Physical Education

Unit 1: The Theory of Physical Education

Friday 16 May 2014 – Afternoon

Time: 1 hour 30 minutes

Paper Reference

5PE01/01

You do not need any other materials.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
 - there may be more space than you need.

Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets
 - use this as a guide as to how much time to spend on each question.
- Questions labelled with an **asterisk (*)** are ones where the quality of your written communication will be assessed
 - you should take particular care on these questions with your spelling, punctuation and grammar, as well as the clarity of expression.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

PEARSON

Answer ALL questions.

For each part of Question 1, choose an answer, A, B, C or D, and put a cross in a box . If you change your mind about an answer, put a line through the box and then mark your new answer with a cross .

- 1 (a) The development of friendships and social mixing are two social benefits of exercise.

Which **one** of the following is also a **social** benefit of exercise?

(1)

- A** Physical challenge
- B** Aesthetic appreciation
- C** Competition
- D** Cooperation

- (b) The answers below show examples from the six key influences that can impact on involvement in physical activity.

Which **one** of the following, **A**, **B**, **C** or **D**, correctly identifies one example from each key influence?

(1)

- A** Family, fashion, peers, age, illness, cost
- B** Role models, access, time, illness, status, race
- C** Peers, media, gender, time, cost, status
- D** Family, fashion, race, access, illness, cost

- (c) Which **one** of the following is a definition of exercise?

(1)

- A** A complete state of mental, physical and social wellbeing
- B** A form of physical activity done to maintain or improve health and/or fitness
- C** The ability to meet the demands of the environment
- D** The ability to exercise the entire body for long periods of time

(d) Which method of training is being described in the statement below?

A series of exercises where the participant moves from one exercise station to the next. The session can be designed to improve skill or fitness.

(1)

- A** Continuous
- B** Fartlek
- C** Circuit
- D** Cross

(e) Which **one** of the following correctly identifies **four** factors affecting optimum weight?

(1)

- A** Bone structure, gender, muscle girth, height
- B** Height, diet, muscle growth, body composition
- C** Bone structure, age, muscle mass, weight
- D** Body composition, muscle mass, sport played, height

(f) Which **one** of the following statements is correct?

(1)

- A** Obese – a term meaning very overweight
- B** Overweight – a term meaning excess body fat
- C** Overfat – a term meaning weight in excess of normal
- D** Anorexic – a term meaning a prolonged eating disorder due to loss of appetite

(g) Which **one** of the following terms, **A**, **B**, **C** or **D**, is being described in the statement below?

The volume of blood leaving the heart per beat.

(1)

- A** Maximum cardiac output
- B** Stroke volume
- C** Cardiac output
- D** Heart rate

(h) Which **one** of the following, **A**, **B**, **C** or **D**, correctly completes the statement below about vital capacity?

Vital capacity is the maximum amount of

(1)

- A** blood that can circulate around the body during exercise.
- B** physical activity we can complete aerobically.
- C** air we can breathe out after breathing in fully.
- D** weight we can lift in one go, our one rep max.

(i) Which **one** of the following correctly describes a reason for muscle atrophy?

(1)

- A** Inability to continue training
- B** Regular participation in weight training
- C** Too much protein in the diet
- D** A build-up of lactic acid

(j) Which **one** of the following is **not** a joint injury?

(1)

- A** Strain
- B** Dislocation
- C** Sprain
- D** Tennis elbow

(Total for Question 1 = 10 marks)

2 Participation in physical activity can bring many health benefits.

(a) Classify the following benefits of a healthy, active lifestyle.

(i) Prevention of stress-related illness.

(1)

(ii) Drop in resting heart rate.

(1)

(b) Explain how participation in physical activity can stimulate cooperation.

(3)

(Total for Question 2 = 5 marks)

- 3** National Governing Bodies are involved in developing and implementing sport-related initiatives.

(a) Name a National Governing Body.

(1)

Sport England and Youth Sport Trust are agencies that use initiatives to impact on sport and physical activity in the United Kingdom.

(b) Describe **two** common purposes of a sport-related initiative.

(4)

Common purpose 1

Common purpose 2

(Total for Question 3 = 5 marks)

4 Usman and Tony enjoy participating in athletics.

- (a) Which **two** components of health-related exercise is Tony most likely to improve through regular training sessions using Fartlek training?

(2)

1

2

- (b) Complete the statement below about Usman's training.

(1)

- (i) Usman has a short stride length. To improve his range of movement he

works on his , a component of
health-related exercise.

- (ii) Name a fitness test that Usman could use to monitor improvement in this component of health-related exercise.

(1)

- (c) Targets are often used to improve motivation.

Explain how **one** of the principles of SMART target setting could help Usman and Tony maintain their motivation to train.

- 5 Games players, such as the rugby and netball players shown in Figure 1 and Figure 2, require good levels of agility and balance to be successful in their sports.

Figure 1

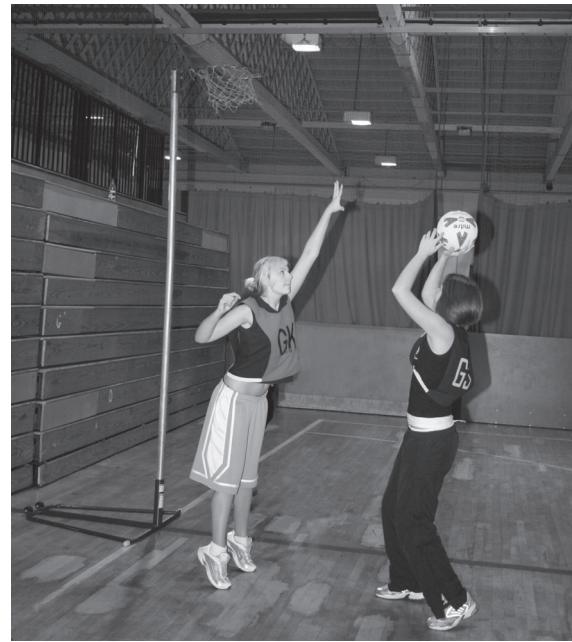

Figure 2

- (a) (i) Using **Figure 1**, state how the rugby player with the ball is using agility in his sport.

(1)

-
-
- (ii) Using **Figure 2**, state how the netball player without the ball is using balance in her sport.

(1)

- (b) Explain the importance of **two** components of skill-related fitness other than agility and balance for any games player.

Name of component of skill-related fitness 1

Explanation

(2)

Name of component of skill-related fitness 2

Explanation

(2)

(Total for Question 5 = 6 marks)

- 6** Diet is an important consideration in a healthy, active lifestyle.

The table below lists six of the seven nutrients required for a balanced diet.

Fats	Water	Vitamins
Fibre	Minerals	Protein

- (a) Identify the nutrient missing from the table.

(1)

- (b) State the importance of the missing nutrient in maintaining an active lifestyle.

(1)

- (c) Some vitamins and minerals can increase bone strength.

Apart from diet, how else can a person increase their bone strength?

(1)

- (d) Explain why we are told not to exercise immediately after eating a large meal.

(3)

(Total for Question 6 = 6 marks)

- 7** Describe a characteristic of a mesomorph that makes it the ideal body type for 100m sprinters.

(Total for Question 7 = 2 marks)

P 4 3 3 5 1 A 0 1 1 2 4

- 8** Several items of protective clothing are being used by the performers in Figure 3.

Figure 3

- (a) Identify **one** item of protective clothing visible in **Figure 3** and explain how this helps to reduce the risk of injury.

(3)

Item of clothing

Explanation

(b) Risk can also be reduced before the start of any physical activity.

Identify a risk reduction measure, other than protective clothing, that should be carried out **prior** to physical activity and explain how this helps to maintain wellbeing.

(3)

Risk reduction measure

Explanation

(Total for Question 8 = 6 marks)

P 4 3 3 5 1 A 0 1 3 2 4

- 9** (a) Complete the following statements about the effects of exercise on the cardiovascular system.
- (i) A decreased resting heart rate is a effect of exercise. (1)
- (ii) The heart responds to exercise by beating faster. As a result blood flow to meet the higher demands being made on the body during exercise. (1)
- (iii) Rest **between** exercise sessions allows the cardiovascular system to adapt. is an example of how the cardiovascular system may adapt. (1)
- (b) State the effect of alcohol on resting blood pressure. (1)

(Total for Question 9 = 4 marks)

- 10** Describe the antagonistic muscle action that allows flexion and extension at the elbow **and** knee.
-
-
-
-

P 4 3 3 5 1 A 0 1 5 2 4

12 Sam is studying GCSE PE.

As part of his course, he learns about ways to reduce high blood pressure.

- (a) Describe **two** ways to reduce high blood pressure.

(4)

1

.....

.....

.....

2

.....

.....

.....

During his GCSE PE course Sam designed a Personal Exercise Programme (PEP).

His aim was to improve his cardiovascular fitness.

One popular test to measure cardiovascular fitness is the Harvard Step test.

- (b) Name another fitness test that Sam could use to measure his cardiovascular fitness.

(1)

- (c) The Harvard Step test requires the participant to measure their heart rate at one-minute intervals after exercise.

- (i) What name is given to the heart rate recorded at one-minute intervals following the Harvard Step test?

(1)

- (ii) Why would Sam measure his resting heart rate each week as part of his PEP?

(1)

The graph in Figure 4 shows Sam's heart rate one minute after completing the fitness test.

- (iii) Draw a line on the graph to show what is likely to happen to Sam's heart rate during the three-minute rest period.

(1)

Sam's heart rate values at one-minute intervals after exercise

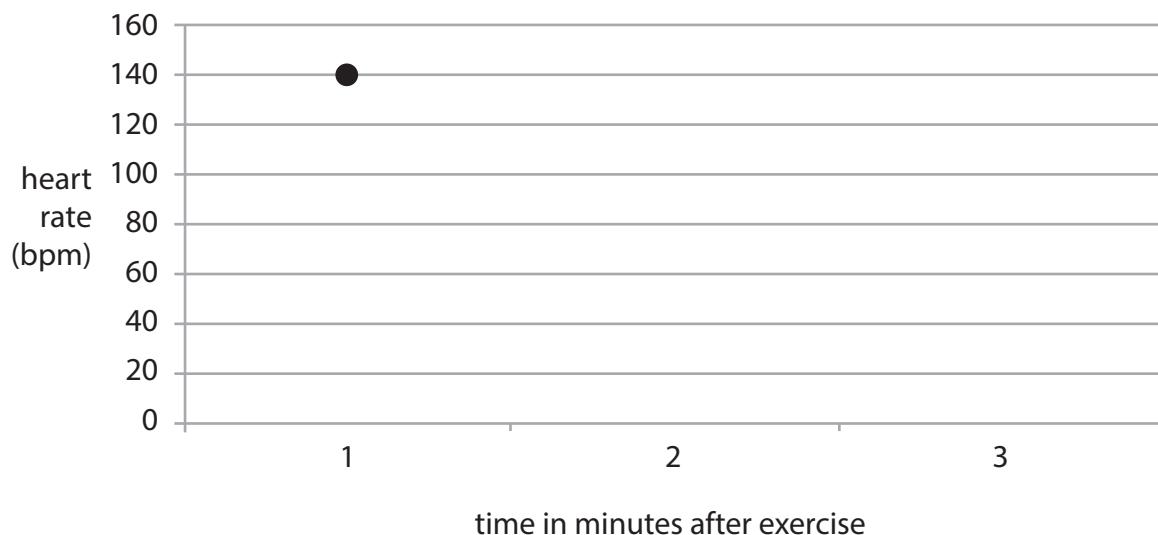

Figure 4

- (d) Give **two** immediate effects that this exercise session would have on Sam's respiratory system.

(2)

1.....

2.....

(Total for Question 12 = 10 marks)

- *13 Discuss, using examples, how the principles of training can improve the fitness of a group of GCSE PE students.

Candidates are not expected to use all the space provided.

(Total for Question 13 = 6 marks)

***14** Discuss the use of steroids to enhance performance in athletic events.

Candidates are not expected to use all the space provided.

(Total for Question 14 = 6 marks)

TOTAL FOR PAPER = 80 MARKS
