INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Write your answers in the spaces provided in this question paper. Answer **all nine** questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 90.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question. Quality of written communication will be assessed in Questions 2 and 5(a).

A Data Leaflet, which includes a Periodic Table of the Elements, is included in this question paper.

Limestone is mined from a quarry near Larne, Co. Antrim. The limestone is blasted from the quarry rock and it is then taken by dumper truck and fed into a crushing plant. Heavy lorries then carry the crushed limestone to the port of Larne and various parts of Northern Ireland.	Examiner Marks R
Describe the advantages and disadvantages to the people of Larne of having a limestone quarry near their town.	
In this question you will be assessed on your written communication skills including the use of specialist scientific terms.

4 This question is about carbon dioxide and the gases in the Earth's atmosphere.

Examin	er Only
Marks	Remark

(a) The atmosphere contains about 0.04% carbon dioxide gas. Complete the table below by adding the two most abundant gases in the atmosphere and their approximate proportions.

Gas	Approximate proportion in the atmosphere
carbon dioxide	about 0.04%

[4]

(b) The table below shows how the level of carbon dioxide in the Earth's atmosphere has changed over the last 150 years. The table also shows the change in average global temperature in the same time span.

Year	1750	1800	1850	1900	1950	2000
concentration of CO ₂ in atmosphere/% by volume	0.027	0.028	0.029	0.030	0.032	0.037
average global temperature/°C	13.3	13.4	13.5	13.6	13.8	14.4
