

**Thursday 24 January 2013 – Morning**

**GCSE GATEWAY SCIENCE  
SCIENCE B**

**B711/01 Science modules B1, C1, P1 (Foundation Tier)**

Candidates answer on the Question Paper.  
A calculator may be used for this paper.

**OCR supplied materials:**  
None

**Other materials required:**  
 • Pencil  
 • Ruler (cm/mm)

**Duration:** 1 hour 15 minutes

Candidate forename					Candidate surname				
--------------------	--	--	--	--	-------------------	--	--	--	--

Centre number						Candidate number			
---------------	--	--	--	--	--	------------------	--	--	--

**INSTRUCTIONS TO CANDIDATES**

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer **all** the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Do **not** write in the bar codes.

**INFORMATION FOR CANDIDATES**

- Your quality of written communication is assessed in questions marked with a pencil (✍).
- A list of equations can be found on page 2.
- The Periodic Table can be found on the back page.
- The number of marks is given in brackets [ ] at the end of each question or part question.
- The total number of marks for this paper is **75**.
- This document consists of **20** pages. Any blank pages are indicated.

## EQUATIONS

energy = mass × specific heat capacity × temperature change

energy = mass × specific latent heat

$$\text{efficiency} = \frac{\text{useful energy output } (\times 100\%)}{\text{total energy input}}$$

wave speed = frequency × wavelength

power = voltage × current

energy supplied = power × time

$$\text{average speed} = \frac{\text{distance}}{\text{time}}$$

distance = average speed × time

$$s = \frac{(u + v)}{2} \times t$$

$$\text{acceleration} = \frac{\text{change in speed}}{\text{time taken}}$$

force = mass × acceleration

weight = mass × gravitational field strength

work done = force × distance

$$\text{power} = \frac{\text{work done}}{\text{time}}$$

power = force × speed

$$\text{KE} = \frac{1}{2}mv^2$$

momentum = mass × velocity

$$\text{force} = \frac{\text{change in momentum}}{\text{time}}$$

GPE = mgh

$$mgh = \frac{1}{2}mv^2$$

$$\text{resistance} = \frac{\text{voltage}}{\text{current}}$$

Answer **all** the questions.

### **SECTION A – Module B1**

- 1** This question is about drugs.

- (a) Different drugs have different effects on the body.

Draw straight lines from the **drug** to its **effect on the body**.

<b>drug</b>	<b>effect on the body</b>
depressant	block nerve impulses
hallucinogen	distorts what is seen and heard
pain killer	slows down brain activity

[2]

- (b) James has drunk one and a half pints of beer and one gin and tonic.

- (i) Explain how alcohol will affect James **and** his driving.

.....  
.....  
.....

[2]

- (ii) People who drink more than four units of alcohol are likely to be over the legal limit for driving.

Look at the table.

<b>Drink</b>	<b>Amount</b>	<b>Units of alcohol</b>
beer	one pint	2.3
gin and tonic	one measure	1.0
lager	one pint	3.4
wine	one glass	3.0
vodka	one measure	1.0

Can James legally drive? .....

Explain your answer.

.....  
.....

[Total: 6]

Turn over

- 2** Kerry and Abbas investigate the nervous system.

They ask people to test their reactions using a computer game.

The game uses a square that changes colour.

It times how long it takes someone to react to the change.

The table shows the results.

<b>Name</b>	<b>Sex</b>	<b>Age in years</b>	<b>Time taken to react in seconds</b>					
			<b>Attempt 1</b>	<b>Attempt 2</b>	<b>Attempt 3</b>	<b>Attempt 4</b>	<b>Attempt 5</b>	<b>Mean</b>
<b>Colin</b>	male	16	0.28	0.34	0.33	0.33	0.40	0.34
<b>Diane</b>	female	55	0.39	0.45	0.44	0.40	1.43	0.62
<b>Ewan</b>	male	14	0.31	0.28	0.24	0.30	0.33	0.29
<b>Freda</b>	female	72	0.53	0.48	0.54	0.48	0.53	0.51
<b>Tom</b>	male	12	0.26	0.29	0.30	0.30	0.27	0.28

- (a)** Look at Diane's results. One of her results is inaccurate.

This has made her mean too high.

Calculate the mean for Diane **without** the inaccurate result.

$$\text{mean} = \dots \text{seconds} \quad [2]$$

- (b)** Kerry and Abbas write down some conclusions about their data.

Put a tick ( $\checkmark$ ) next to each of the **two** conclusions that best match their data.

Colin's reactions improved with practice.

The males have faster reactions than the females.

Reactions slow down as you get older.

Younger people can follow instruction better.

Ewan plays a lot of computer games.

[2]

- (c)** To test their reactions the individuals use their eyes to see the colour change.

Which part of the eye detects the colour change?

..... [1]

- (d) Some people inherit genetic disorders.

Which of these genetic disorders is most likely to be a problem in this investigation?

Put a tick (✓) next to the **best** answer.

cystic fibrosis

colour blindness

sickle cell anaemia

[1]

[Total: 6]

- 3 Gemma finds out about problems caused by different diets.

Read the information that Gemma finds out about diets with high salt levels.

Many people are concerned about the amount of salt in their diet. Salt contains the element sodium. There are limits to the amount of sodium you should eat each day.

The table shows the suggested values for daily sodium intake.

minimum amount of sodium the body needs each day	500 mg
maximum daily intake for a healthy adult <b>under 50</b>	2300 mg
maximum daily intake for a healthy adult <b>over 50</b>	1500 mg

The average daily intake of sodium for people in America is 3400 mg.

Some people are concerned that this amount of sodium could lead to health problems.

Use the data and your scientific knowledge to explain if people should be concerned.

*The quality of written communication will be assessed in your answer to this question.*

[6]

[Total: 6]

- 4 Read the information about some diseases.

Disease	Type of pathogen that causes disease	How the pathogen gets into body	Some countries where the disease occurs
diphtheria	bacteria	through the nose	Brazil South Africa India
malaria	protozoa	when an infected mosquito bites you	China Kenya Gambia
cholera	bacteria	drinking contaminated water	Kenya India Vietnam
typhoid	bacteria	drinking contaminated water	Kenya India Vietnam
yellow fever	virus	when an infected mosquito bites you	Brazil Kenya Gambia

Use the information in the table to answer these questions.

- (a) Mucus on the lining of your airways can help prevent disease.

Write down the name of the disease that this mucus could help prevent.

..... [1]

- (b) Sally is going on holiday to Brazil.

Which **two** diseases should she be vaccinated against?

..... and ..... [1]

- (c) Use the table to write about the similarities and differences between malaria and yellow fever.

.....  
 .....  
 .....  
 ..... [2]

- (d) When a pathogen enters the body the immune system can destroy the pathogen.

Describe how the immune system can destroy pathogens.

.....  
.....  
.....  
..... [3]

[Total: 7]

## SECTION B – Module C1

- 5 This question is about pigments in paints.

Pigments give paints their colour.

Look at the table. It shows information about some pigments used in paints.

Pigment	Colour	Effect of increasing the temperature	Effect of light	Type of paint made
A	blue	no change	no change	oil based
B	yellow	no change	colour fades	emulsion
C	red	changes to yellow	colour fades	oil based
D	green	colour fades	absorbs light and later gives off light	emulsion

- (a) (i) Which pigment is **most** resistant to fading from exposure to light and high temperatures?

Choose from A, B, C or D.

answer ..... [1]

- (ii) Which pigment is thermochromic?

Choose from A, B, C or D.

answer ..... [1]

- (b) Paints also contain a **binding medium** and a **solvent**.

What are the jobs of the binding medium and of the solvent?

.....  
.....  
.....  
.....

[2]

- (c) David paints his steel bike.

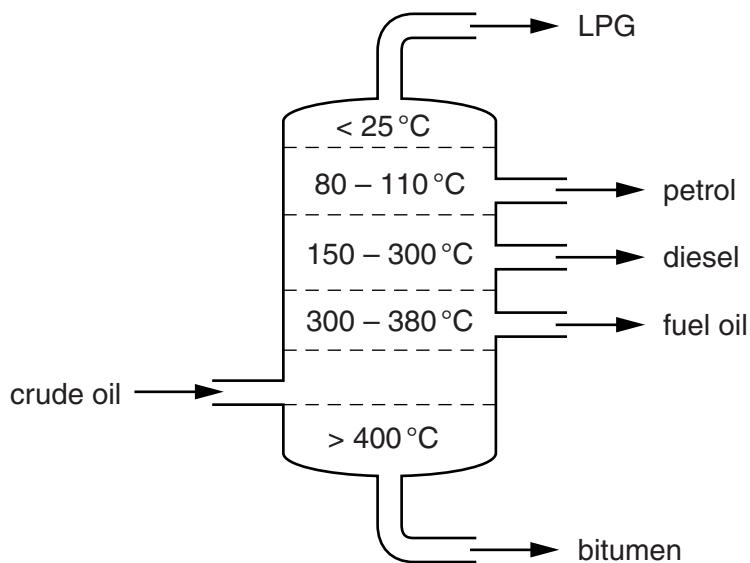

Explain why David paints his bike.

.....  
.....

[Total: 6]

- 6 Look at the diagram of a fractionating column.

It shows the temperatures inside the column and some of the fractions made.

- (a) Write down the name of **one other** fraction obtained from crude oil.

..... [1]

- (b) Look at the table. It shows some carbon compounds and their boiling points.

Compound	Boiling point in °C	Fraction
butane	0	.....
heptane	99	petrol
eicosane	344	.....
dodecane	216	.....

Complete the table to show which fraction each compound belongs to.

One has been done for you.

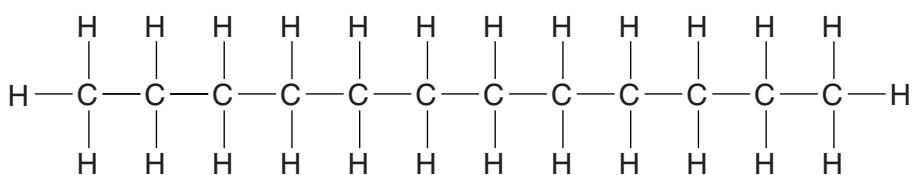

[2]

- (c) Crude oil is a **non-renewable** fuel.

What is meant by a non-renewable fuel?

.....  
..... [2]

(d) Look at the displayed formula of dodecane.

Complete the sentences.

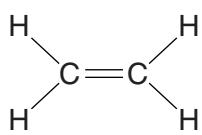

The number of **elements** in dodecane is ..... .

The total number of **atoms** in one molecule of dodecane is ..... [2]

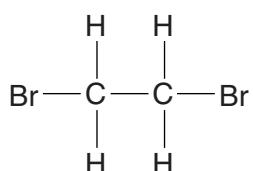

[Total: 7]

## 12

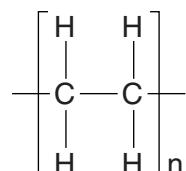

- 7 Look at the displayed formulas of ethene and two compounds that can be made from ethene.

ethene

compound A

compound B

Write about the **types** of compound shown and describe how ethene can be changed into compound **B**.

*The quality of written communication will be assessed in your answer to this question.*

[6]

[Total: 6]

- 8 Look at the table. It shows information about gases which pollute the air.

Pollutant gas	Solubility in water	pH of solution	Effect on marble statues	Effect on steel	Effect on humans
A	very soluble	8	none	none	none
B	insoluble	not applicable	none	none	poisonous
C	very soluble	3	reacts slowly	increases rusting	causes coughing
D	very soluble	4	reacts slowly	increases rusting	causes coughing and photochemical smog

- (a) Which gas could be carbon monoxide?

answer ..... [1]

- (b) Karen thinks that pollutant gases A, C and D all cause acid rain.

Does the evidence support this?

Explain your answer.

.....  
.....  
.....  
..... [3]

- (c) Cars are fitted with catalytic converters.

What is the job of a catalytic converter?

..... [1]

- (d) Methane burns in oxygen.

Carbon dioxide and water are made.

Write a **word** equation for this reaction.

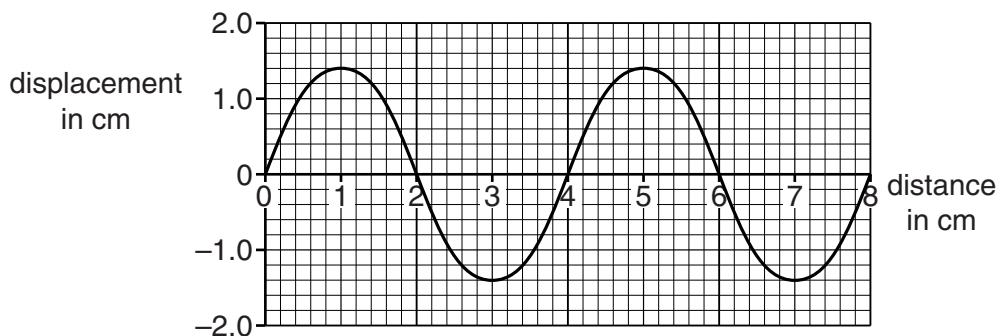

..... [1]

[Total: 6]

## SECTION C – Module P1

- 9 This question is about waves.

Look at the diagram of a wave.

- (a) (i) What is the amplitude of the wave?

answer ..... cm [1]

- (ii) What is the wavelength of the wave?

answer ..... cm [1]

- (b) The wave has a frequency of 600 Hz.

Calculate the speed of the wave in cm/s.

.....  
.....

answer ..... cm/s [2]

[Total: 4]

- 10 (a) Some parts of the world have earthquakes.

Write down the name of the equipment used to detect earthquakes.

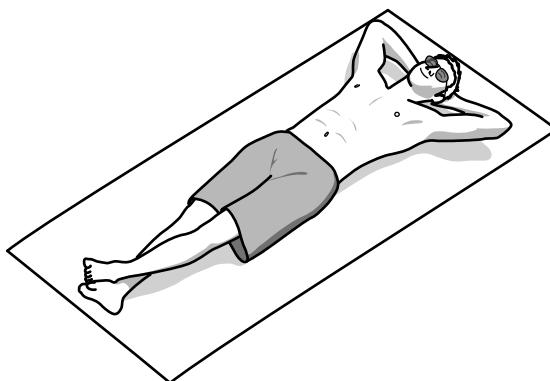

..... [1]

- (b) Earthquakes produce shock waves that pass through the Earth.

Write about the effects of these shock waves.

.....  
.....  
..... [2]

- (c) Mark likes to sunbathe.

In the UK, he can stay in the sun for 60 minutes before he burns.

In Mexico, where it is hotter, he can stay in the sun for only 20 minutes before he burns.

Suggest things he could do to safely stay out in the sun in Mexico.

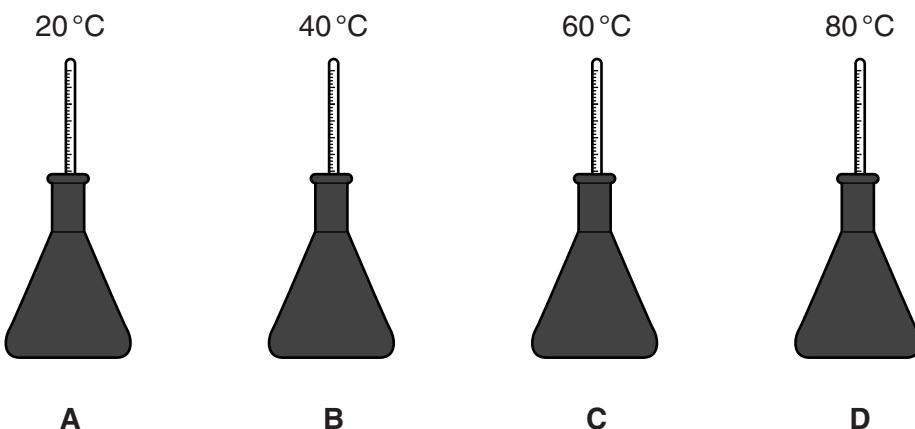

.....  
.....  
.....  
..... [2]

[Total: 5]

- 11 Nadine is performing experiments about infrared radiation.

Look at the diagram of the equipment she uses.

It shows four identical flasks full of water at **different** temperatures.

The flasks are all painted with the same black paint.

- (a) Which flask gives out the most infrared radiation?

Choose from **A**, **B**, **C** or **D**.

answer ..... [1]

- (b) Nadine then uses four identical flasks of **different** colours.

Each of the coloured flasks contains water at 60 °C.

The list shows the colours of the flasks.

Put a tick (✓) in the box next to the flask which cools down the quickest.

**flask colour**

dull black	<input type="checkbox"/>
shiny black	<input type="checkbox"/>
silver	<input type="checkbox"/>
white	<input type="checkbox"/>

[1]

[Total: 2]

- 12 (a)** Oliver wants to reduce his energy bills.

Look at the information about energy saving features for his home.

<b>Energy saving feature</b>	<b>Cost</b>	<b>Saving per year</b>
cavity foam insulation for the walls	£500	£100
double glazing for <b>all</b> windows	£3000	£150
draught proofing for <b>all</b> windows and doors	£50	£30
loft insulation	£200	£100

Oliver has a budget of £500 per year for 6 years to spend on energy saving features.

Oliver knows that payback time is important.

Suggest how Oliver should spend his budget over the 6 years.

*The quality of written communication will be assessed in your answer to this question.*

[6]

(b) In recent years, house builders have been installing better insulation in new houses.

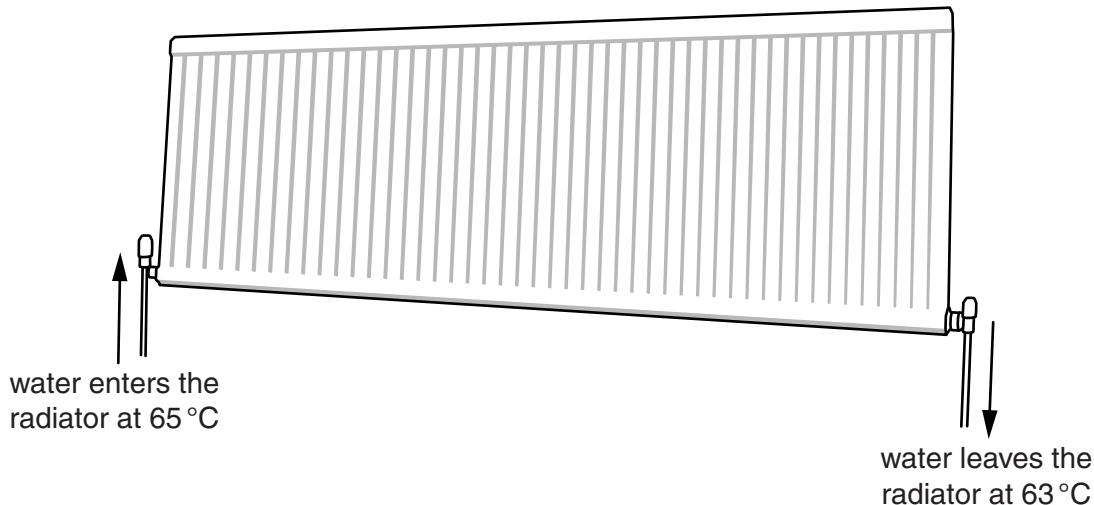

Suggest reasons why.

[2]

[Total: 8]

- 13 Finn's living room is heated by a radiator.

Look at the diagram.

Water enters the radiator at  $65^{\circ}\text{C}$  and leaves at a temperature of  $63^{\circ}\text{C}$ .

$2\text{kg}$  of water flows through the radiator each second.

The specific heat capacity of water is  $4200\text{J/kg}^{\circ}\text{C}$ .

- (a) Calculate the amount of heat energy given out by  $2\text{kg}$  of water as it passes through the radiator.

.....  
.....  
.....

answer ..... J [2]

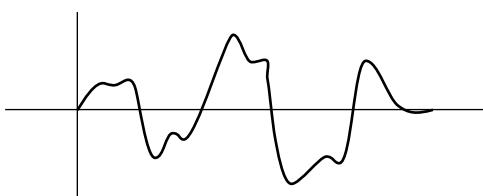

- (b) How could he increase the amount of heat energy given out?

..... [1]

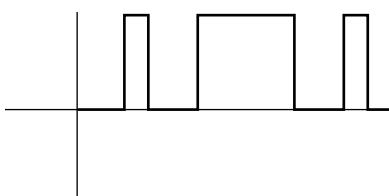

[Total: 3]

14 Television remote controls use digital infrared signals to change channels.

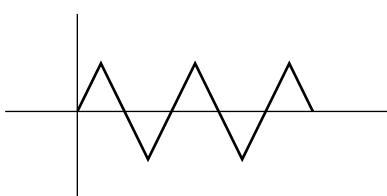

(a) Which one of the diagrams shows a digital signal?

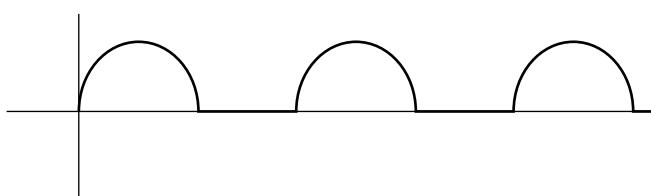

A

B

C

D

Choose from **A**, **B**, **C** or **D**.

answer ..... [1]

(b) Write about other uses of infrared radiation.

.....  
.....  
.....

[2]

**[Total: 3]**
