MARK SCHEME

Introduction

Mark schemes are published to assist teachers and students in their preparation for examinations. Through the mark schemes teachers and students will be able to see what examiners are looking for in response to questions and exactly where the marks have been awarded. The publishing of the mark schemes may help to show that examiners are not concerned about finding out what a student does not know but rather with rewarding students for what they do know.

The Purpose of Mark Schemes

Examination papers are set and revised by teams of examiners and revisers appointed by the Council. The teams of examiners and revisers include experienced teachers who are familiar with the level and standards expected of students in schools and colleges.

The job of the examiners is to set the questions and the mark schemes; and the job of the revisers is to review the questions and mark schemes commenting on a large range of issues about which they must be satisfied before the question papers and mark schemes are finalised.

The questions and the mark schemes are developed in association with each other so that the issues of differentiation and positive achievement can be addressed right from the start. Mark schemes, therefore, are regarded as part of an integral process which begins with the setting of questions and ends with the marking of the examination.

The main purpose of the mark scheme is to provide a uniform basis for the marking process so that all the markers are following exactly the same instructions and making the same judgements in so far as this is possible. Before marking begins a standardising meeting is held where all the markers are briefed using the mark scheme and samples of the students' work in the form of scripts. Consideration is also given at this stage to any comments on the operational papers received from teachers and their organisations. During this meeting, and up to and including the end of the marking, there is provision for amendments to be made to the mark scheme. What is published represents this final form of the mark scheme.

It is important to recognise that in some cases there may well be other correct responses which are equally acceptable to those published: the mark scheme can only cover those responses which emerged in the examination. There may also be instances where certain judgements may have to be left to the experience of the examiner, for example, where there is no absolute correct response – all teachers will be familiar with making such judgements.

1	(a)	(i)	Leaves [1] blue tit [1]	[2]	AVAILABLE MARKS
		(ii)	Sun/sunlight	[1]	
		(iii)	Energy flow	[1]	
	(b)	Dec	rease	[1]	5
2	(a)	(i)	 Any two from: taking in high number of kJ/energy very high in fat 	101	
			 very high in carbohydrates/sugar 	[2]	
		(ii)	Protein	[1]	
	(b)	lron for ៖	[1] strong teeth and bones [1]	[2]	5
3	(a)	(i)	10	[1]	
		(ii)	100	[1]	
		(iii)	160–164 cm	[1]	
	(b)	Cor	tinuous	[1]	4
4	(a)	(i)	Tar	[1]	
		(ii)	Random [1] chromosomes [1]	[2]	
		(iii)	Less oxygen (in red blood cells) [1] less respiration [1]	[2]	
	(b)	(i)	(Increasing) exercise/reducing stress	[1]	
		(ii)	As the number of smokers decrease the number of deaths from heart disease also decrease (or converse)	[1]	
		(iii)	2554 – 2200 [1] 354 [1]	[2]	9

5	(a)	(i)	D B A E C Any two in correct sequence [1] All correct [2]	[2]	AVAILABLE MARKS
		(ii)	 Any two from: same mass of food (1.5 g) same volume of water (20 cm³) hold the food the same distance from boiling tube (2 cm) 	[2]	
		(iii)	Some is still locked in the food/some is lost into the room/some does not go through the boiling tube	[1]	
	(b)	(i)	Carbon dioxide	[1]	
		(ii)	Respiration	[1]	7
6	(a)	(i)	Faster/protective/does not involve thinking time	[1]	
		(ii)	Spinal cord [1] pulling his hand away [1]	[2]	
	(b)	Any • • •	two from: hormones are produced by glands travel in the blood only affect certain organs called target organs act more slowly act over a longer period of time hormones are chemicals/nervous system is electrical	[2]	
	(c)	(i) (ii)	 Any two from: blood glucose level is higher at start for a person with diabetes blood glucose levels rise more steeply/quickly for a person with diabetes blood glucose levels fall more slowly for a person with diabetes blood glucose levels do not level off for a person with diabetes blood glucose levels are higher for a person with diabetes Pancreas 	[2]	8
		(11)	rancicas	נין	0
7	(a)	(i)	Time for antibodies to be made	[1]	
		(ii)	Takes time for immunity level to be achieved [1] antibody level remains high/immunity level maintained [1]	[2]	
	(b)	(i)	So they do not give the person the disease	[1]	
		(ii)	Antigens	[1]	
		(iii)	 Any three from: antibodies latch on to microorganisms microbes clumped together/immobilised phagocyte surrounds/engulfs microorganisms break down/digest microorganisms 	[3]	8

8	(a)	(i)	All points plotted correctly [2] 5 points correct [1] correct line joining points [1]	[3]	AVAILABLE MARKS		
	 (ii) Number of deaths increased from 2005 to 2008/to 31 over time [1] peaked at 2008/31 then decreased [1] 						
	(b)	b) Cold or flu caused by a virus/don't work on viruses [1] antibiotics only work on bacteria [1]					
	(c)		er antibiotic only resistant bacteria remain r reproduction only resistant bacteria but more of them	[1]	8		
	 9 Indicative content extinction increasing from 1920 species are extinct when there are no living examples left/have died out climate change or natural disasters/meteor hit the Earth/flooding/global warming loss of habitat/deforestation/pollution/invasive species hunting (by humans)/overfishing disease legislation (preventing the hunting of endangered species)/laws special programmes such as creating nature reserves/education/ breeding programmes/increased mesh sizes/reforestation 						
Bar	nd		Response	Mark			
A	۱.	tł h g	Candidates must use appropriate specialist terms broughout to describe extinction, the reasons why it is appening and what is being done to prevent it, using six to ight of the points above, in a logical sequence. They use ood spelling, punctuation and grammar and the form and tyle are of a high standard.	[5]–[6]			
В	}	ti h to	Candidates must use appropriate specialist terms broughout to describe extinction, the reasons why it is appening and what is being done to prevent it, using three o five of the points above, in a logical sequence. They use atisfactory spelling, punctuation and grammar and the form nd style are of a satisfactory standard.	[3]–[4]			
С	;	h o p	Candidates describe extinction, the reasons why it is appening and what is being done to prevent it, using ne or two of the points above. However these are not resented in a logical sequence. They use limited spelling, unctuation and grammar. The form and style are of a mited standard.	[1]–[2]			
D)	F	Response not worthy of credit.	[0]	6
