

Candidate Number Comp

General Certificate of Secondary Education 2012

Technology and Design

Unit 3: Product Design

TUESDAY 29 MAY, AFTERNOON

TIME

1 hour.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Write your answers in the spaces provided in this question paper. Answer **all eight** questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 80.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

	miner's only

(a)	Name the two	labels shown	and ex	plain the	purpose	of one	label.
-----	---------------------	--------------	--------	-----------	---------	---------------	--------

Name (i) ______[1]

Name (ii) ______[1]

Purpose of (i) or (ii) _____

______[2

(b) The company makes use of the system of just-in-time manufacture in its production process. Outline three main features of this system and one advantage that this system has for the company.

Feature 1 _____

_____[1]

Feature 2 _____

_____[1]

Feature 3 _____

_____[1]

Advantage _____

_____[1

2 (a) Outline the purpose of a Gantt Chart.

er Only
Remark

______[1]

(b) Construct a basic Gantt Chart based on the following information:

A key fob is to be made in the school workshop from mild steel sheet as shown in **Fig. 2**. The finished key fob should be shaped as shown with a 5 mm hole drilled for the key ring. The key fob, which is shown in **Fig. 3**, should be finished by dip coating.

The Gantt Chart must show five main stages.

The manufacturing time for the key fob is 100 minutes.

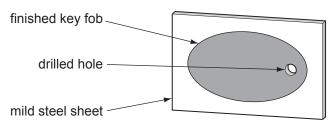

Fig. 2

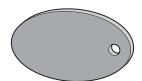

Fig. 3

Gantt Chart

(c)	State two reasons for dip coating the key fob.	
	Reason 1	[1]
	Reason 2	[1]

A CAD drawing of a bracket is shown in **Fig. 4** with its main dimensions. It is to be made from a single piece of acrylic. **Fig. 5** shows a CAD drawing of the bracket before it is shaped.

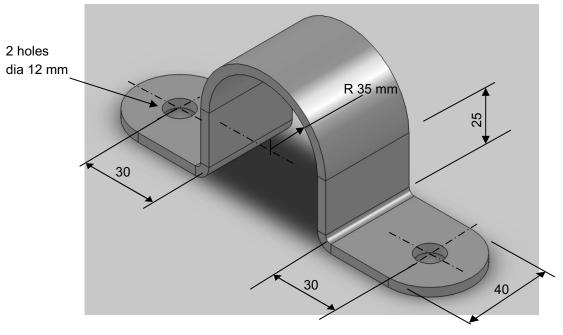

Fig. 4

(a)	List three machines/items of equipment needed (other than hand	d
	tools) to make this bracket in a school workshop.	

_____[3]

(b) Fig. 5 has three missing dimensions. Insert in Fig. 5 the three missing dimensions.

[3]

		[4]	

4 Fig. 6 shows part of a kitchen.

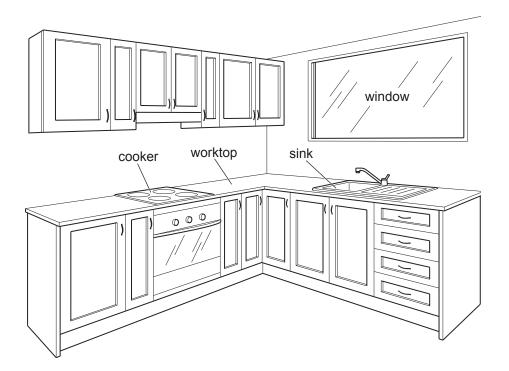

Fig. 6

(a)	Select a suitable material for the following ite	em.
	Give a reason for your answer.	

Sink _______ [2]

(b) Anthropometrics involve statistics on the dimensions of the human body. Suggest **two** dimensions in the kitchen which are based on anthropometrics.

1. _____

2. ______[2]

Examiner Only

(c)	(i)	Explain what is meant by recycling.		Examin Marks	er Only Remar
			 _ [2]		
	(ii)	Many household items which are used in the kitchen can be recycled. Explain two environmental benefits of recycling.			
		Benefit 1			
		Benefit 2			
			_ [2]		

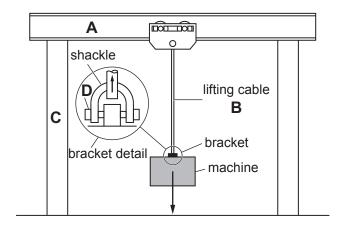

5	(a)	Different materials have different properties. Explain what the material property "plasticity" means and give one application where this property is required.
		Plasticity

Application _____

	rernment has been keen for many years to introduce energy efficience asures, for example, home insulation.	Marks Remark
(a)	State three different home insulation techniques currently in use.	
	1[1]
	2[1]
	3[1]
A le	ss successful measure has been the development of electric cars.	
(b)	Outline two social reasons that the government would have considered to encourage the development of electric cars.	
	Reason 1	-
	[1]
	Reason 2	-
	[1]
(c)	Market Pull will also have had an influence on the development and introduction of the electric car.	
	Briefly discuss three Market Pull factors that would have a negative effect on the development of electric cars.	
	Factor 1	_
	[1]
	Factor 2	_

7 Fig. 8 shows a design for a wall mounted tool holder which is to be made from one piece of aluminium 1.5 mm thick. Fig. 9 shows the aluminium for the holder before it is shaped.

Examiner Only		
Marks	Remark	

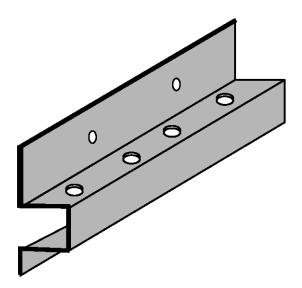

Fig. 8

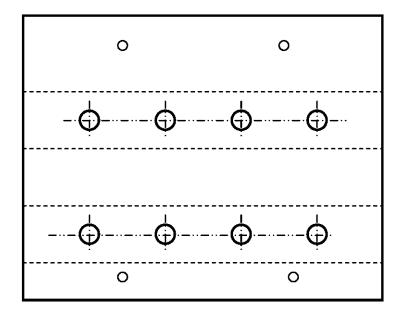

Fig. 9

(a) Give **two** reasons why aluminium was chosen for the holder compared to mild steel.

Reason 1 ______ [1]

Reason 2 ______

_____[1]

(b)	(i)	The aluminium holder must be fabricated to the required shape. Suggest a suitable manufacturing process that could be used to perform this operation.	M	xamine arks	er Only Remark
			[1]		
	(ii)	Explain why painting was not deemed to be a suitable finish for the holder.			
			[1]		
(c)		part of the quality control process of the holder it was found that four corners of Fig. 9 required modification.			
	(i)	Suggest one reason why this modification would be required.			
		Reason:			
			_		
			[2]		
	(ii)	Show on Fig. 9 a suitable modification.	[2]		

Using annotated sketches, design a modern/contemporary compact disc **Examiner Only** Marks Remark (CD) holder to hold 10 CDs in their cases. Your design must satisfy the following specification points: Be aesthetically pleasing [4] Make efficient use of material(s) [4] Must be freestanding and stable [4] Allow easy selection and readability of each CD [4] Clear dimensioned solution [4] Identification and justification of appropriate material(s) and manufacturing techniques for your solution [4] Use the following information to help you: The CD holder is intended to be used by teenagers Consider and identify material(s) Consider and identify all important dimensions A typical single CD case is approximately $140 \, \text{mm} \times 125 \, \text{mm} \times 10 \, \text{mm}$ thick A typical double CD case is approximately $140\,\mathrm{mm} \times 125\,\mathrm{mm} \times 20\,\mathrm{mm}$ thick Use the next 2 pages for your answer.
