General Certificate of Secondary Education 2014–2015

Double Award Science: Biology

Unit B1 Foundation Tier

[GSD11]

TUESDAY 12 MAY 2015, AFTERNOON

TIME

1 hour, plus your additional time allowance.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You must answer the questions in the spaces provided.

Do not write outside the boxed area on each page or on blank pages.

Complete in blue or black ink only.

Answer all nine questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 70.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

Quality of written communication will be assessed in Question 9(a).

1 Complete the passage by writing the correct words in the spaces. Choose words from the list.

brain	heart	faster	slower	organ	blood

[1]

(i)	Give one example of a natural fertiliser.	
		[1]
(ii)	Give one advantage to the soil of using a natural fertiliser rather than an artificial fertiliser.	

Company Compan

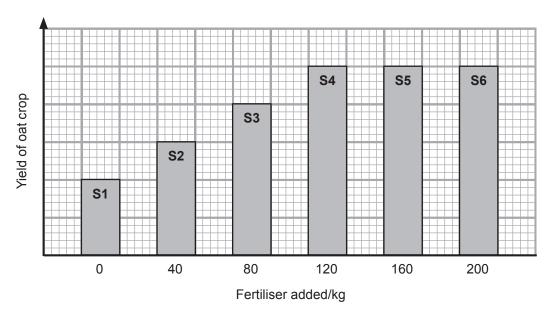

(c) Fertilisers add minerals to the soil.

A farmer planted the same number of oat seedlings in each of six equal-sized strips (**S1** to **S6**) in a field.

He added no fertiliser to strip **S1**, and different amounts of the same fertiliser to strips **S2** to **S6**.

He recorded the yield of the oat crop for each strip after five months.

The bar chart shows the results.

Source: Principal Examiner

(i)	Why	/ did	oat	seedlings	grow	in	strip	S1	in	the	field?

	[11]
-	

(ii)	Use data from the graph to describe the trend in the yield of the oat crop when increasing amounts of fertiliser were added.
	[2]
(iii)	Why should the farmer not add more than 120 kg of fertiliser when growing oats the following year?

(c) A Clinistix is a small paper strip containing one type of enzyme and a dye. It is used to test urine to find out if someone has diabetes.

When **each** enzyme molecule on the Clinistix joins with a substrate molecule, it produces a small change in the colour of the dye.

The diagram shows urine samples from two people with untreated diabetes and a Clinistix.

Source: Principal Examiner

Use this information, the diagram and your knowledge to answer the following questions.

(i)	What substance if found in the urine of a person indicates that they may
	have diabetes?
