

GCSE MARKING SCHEME

SUMMER 2016

PSYCHOLOGY - UNIT 1 4431/01

INTRODUCTION

This marking scheme was used by WJEC for the 2016 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCSE PSYCHOLOGY

SUMMER 2016 MARK SCHEME

UNIT 1

| Question | AO1 | AO2 | AO3 | TOTAL |
|----------|-----|-----|-----|-------|
| 1 | 4 | 6 | - | 10 |
| 2 | 4 | 4 | 6 | 14 |
| 3 | 8 | 6 | 6 | 18 |
| 4 | - | 2 | 8 | 10 |
| 5 | 4 | 6 | 2 | 12 |
| 6 | 6 | - | 8 | 14 |
| TOTAL | 26 | 24 | 30 | 80 |

| Question | AO1 | AO2 | AO3 | TOTAL |
|----------|-----|-----|-----|-------|
| 1 | 4 | 6 | | 10 |

| Question | Answer | Marks |
|--------------|---|----------|
| 1 (a) | (i) CLAIRVOYANCE= Obtaining information which is not available by the normal five senses. (ii) TELEPATHY= The sending of information from one mind to another. (iii) PRECOGNITION= The ability to perceive the future before it happens. (iv) PSYCHOKINESIS= The ability of an individual to influence an object without direct intervention. | 4 (AO1) |
| (b) | Against ESP possible answer could include: There is only little scientific evidence. Experiments in ESP are difficult to replicate. Measuring ESP scientifically is almost impossible to do Lack of reliable support. Statistical argument people correct in predicting future (precognition) by chance. No research method lab experiment/case study can prove it. Evidence of faked images e.g. ghosts. Any other appropriate material. (at least two points must be discussed to gain top band marks can refer to one type of ESP) 5-6 marks Information is selected illustrating range and depth, though not necessarily in equal measure. Information is very well organised and a balanced discussion is communicated. 3-4 marks Some relevant information is selected, illustrating either range or depth. Information is well organised and ideas are expressed in a logical manner. 1-2 marks Basic/simple information is selected OR response is muddled. Information is poorly organised. 0 marks – inappropriate or no answer | 6 (AO2) |
| | | Total 10 |

| Question | AO1 | AO2 | AO3 | TOTAL |
|----------|-----|-----|-----|-------|
| 2 | 4 | 4 | 6 | 14 |

| C | Quest | ion | Answer | Marks |
|---|-------|----------------------|---|----------|
| 2 | (a) | (i) (ii) (iii) | Dentrite (1) Cell body(1) Synapse (1) | 4 (AO1) |
| | | (iv) | Axon (1) | |
| | (b) | (i) | Frontal lobe involved in intelligence, personality, memory and movement/2 must refer to human behaviour/2. | 4 (AO2) |
| | (c) | (i) | Any of the following points are creditworthy: Using a radiation marker to build up an image of the brain. Involves administering slightly radioactive glucose to the patient. The most active areas of the brain use glucose and radiation detectors can see the radioactive areas so building up a picture of activity in the brain. Scans take between 10 to 40 minutes and are painless. Hot colours e.g. red and orange=areas of greatest activity. Cold colours e.g. green and blue=areas of least activity. PET scans tell us which parts of the brain are busy but not what they are doing. 3 marks Outline shows range or depth and linked to brain action. 2 marks Outline is basic or response is muddled but linked to brain action. 1 mark Outline is basic with no link to brain action. 0 marks No relevant information. Any of the following points are creditworthy. This is the measured brain response that is the direct result of a sensory or motor event. Non-invasive way of studying brain function. Measured by an EEG. | 3 (AO3) |
| | | | Brain waves can be measured. Measured by a cognitive task or physical event. 3 marks Outline shows range or depth and linked to brain action. 2 marks Outline is basic or response is muddled but linked to brain action. 1 mark Outline is basic with no link to brain action. 0 marks No relevant information. | |
| | | | | Total 14 |
| | | | | |

| Question | AO1 | AO2 | AO3 | TOTAL |
|----------|-----|-----|-----|-------|
| 3 | 8 | 6 | 6 | 20 |

| 3 (a) (i) Field (ii) Intelligent (iii) Privileges (iv) Stereotype Badly (vi) Reversed (b) An opinion about others that is based on pre-conceived ideas or negative attitudes based on stereotypes. 2 marks-term outlined in detail. 1 mark-basic outline of term. 0 marks-no relevant information. (c) Answer can refer to any aspect of everyday life e.g. workplace, school, home life, the media but must be specific for full marks. (i) 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 1-mark example given linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given clearly linked to everyday life. 2-marks example given clearly linked to everyday life. 1-mark example given linked to everyday life. 1-mark example given clearly linked to everyday life. 1-mark example given linke | (ii) (iii) |
|--|---------------|
| (iv) (vi) Reversed (b) An opinion about others that is based on pre-conceived ideas or negative attitudes based on stereotypes. 2 marks-term outlined in detail. 1 mark-basic outline of term. 0 marks-no relevant information. (c) Answer can refer to any aspect of everyday life e.g. workplace, school, home life, the media but must be specific for full marks. (i) 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given not linked to everyday life. 0 marks-no relevant information/or reference to just prejudice. (d) Possible answers could include: • Social contact (geographic mobility). • Co-operation. • Creating empathy. • Education=get students to do an activity about prejudice. • Legal system. • Any other appropriate material. (at least two ways must be discussed to gain top band | • • |
| or negative attitudes based on stereotypes. 2 marks-term outlined in detail. 1 mark-basic outline of term. 0 marks-no relevant information. (c) Answer can refer to any aspect of everyday life e.g. workplace, school, home life, the media but must be specific for full marks. (i) 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 2-marks example given clearly linked to everyday life. 1-mark example given not linked to everyday life. 0 marks-no relevant information/or reference to just prejudice. (d) Possible answers could include: Social contact (geographic mobility). Co-operation. Creating empathy. Education=get students to do an activity about prejudice. Legal system. Any other appropriate material. (at least two ways must be discussed to gain top band | (v) |

|----------|-----|-----|-----|-------|
| 4 | - | 2 | 8 | 10 |

| Question | Answer | Marks |
|----------|---|-------------------|
| 4 (a) | Social learning theory/1 for full marks answer must refer to source. | 2 (AO3) |
| (b) | CC involves automatic learning; no control/ OC involves learning through reward and punishment; person has control. Any other relevant difference. (if only mentions CC or OC 0 marks) | 2 (AO3) |
| (c) | CC and OC can both involve reinforcement to produce the desired behaviour. OC eventually becomes CC. Any other relevant similarity. (if only mentions CC or OC 0 marks) | 2 (AO3) |
| (d) | Possible answer could include: Learning styles can be applied as children learn in different ways therefore teaching should use different ways. This is good for specific types of learners e.g.) visual learners. Can make lessons more enjoyable/interesting. Different learning styles good for specific subjects e.g. P.E. Any other relevant information. (must refer to both learning styles for full marks) 4 marks Both learning styles discussed in detail with reference to the classroom. 3 marks Both learning styles discussed with reference to the classroom. 2 marks Only one learning style discussed in detail with reference to the classroom. 1 mark One learning style discussed with reference to the classroom. 0 marks No reference to the classroom or no relevant information. | 4 (AO3) |

| Question | Answer | Marks |
|----------|--|---------|
| 5 (a) | Reference to Konrad Lorenz's study. Imprinting. Attachment. Geese think Lorenz is parent figure. Critical period. Geese copy and learn from Lorenz. Any other relevant information. 3-4 marks Description shows range and/or depth. Answer contains many key aspects. 1-2 marks Description is basic OR response is muddled. Information is poorly organised and some key aspects are missing. 0 marks No relevant information. | 4 (AO1) |
| (b) | One ethical issue protection from harm/1 must refer to study for full marks e.g. harm caused by the monkey being taken from the mother/2. | 2 (AO3) |
| (c) | Animals will not behave naturally in a lab setting. Animals are not the same as us therefore their behaviour will be different. It is unethical to study animals in labs not their natural environment may cause them harm. Discuss ethical issues of using animals. Examples of studies with ethical issues only issue protection from harm. Harlow and Harlow baby monkey taken from mother grew up psychologically disturbed, taken from wild and brought up in unnatural environment. Ethical costs vs benefits. Speciesism * (type of racism) we think we can do anything we like to animals. Any other relevant points. (at least two disadvantages must be discussed to gain top band but could both be ethical). | 6 (AO2) |
