Time allowed: 1 hour 30 minutes

**Instructions**

- Use blue or black ink or ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want marked.

**Information**

- The maximum mark for this paper is 90.
- Mark allocations are shown in brackets.
- You are reminded of the need for good English and clear presentation in your answers.

Answer **all** questions in the spaces provided.

- 1 (a) List **A** gives the names of four stimuli. List **B** gives four parts of the human body.

Draw a straight line from each stimulus in List **A** to the part of the body in List **B** which has receptors for that stimulus.

(One has been done for you.)

(3 marks)

- (b) Complete the following sentence by choosing the correct words from the box.

<b>brain</b>	<b>glands</b>	<b>motor</b>	<b>sensory</b>
--------------	---------------	--------------	----------------

To make us aware of a stimulus, impulses are sent along a ..... neurone  
to the .....

(2 marks)

5

2 Complete the table by writing the correct process next to its description.

Choose your answers from the list in the box.

<b>breathing</b>	<b>diffusion</b>	<b>digestion</b>	<b>osmosis</b>	<b>respiration</b>
------------------	------------------	------------------	----------------	--------------------

<b>Description</b>	<b>Process</b>
Moving air in and out of the lungs	
The movement of particles of a substance from high to low concentration	
The release of energy from glucose

**TURN OVER FOR THE NEXT QUESTION**

**Turn over** ►

3 In recent years, trees have been cut down to create more farm land. More cattle are kept and more rice is grown.

(a) (i) Which gas has increased in the air as a result of trees being cut down?

Draw a ring around **one** answer.

**carbon dioxide**                      **oxygen**                      **sulphur dioxide**

(1 mark)

(ii) Which gas has increased in the air as a result of keeping more cattle and growing more rice?

Draw a ring around **one** answer.

**carbon monoxide**                      **hydrogen**                      **methane**

(1 mark)

(b) What effect may increases in these gases have on global temperatures?

Draw a ring around **one** answer.

**decrease**                      **increase**                      **stay the same**

(1 mark)

(c) List **three** ways in which humans have destroyed the habitats of other animals.  
Do **not** include cutting down trees in your answer.

(3 marks)

4 The diagram shows a method of producing a large number of plants which all look the same. Cells taken from the bud can be split into many groups. Each group of cells is then grown under the same conditions.

(a) (i) What do scientists call organisms which are all produced from one parent and which all look the same?

Draw a ring around **one** answer.

**clones**

**communities**

**populations**

(1 mark)

(ii) Give **two** reasons why plants produced by this method will all look the same.

1 .....

.....

2 .....

.....

(2 marks)

(b) Give **two** reasons why plants need roots.

5 **Figure 1** shows a food chain containing three organisms.

**Figure 1**

- (a) (i) In this food chain, name:  
the predator; .....
- the prey. ....
- (2 marks)

- (ii) What is the source of energy for the grass?

Draw a ring around **one** answer.

**carbon dioxide**

**light**

**nitrates**

**water**

(1 mark)

- (iii) **Figure 2** shows a pyramid of biomass for the organisms in **Figure 1**.

Write the names of the organisms on the correct lines in **Figure 2**.

**Figure 2**

(1 mark)

(b) Waste materials, like faeces from the animals, will decay.

(i) What sort of organisms cause decay?

.....  
(1 mark)

(ii) **Three** of the following conditions help decay to occur rapidly.

Which conditions do this?

Draw a ring around each of the **three** answers.

**aerobic      anaerobic      cold      dry      moist      warm**

(3 marks)

(iii) The list below gives four substances. Two of these substances are produced by decay and can be used by the grass.

Which **two** substances are these?

Tick (✓) **two** boxes.

**Carbon dioxide**

**Mineral salts**

**Oxygen**

**Protein**

(2 marks)

10

**TURN OVER FOR THE NEXT QUESTION**

**Turn over** ►

- 6 (a) Alleles are different forms of the same gene.

Why does a person usually inherit **two** alleles of each gene?

.....  
(1 mark)

- (b) Some humans are albino (they have white hair and pale skin). This condition is caused by a recessive allele, **n**. The other allele, **N**, causes a coloured pigment to be made.

There are three possible combinations of these alleles:

**NN**                  **Nn**                  **nn**

- (i) Which **one** of these combinations will an albino person have?

.....  
(1 mark)

- (ii) Two non-albino parents can sometimes have an albino child.

Which **one** of the following combinations of alleles must these two parents have?

Tick (✓) the box next to the correct answer. Tick **one** box only.

<b>Parent 1</b>	<b>Parent 2</b>	
NN	NN	<input type="checkbox"/>
NN	Nn	<input type="checkbox"/>
Nn	Nn	<input type="checkbox"/>
nn	nn	<input type="checkbox"/>

(1 mark)

7 Diphtheria is a disease of the human breathing system. The graph shows the number of deaths from diphtheria in the United Kingdom between 1938 and 1951. Vaccination against diphtheria was begun in 1941.

(a) What evidence in the graph suggests that vaccination protects people from diphtheria?

.....  
(1 mark)

(b) Complete the passage by choosing the correct words from the box.

<b>antibodies</b>	<b>bacteria</b>	<b>platelets</b>
<b>red blood cells</b>	<b>white blood cells</b>	

During vaccination, harmless ..... are injected into the body.

This causes ..... to make ..... which help to protect the body against diphtheria.

- 8 In the United Kingdom, the legal limit for alcohol in the blood of a person driving a car is 80 milligrams per 100 cm<sup>3</sup>. The table shows the number of 'units' of alcohol in different drinks.

Drink	Units of alcohol
One can of strong lager	4
One pint of bitter beer	2
One glass of wine	1
One single measure of whisky	1

The graph shows how much alcohol would be found in the blood when a person drinks different amounts of alcohol.

(a) A person drinks two cans of strong lager.

(i) How many units of alcohol are there in two cans of strong lager?

..... units  
(1 mark)

(ii) What would this person's blood alcohol level be?

..... mg per 100 cm<sup>3</sup>  
(1 mark)

(b) It is dangerous to drive a car after drinking two cans of strong lager. Explain why.

.....  
.....  
.....  
.....  
.....  
.....

(3 marks)

(c) Alcohol is transported round the body in the same way as the products of digestion.

Complete the passage, by choosing the correct words from the box, to explain how a person who has drunk too much alcohol would give a positive result in a police 'breathalyser' test.

<b>blood plasma</b>	<b>diffusion</b>	<b>lungs</b>	<b>osmosis</b>
<b>red blood cells</b>	<b>stomach</b>	<b>white blood cells</b>	

Alcohol is absorbed from the digestive system into the ..... by the process of .....

The alcohol is carried to the ..... where it is then breathed out.  
(3 marks)

(d) Give **one** effect on the body of drinking a lot of alcohol over many years.

.....  
.....

(1 mark)

9 The table gives information about a geranium plant and a cactus plant.

The geranium grows in gardens in the UK. The cactus grows in hot deserts.

Feature	Geranium	Cactus
Thickness of waxy cuticle in micrometres	5	15
Total leaf surface area in cm <sup>2</sup>	1800	150
Percentage of water storage tissue in stem	50	85
Number of stomata per mm <sup>2</sup>	59	13
Time of day when stomata open	daylight	at night
Horizontal spread of roots in metres	0.2	5

Using only information in the table, explain how the cactus is better adapted for living in hot, dry conditions.

*To gain full marks in this question you should write your ideas in good English. Put them into a sensible order and use the correct scientific words.*

**TURN OVER FOR THE NEXT QUESTION**

**Turn over** ►

12 The table shows the effects that two different concentrations of sulphur dioxide in the air had on the growth of rye grass plants.

Sulphur dioxide concentration in the air in micrograms per m <sup>3</sup>	9.0	191.0
Number of leaves per plant	85.6	47.3
Total leaf area in cm <sup>2</sup>	417.2	203.6
Dry mass of stubble in grams	0.48	0.22

(a) What human activity releases sulphur dioxide into the air?

.....  
(1 mark)

(b) (i) What effect does sulphur dioxide have on rainwater?

.....  
.....  
(1 mark)

(ii) Use information from the table to describe **one** effect of sulphur dioxide on the leaves of the grass plants.

.....  
.....  
(1 mark)

(c) The stubble consists of the bases of the stems of the plants and the roots left in the soil after harvesting.

Use your answer to part (b) to explain why the dry mass of the stubble was less at the higher concentration of sulphur dioxide.

.....  
.....  
.....  
.....  
(2 marks)

13 (a) Fossils provide evidence for evolution.

(i) What is a fossil?

.....  
(1 mark)

(ii) How do fossils provide evidence for evolution?

.....  
.....  
.....  
.....  
(2 marks)

(b) Doctors give antibiotics to patients to kill bacteria in their bodies.

Explain how the overuse of antibiotics has led to the evolution of antibiotic-resistant bacteria.

*To gain full marks in this question you should write your ideas in good English. Put them into a sensible order and use the correct scientific words.*

**TURN OVER FOR THE NEXT QUESTION**

**Turn over** ►

14 Auxin is a hormone made by the tips of plant shoots.

**Figure 1** shows the movement of auxin in two young shoots, **A** and **B**, which were treated in different ways. 'X' shows where auxin was made. Both shoots were kept in the dark.

**Figure 1**

(a) Explain the difference in the growth of shoot **A** and shoot **B** at the end of one day.

.....

.....

.....

.....

.....

(4 marks)

- (b) A third shoot, **C**, was grown in a box so that light shone onto it from only one side. **Figure 2** shows movement of auxin in this shoot and the result of the experiment.

**Figure 2**

- (i) Describe the movement of auxin in shoot **C** after one hour.

.....  
(1 mark)

- (ii) Auxin causes plant cells to elongate (grow longer).

At which point, **P**, **Q**, **R** or **S**, would cells have elongated the most?  
Draw a ring around **one** answer.

**P**                      **Q**                      **R**                      **S**

(1 mark)

- (c) Plant hormones are sometimes used by humans to control plant growth. Give **two** examples of this.

.....

2 .....

.....

(2 marks)

- 15 The internal body temperature determines how much a person sweats. The graph shows the effect of different internal body temperatures on a person’s rate of energy loss by sweating.

- (a) How much more energy was lost from the body each second by sweating when the body temperature was 37.6°C than when it was 36.6°C? Show clearly how you work out your final answer.

.....  
 .....

Amount of energy = ..... joules per second  
 (2 marks)

- (b) Explain why a person would feel more thirsty when the body temperature was 37.6°C than when it was 36.6°C.

.....  
 .....  
 .....  
 .....

(2 marks)

- (c) Explain how sweating helps to control body temperature.
