#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**International General Certificate of Secondary Education** 

# MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

## 0452 ACCOUNTING

0452/13

Paper 13, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

#### **MARKING GUIDELINES**

- Award marks only in accordance with the mark scheme. If a script contains an answer which is not anticipated please refer to Principal Examiner before awarding any marks.
- Where a candidate makes an arithmetical error or selects the wrong figure in an account or a
  calculation, so that totals or the results of the calculation are wrong but are correct on his own
  figures, he will lose the mark for selecting the original figure but may earn an own figure (OF)
  mark for the result, total or calculation.
- Where particular wording is shown on the mark scheme accept any reasonable spelling and abbreviation as long as the meaning is clear.
- For example, for "Balance brought down" accept Balance b/down, Balance b/d, Balance, Bal b/down, Bal b/d, Bal, Brought down, b/down, b/d, but not Bbd, bd, or any variation of "Balance carried down".
- If a candidate gives two alternative answers without crossing one out, mark both answers and give credit for the better answer. If one is crossed out, mark the other answer.
- Where a ledger account is to be prepared, each mark is usually for the date, narrative and amount together. If the candidate has correctly prepared the account but not shown some or all of the dates, he may earn some marks according to the mark scheme.
- If a ledger account is completely reversed, no marks will be awarded for individual entries but there may be marks available for own figure balances carried and brought down.
- Where an answer is to be shown as a ratio, it should be shown as xx:1 and **not** as 1:xx. An answer of just the correct figure xx may be accepted but not if any other description such as %, times, days etc. is shown and not if shown as negative when it should be positive.
- Where a calculation is to be shown to two decimal places, an answer rounded up or down may be accepted (e.g. 2.85 or 2.86 if the true answer is 2.853) but not an answer shown to only the nearest whole number or one decimal place (e.g. 2.8 or 3).
- Where dollars and cents are shown in a question and exact cents are required in a calculated answer (e.g. \$35.60), many candidates will show \$35.6, as their calculators will suppress the final 0. Although wrong this may be accepted. The \$ sign is not required.
- Ledger accounts may be accepted in either two sided or the running balance format and the mark scheme will show how marks should be allocated.
- Where a final account is requested, a list of items will not normally earn any marks.
- If candidates are required to prepare a Balance Sheet, either a two sided or a vertical presentation will be accepted and the mark scheme will show how marks are to be awarded.
