. Any blank pages are indicated.

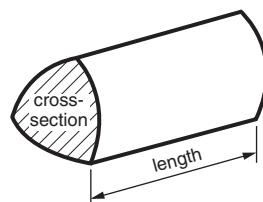

This paper has been pre modified for carrier language

## Formulae Sheet: Foundation Tier

**Area of trapezium** =  $\frac{1}{2} (a + b)h$

**Volume of prism** = (area of cross-section)  $\times$  length

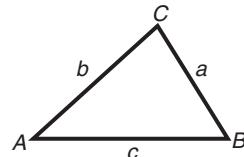

In any triangle  $ABC$

**Sine rule**  $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

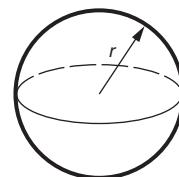

**Cosine rule**  $a^2 = b^2 + c^2 - 2bc \cos A$

**Area of triangle** =  $\frac{1}{2} ab \sin C$

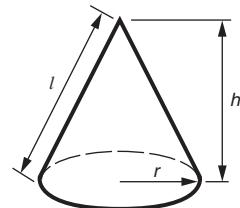

**Volume of sphere** =  $\frac{4}{3}\pi r^3$

**Surface area of sphere** =  $4\pi r^2$

**Volume of cone** =  $\frac{1}{3}\pi r^2 h$

**Curved surface area of cone** =  $\pi r l$

### The Quadratic Equation

The solutions of  $ax^2 + bx + c = 0$ , where  $a \neq 0$ , are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

**PLEASE DO NOT WRITE ON THIS PAGE**

1 Work out.

(a)  $29.4 \div 1.4$

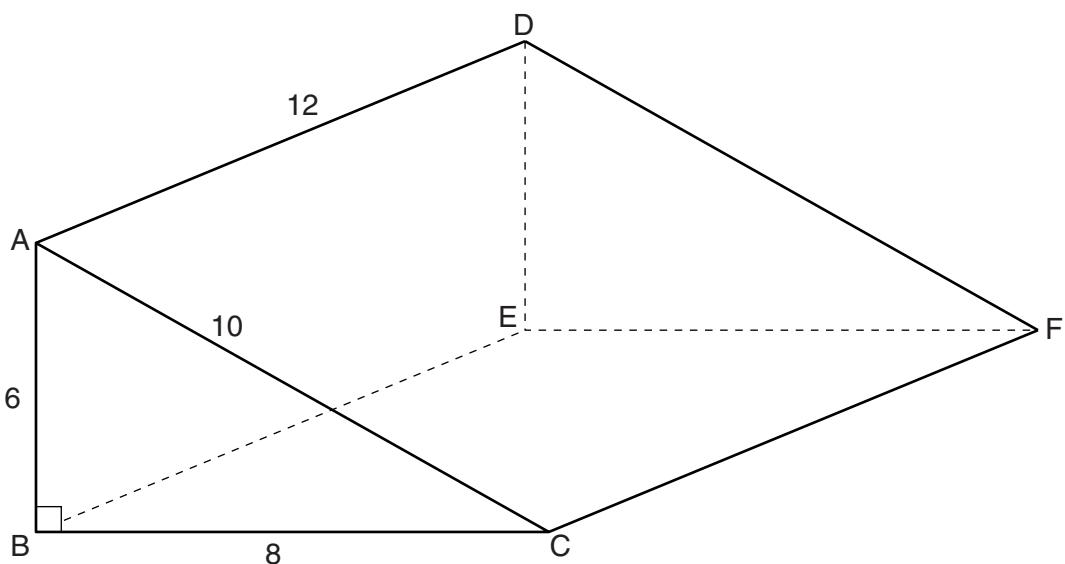

(a) \_\_\_\_\_ [2]

(b)  $y = 4a - 5x^2$

Find the value of  $y$  when  $a = 3$  and  $x = -2$ ,

(b) \_\_\_\_\_ [2]

- 2 The diagram shows a triangular prism of length 12 cm.

$AB = 6 \text{ cm}$ ,  $AC = 10 \text{ cm}$  and  $BC = 8 \text{ cm}$ .  
 $\text{Angle } ABC = 90^\circ$ .

- (a) How many planes of symmetry does the prism have?

(a) \_\_\_\_\_ [1]

- (b) The prism is made out of card.

- (i) Calculate the total surface area of the prism.

(b)(i) \_\_\_\_\_  $\text{cm}^2$  [4]

- (ii) Each square centimetre of card weighs 0.02 grams.

Calculate the weight of the prism.

(ii) \_\_\_\_\_ grams [2]

- 3 Emma is conducting a survey on what the students in her college normally do for lunch. She selects a random sample of 200 students. These are her results.

	Cafeteria	Packed lunch	Go home	Buy at local shop
Frequency	80	60	24	36
Relative Frequency				

- (a) Complete the table of relative frequencies below. Give your answers as decimals.

	Cafeteria	Packed lunch	Go home	Buy at local shop
Relative Frequency				

[2]

- (b) Emma says that the relative frequencies in **part (a)** are good estimates of probability.

Is she correct? Give a reason for your answer.

\_\_\_\_\_ because \_\_\_\_\_

[1]

- (c) The college has 3200 students.

Estimate the number of students in the college who normally have lunch at the cafeteria.

(c) \_\_\_\_\_ [2]

4 Work these out.

Give your answers as mixed numbers in their lowest terms.

(a)  $8 \times \frac{3}{10}$

(a) \_\_\_\_\_ [2]

(b)  $\frac{2}{3} + \frac{5}{6} - \frac{1}{4}$

(b) \_\_\_\_\_ [4]

5 In triangle ABC

- angle B is twice as big as angle A
- angle C is  $40^\circ$  less than angle A

Find the three angles of the triangle.

angle A = \_\_\_\_\_ ° angle B = \_\_\_\_\_ ° angle C = \_\_\_\_\_ ° [3]

6 (a) Simplify.

(i)  $5p^4 \times 3p^3$

(a)(i) \_\_\_\_\_ [2]

(ii)  $8x - 4 + 3(2x + 5)$

(ii) \_\_\_\_\_ [3]

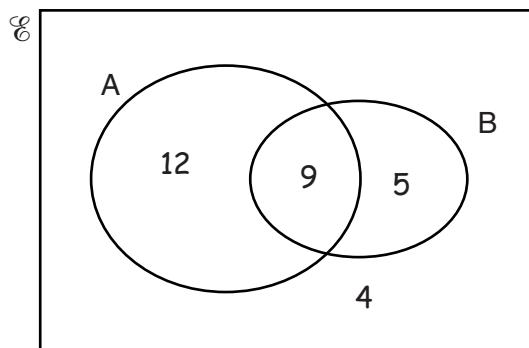

(b) Solve.

$$5x + 3 = 4 - 2x$$

(b) \_\_\_\_\_ [3]

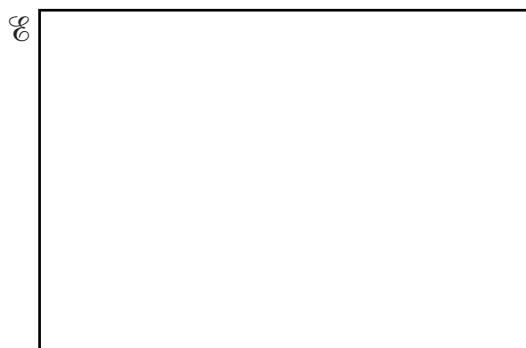

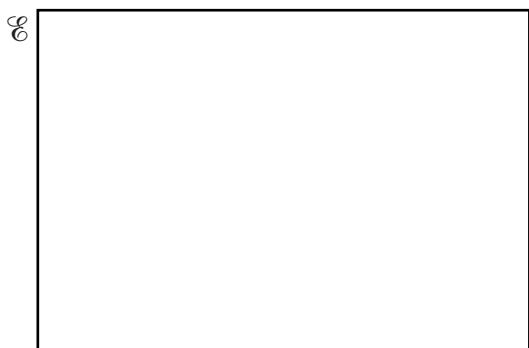

- 7 The sets A and B and the universal set  $\mathcal{E}$  are such that  
 $n(\mathcal{E}) = 30$ ,  $n(A) = 21$  and  $n(B) = 14$ .

This Venn diagram shows the sets when  $n(A \cap B) = 9$

Find the smallest and greatest values of  $n(A \cap B)$ .

You can use diagrams to help you.

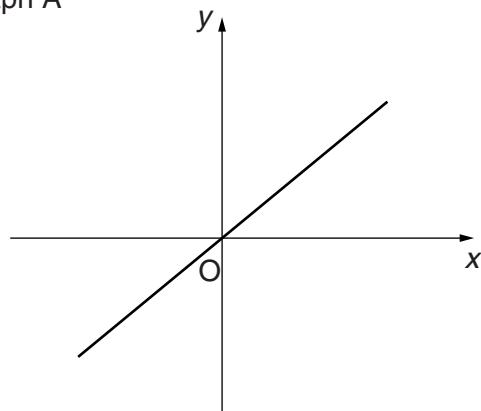

smallest \_\_\_\_\_

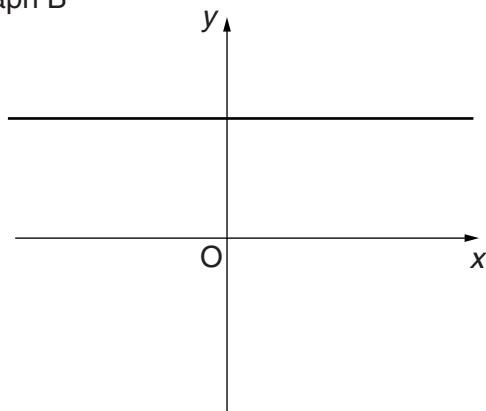

greatest \_\_\_\_\_ [3]

8 Here are some sketch graphs.

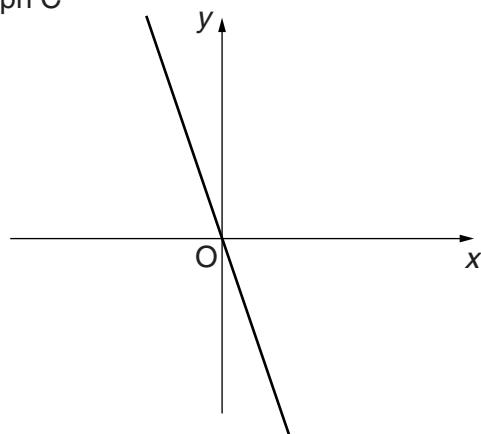

Graph A

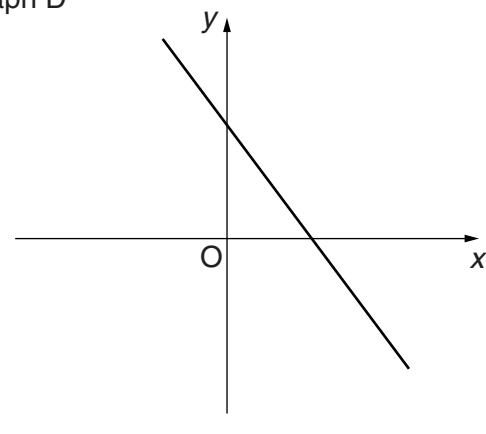

Graph B

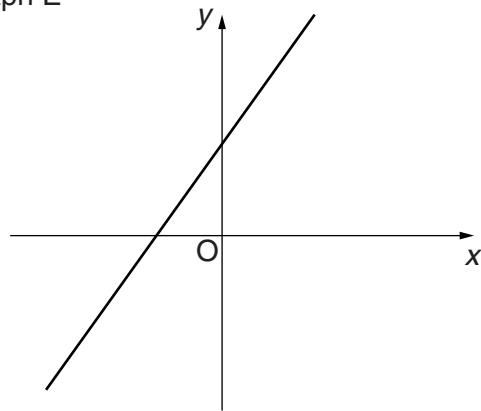

Graph C

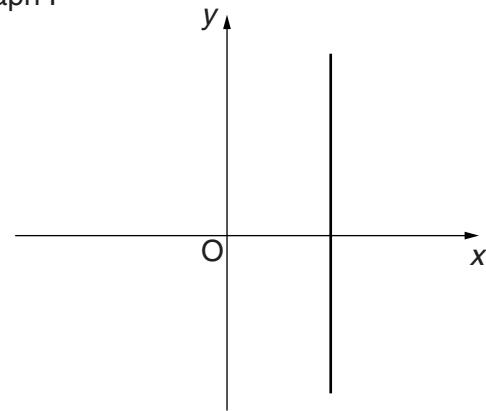

Graph D

Graph E

Graph F

Complete the following.

The equation  $y = 2x + 3$  can be represented by sketch graph \_\_\_\_\_.

The equation  $x = 4$  can be represented by sketch graph \_\_\_\_\_.

The equation  $y = -3x$  can be represented by sketch graph \_\_\_\_\_.

The equation  $3x + 2y = 6$  can be represented by sketch graph \_\_\_\_\_ . [4]

**10**

- 9 (a)** Which of these fractions are equivalent to recurring decimals?  
Put an R under the ones which recur.

$$\frac{5}{6}$$

$$\frac{3}{5}$$

$$\frac{8}{15}$$

$$\frac{5}{7}$$

$$\frac{3}{40}$$

---

---

---

---

---

[2]

- (b)** Explain how you decided which were recurring decimals.

---

---

---

[2]

10 Write these in order, smallest first.

(a) 0.63

$$\frac{2}{3}$$

$$0.6$$

$$\frac{13}{20}$$

\_\_\_\_\_ , \_\_\_\_\_ , \_\_\_\_\_ , \_\_\_\_\_ [2]  
*smallest*

(b)  $\frac{5}{\sqrt{5}}$

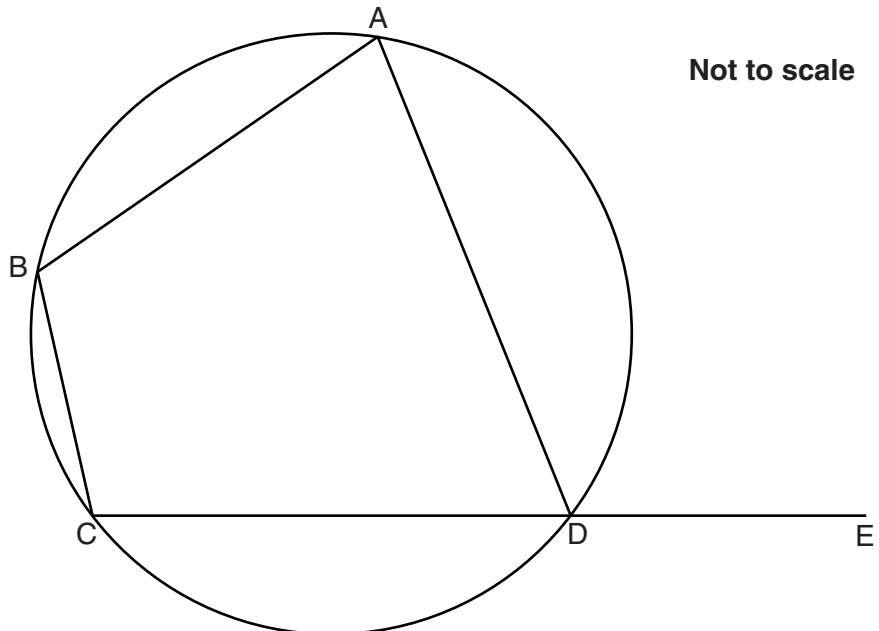

$$2\sqrt{5}$$

$$(\sqrt{5})^3$$

$$\frac{\sqrt{5}}{2}$$

\_\_\_\_\_ , \_\_\_\_\_ , \_\_\_\_\_ , \_\_\_\_\_ [3]  
*smallest*

- 11\*** The points A, B, C and D lie on a circle.  
CDE is a straight line.

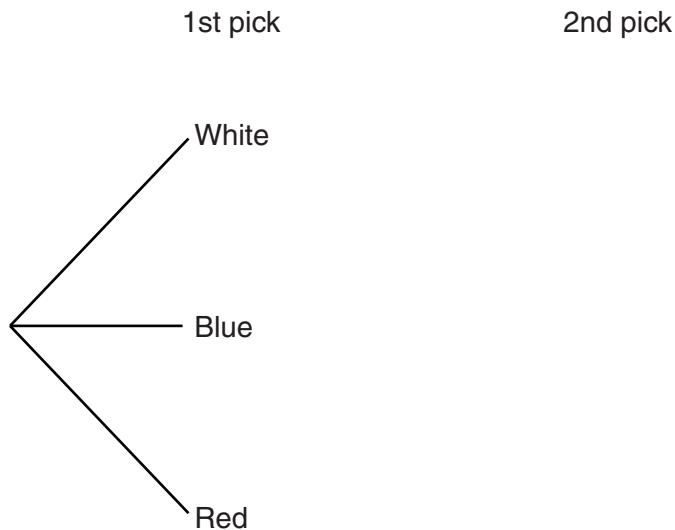

**Not to scale**

Prove that angle ABC = angle ADE.  
Give a reason for each of your statements.

- 12 In a game there are 7 white beads, 2 blue beads and 1 red bead in a bag.  
Natasha picks a bead at random from the bag.  
If it is white she loses and the game ends.  
If it is blue she picks another bead.  
If she picks the red bead at any time she wins a prize.  
Beads are not replaced and she is not allowed to pick a third bead.

(a) Complete the probability tree diagram to show **all** the possible outcomes.

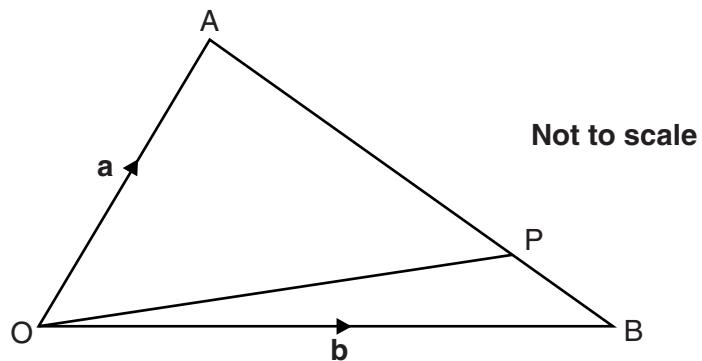

[2]

(b) What is the probability that Natasha wins a prize?

(b) \_\_\_\_\_ [3]

- 13 In the diagram  $\vec{OA} = \mathbf{a}$  and  $\vec{OB} = \mathbf{b}$ .  
P is on AB such that  $AP : PB = 4 : 1$ .

Find  $\vec{OP}$  in terms of  $\mathbf{a}$  and  $\mathbf{b}$ .  
Give your answer in its simplest form.

---
