**OXFORD CAMBRIDGE AND RSA EXAMINATIONS  
GCSE**

**A334/01**

**TWENTY FIRST CENTURY SCIENCE  
ADDITIONAL APPLIED SCIENCE A**

**Agriculture and Food (Foundation Tier)**

**TUESDAY 31 JANUARY 2012: Morning**

**DURATION: 45 minutes**

**SUITABLE FOR VISUALLY IMPAIRED CANDIDATES**

**Candidates answer on the Question Paper.  
A calculator may be used for this paper.**

**OCR SUPPLIED MATERIALS:**

**None**

**OTHER MATERIALS REQUIRED:**

**Pencil**

**Ruler (cm/mm)**

**READ INSTRUCTIONS OVERLEAF**

## **INSTRUCTIONS TO CANDIDATES**

- Write your name, centre number and candidate number in the boxes on the first page. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer ALL the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).

## **INFORMATION FOR CANDIDATES**

- The number of marks is given in brackets [ ] at the end of each question or part question.
- The total number of marks for this paper is 36.

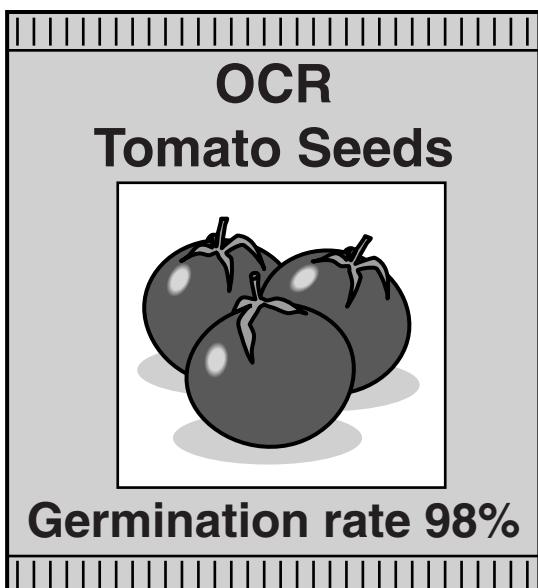

# **BLANK PAGE**

**Answer ALL the questions.**

**1 Alan wants to grow tomato plants.**

**He buys a packet of tomato seeds.**

**The packet is sealed.**

**(a) Why is the packet of seeds sealed?**

**Put a tick (✓) in the box next to the TWO correct answers.**

**The packet is sealed so that the seeds cannot ...**

**... be fertilised.**

**... be pollinated.**

**... germinate.**

**... photosynthesise.**

**... rot.**

**[2]**

**(b) The label on the packet states**

**“Germination rate is 98%”**

**If Alan plants 1000 seeds, how many seeds should germinate?**

**[1]**

**(c) Write down TWO conditions needed for germination.**

**1** \_\_\_\_\_

**2** \_\_\_\_\_ **[2]**

**(d) Alan grows his tomato plants using three different growing media.**

**Draw a straight line from each GROWING MEDIUM to its correct ADVANTAGE.**

**Then draw a straight line from each GROWING MEDIUM to its correct DISADVANTAGE.**

**ADVANTAGE**

**automatic control of water**

**GROWING MEDIUM**

**compost from a garden centre**

**DISADVANTAGE**

**contains many pests**

**free**

**soil from his garden**

**expensive to buy in sacks**

**contains correct minerals at correct pH**

**hydroponics system**

**difficult to support tall plants**

**[4]**

- (e) Alan decides to grow his tomato plants in a glasshouse.**

**Alan needs to make sure they get enough light and carbon dioxide.**

**Explain why getting enough light and carbon dioxide is important to produce a good crop of tomatoes.**

---

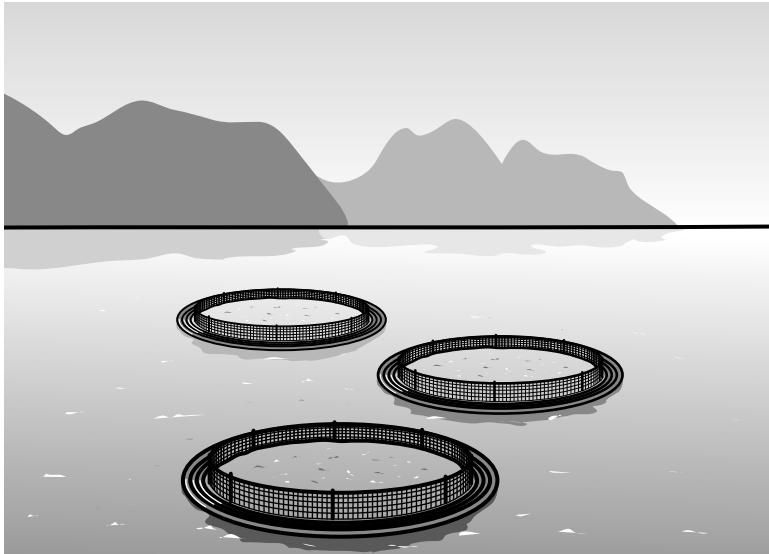

---

---

**[2]**

**[Total: 11]**

## **2 Salmon are kept in cages in sheltered sea bays.**

**This is called fish farming.**

**The salmon are fed a high protein diet so they grow quickly.**

**(a) What type of farming is this?**

**Put a tick (✓) in the box next to the correct answer.**

**dairy**

**horticulture**

**intensive**

**arable  
[1]**

**(b) Some people OBJECT to this type of farming.**

**Suggest why.**

---

[1]

**(c) Write down TWO factors, apart from food, which affect the growth of fish such as salmon.**

1 \_\_\_\_\_

2 \_\_\_\_\_ [2]

**(d) The types of salmon used in fish farming were developed by selective breeding.**

**Describe the main stages in selective breeding.**

---

---

---

[3]

**[Total: 7]**

# **BLANK PAGE**

**3 Rosie is a fruit farmer.**

**(a) What type of harvest will Rosie produce?**

**Put a tick (✓) in the box next to the correct answer.**

**aseptic**

**gathered**

**microorganisms**

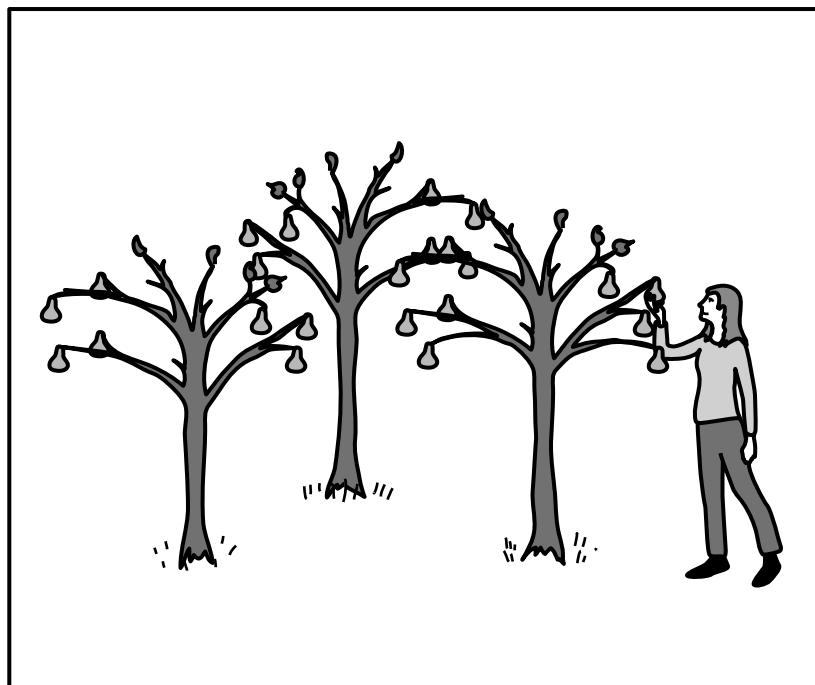

**whole**

**[1]**

**(b) Rosie wants to grow pear trees in a large field.**

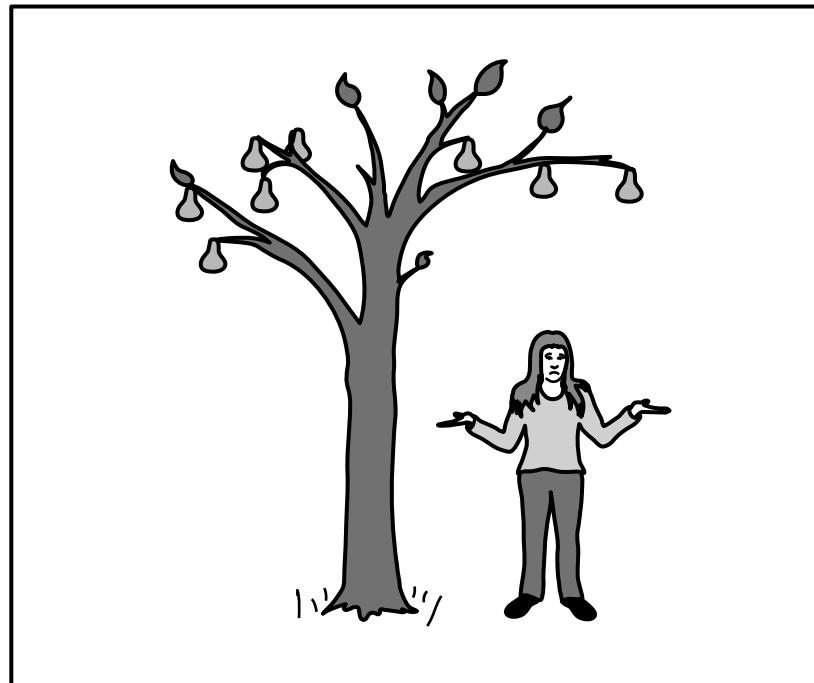

**She can grow either dwarf trees (2 m tall) or tall trees (6 m tall).**

**using dwarf trees**

- **500 trees used**
- **each tree produces 15 kg pears/year**
- **total crop = 7500 kg/year**

## using tall trees

- **40** trees used
- each tree produces **80 kg** pears/year
- total crop = \_\_\_\_\_ kg/year

(i) Work out the total crop from tall pear trees.  
Complete the box above.

[1]

- (ii) Rosie decides to use dwarf pear trees.**  
**She thinks they will produce the larger crop.**  
**Suggest TWO other advantages of growing dwarf trees in a large field.**
- 
- 

**[1]**

- (c) Rosie will make pear cider with her pears.**

**Complete the sentences about this process.**

**Use words from this list.**

**ALCOHOL**

**CARBON DIOXIDE**

**FERMENTATION**

**GERMINATION**

**NITROGEN**

**OXYGEN**

**POLLINATION**

**The pears are squashed to make pear juice.**

**Yeast and sugar are then added.**

**The yeast produces** \_\_\_\_\_

**and** \_\_\_\_\_ .

**This process is called**

\_\_\_\_\_ .

**[2]**

**(d) Rosie hopes her pears will get a quality mark.**

**What does a quality mark mean?**

**Put a tick (✓) in the box next to the correct answer.**

**The product has ...**

**... been grown by intensive farming.**

**... been grown for a long time.**

**... reached a certain standard.**

**... reached a maximum size.**

**[1]**

**(e) Rosie is worried that microorganisms may damage her stored pears.**

**(i) Name a type of MICROORGANISM that could damage the pears.**

**[1]**

**(ii) Explain how microorganisms damage foods such as pears.**

**[2]**

**[Total: 9]**

# **BLANK PAGE**

#### 4 Read the information on a new fuel.

## A clean biofuel?

The first commercial crop of *Jatropha curcas* has been harvested in Africa.

It is a fast growing plant, producing seeds containing 45% oil.

The wild variety of *Jatropha* requires little water and can grow in poor soil. However, the crop yield and the flowering time of each wild plant varies from year to year.

The commercial crop of *Jatropha* is much better than the wild type. Each plant regularly produces about 3 kg of seed each year, resulting in 3 tonnes per hectare. This is six times the crop produced by wild plants.

- (a) How much seed is produced by wild *Jatropha* plants per hectare in a year?

answer = \_\_\_\_\_ tonnes per hectare [1]

- (b) Suggest TWO ways, apart from a higher crop yield, in which the commercial *Jatropha* plants have been improved.

---

---

[2]

**(c) Which technique would have been used to develop the new commercial *Jatropha* plants?**

**Put a tick (✓) in the box next to the correct answer.**

**artificial insemination**

**food processing**

**selective breeding**

**surrogate parents**

**[1]**

**(d) New *Jatropha* plants can be grown in different ways.**

**A ... from seeds**

**B ... from cuttings**

**C ... by tissue culture**

**Answer the questions below using the letters A, B and C.**

**More than one letter can be used for each answer.**

**(i) Which method(s) depends**

**on pollination?**

\_\_\_\_\_ [1]

**(ii) Which method(s) depends**

**on sterile conditions?**

\_\_\_\_\_ [1]

**(iii) Which method(s) produce**

**identical plants?**

\_\_\_\_\_ [1]

- (e) Some farmers in the UK are thinking about growing *Jatropha* plants.**

**They would use polytunnels to control the growing conditions.**

**Name ONE condition they would control and explain how it could be controlled.**

**condition** \_\_\_\_\_

**how it could be controlled** \_\_\_\_\_

\_\_\_\_\_ [2]

**[Total: 9]**
